Lancaster Farming

VOL. 26 No. 10

Lancaster Farming, Saturday, January 3, 1981

\$7.50 Per Year

Galen W. Crouse, R1 Stevens, right, has been named Master Farmer for 1980. Crouse, along with wife Carolyn and sons Philip, left, and Neal operate a successful dairy enterprise in Lancaster County on 310 acres of leased land. His program boasts a 16,000 pound herd average for milk production. He is actively involved in the embryo transfer program.

Galen Crouse wins Master Farmer award

STEVENS — Galen W. Crouse, of R1 Stevens, has been named a Master Farmer for 1980.

His business expertise and management efficiency has proven you can be a highly successful dairyman without owning an acre of land or a building.

The 310 acres of cropland he farms is owned by operators of a limestone quarry. The land was sold years ago by his father. Unable to buy the farm, Crouse leases the land.

On this farm Crouse raises 360 dairy animals, 125 of which are milk cows. Heavily involved in an embryo transplant program, he sells offspring for a profit in addition to maintaining a milk herd average of 16,000 pounds of milk.

"When my dad sold the farm, I negotiated an agreement with the new owner. The original buildings were too small, outdated, and inefficient for an expanding dairy operation," Crouse says.

The owner, however, preferred not to invest additional money in the farm. The Master Farmer financed and constructed a 40 by 200-foot free stall barn, a 60 by 90-foot maternity barn, and two large silos.

Crouse worked out a 20-

year lease whereby he has the right to farm the land for this period or longer.

"I formed a partnership with my father in 1954, but disbanded it in 1966, when the farm was sold. I pur-

PMMB to face several 1981 challenges

BY CURT HARLER
HARRISBURG — Look for the Pennsylvania Milk Marketing Board to be the target of consumer-oriented activity as 1981 wears on.

PMMB is likely to face opposition both from within the Board and from outside interests.

While two of the Board's three members and the state Milk Dealers Association face legal action on a charge they conspired to force a consumer representative out of her job, the battle will go to broader interests than that.

Main target will be

PMMB's authority to establish minimum prices for milk.

In Pittsburgh, for instance, it has become almost a regular occurrence for the Mayor of the city to challenge price increase orders issued by PMMB. The latest legal action against a PMMB-ordered price hike came earlier this month.

PMMB's consumer representative on the Board, Marianne Olson, says she takes a different position than the Mayor. The Mayor

said he wanted no price increase, she points out. "I want a decrease."

At least one researcher has found that consumer representation at PMMB hearings makes a difference in milk pricing.

Amy Leader, a student interne with Common Cause, the citizens' lobby, concluded in her study that in areas like Philadelphia and Pittsburgh, where consumers are well represented, the consumer factions do better in milk pricing battles.

Leader is the niece of

BY DICK ANGLESTEIN

FIVEPOINTVILLE — Farmers in Brecknock Township, Lancaster County, will seek clarification of several agricultural restrictions in the new zoning ordinance which will be up for adoption by township supervisors at a public hearing on January 15.

Farmers' concerns are centered on certain agricultural restrictions, such as those governing height limitations for accessory buildings to the principal dwelling permitted in the ag district and a 25-acre minimum requirement for intensified livestock uses.

Donald M. Robinson, vo-ag teacher in the Eastern Lancaster County School District, said that farmers have been in touch with him concerning such restrictions, which are included in the ordinance to be considered by supervisors at the

public hearing in the Brecknock Elementary School, Bowmansville, at 7:30 p.m. on Thursday, January 15.

"Primarily, the farmers want more clarification of such restrictions and how they might affect their operations," Robinson said.

Concerning the 15-foot height restriction for accessory buildings, Robinson explained that this could be a concern of agricultural families who utilize horses for transportation. Family members, he said, may want to construct another dwelling on a farm and the 15-foot restriction might apply to a horse barn which would be needed as an accessory building.

The section of the proposed ordinance, which updates the existing zoning regulations adopted in 1973, containing the 25-acre minimum for intensified livestock operations states:

"Poultry houses for

housing more than five thousand (5000) birds and structures for housing more than twenty-five (25) sows or fifty (50) head of other livestock shall not be located on lots of less than twenty-five (25) acres, of which a minimum of twenty (20) acres shall be arable land available for the disposing of liquid manure generated by the poultry or livestock."

In view of today's farming economics, seemingly all future livestock operations in the township would meet this 25-acre minimum requirement.

"We can see that proper disposal of manure is a legitimate concern," Robinson explained.

"But what if a farmer with slightly less than 25 acres wants to establish a poultry operation in which all of the manure will be sold to another farmer or to a mushroom grower?"

Gets scoop on legislation, ACP \$ cuts

Lanc. Dist. re-elects officers

LANCASTER — Aaron Stauffer and Amos Funk were unanimously re-elected chairman and vice-chairman of the Lancaster

County Conservation District during the monthly Board of Directors meeting on Monday.

During their last meeting

of the year, the directors also took the opportunity to discuss the latest conservation programs with local legislators.

Attending the session were the three Lancaster County Commissioners, James Huber, Jean Mowery and Robert Boyer. From the state legislators, personal appearances were put in by Senators Clarence Manbeck and Richard Snyder, with Steven Nickol representing Senator Ralph Hess. Other

Last call for Farm Show issue

LITITZ — Farm Show 1981 will begin Sunday January 11 and run through Friday the 16th. The annual LANCASTER FARMING Farm Show issue will be in farmers' mailboxes the Saturday before the Show opens.

The issue will be packed with up-to-date information on the Show, including the most recent list of exhibitors, a two-page map showing where everyone is located on the new exhibit floor plan, and the day-by-day schedule of events, including all last minute changes.

In addition, the Farm Show issue will include

biographies on the FFA Keystone Farmer award winners, features on livestock and machinery, and pages of information you'd like to know before you head for Harrisburg and the big show.

This is our final notice to remind readers and advertisers alike to gather up Farm Show related material for publication.

Be sure your group, firm or club is represented in the bible of Pennsylvania agriculture: Lancaster Farming.

Contact us at Box 366, Lititz, PA, 17543; or phone 717/626-5662, if you have something to contribute.

In this issue

From chick to cage, we formulate feeds and feeding programs with your profit in mind.

At Pennfield Feeds, our basic goal is to help our customers make more money. We believe we can accomplish this for you, too.

Unlike many other feed companies, we develop custom feeding programs for each individual operation.

It all starts with a Pennfield man reviewing your operation with you. Your goals. Your records. The health and overall condition of your birds. Whether you grow chicks or buy pullets. The type of equipment you use. The production potential of your flock. Your management

practices. And other factors that have an effect on your profit potential.

With the aid of computers, we then design a feeding program specifically tailored to your birds' needs — a program that can improve your profits by reducing expenses, increasing production, or both.

And we're a local company. We buy our feed grains locally. Shipping savings are passed on to customers. Our feeding programs are developed through test work and field trials based on local conditions.

These and other Pennfield advantages are helping hundreds of customers increase their profits. We can do the same for you. Phone or write us today.

Livestock market and auction news

Okalahoma Cattle

Wednesday, December 31
FOR THE WEEK: Very limited supply of feeder steers under 600 lbs. steady to \$1.00 higher. Heifers under 600 lbs. generally steady. Offerings over 600 lbs. untested. Slaughter cows steady to \$1.00 higher. Late sales include Utility and Commercial 2-3 43.75-48.75; Cutter 1-2 42.00-45.50. Slaughter bulls closed the week steady to \$1.00 higher. Yield Grade 1-2 1350-1600 lbs. 54.00-58.00. Salable receipts this week near 2,200 head compared with 2,064 head last week. Feeder steers and heifers 1,600 head (73%); cows and bulls (27%).

HOG AUCTION: 100. Not enough of any one class on offer to make an adequate test of the trade.

FOR THE WEEK: Compared to late last week: Barrows and gilts recovered part of the early loss to close .25-.50 cents lower; sows generally steady; feeder pigs steady to \$1.00 higher. Salable receipts near 1,500 head for the holiday shortened period and compares with 1,609 head for the comparable period a week ago. Feeder pigs totaled near 300 head and comprised 20 percent of the salable receipts. The week's best price at \$44.40 was paid for a few head of US 1-2 220-242 lbs. barrows and gilts.

Peoria Cattle

Wednesday, December 31
Report supplied by USDA
 51 Weekly Cattle Summary: Slaughter Steers

mostly steady. Heifers steady to .50 lower. Cows sold 1.00 to 2.00 higher than last week's Light midweek run. Bulls steady to 1.00 higher. Trading moderate on Steers, active on Heifers during the week. As the price differential spreads on YG 3 and 4 Carcass buyers are more selective, cautious and those consignments carrying YG 4 are discounted accordingly. Receipts this week about 3000, last week 2467 and 10903 last year.

SLAUGHTER STEERS: Choice, few Prime 2-4 1050-1300 lbs. 63.00-65.00, Mostly 64.00-64.50, 1½ loads 1100-1150 lbs. 65.50 on Monday. YG 3-4 62.00-63.50, Few loads mostly 4's, few 5's 61.00. Mixed Good and Choice 2-4 1050-1350 lbs 62.00-63.50 Good 60.00-62.00.

SLAUGHTER heifers: choice, few Prime 2-4 950-1175 lbs. 61.50-63.50, bulk 62.00-63.50 1½ loads 63.75 on Monday. Part load 1300 lbs. 63.00 on Wednesday. YG 3-4 60.00-62.00. Part load 4, few 5's 55.00. Mixed Good and Choice 2-3 850-1000 lbs. 61.00-62.50 Good 59.00-61.00.

COWS: Utility and Commercial 2-3 42.00-47.00, few high yielding 48.00-49.00. Cutter 40.00-45.00.

Ask the Old Farmer: How early did the "widow's walk" appear on houses in this country, and what was its primary purpose? M.M., Atlanta
 The railed-in platform which some folks call a widow's walk was necessary to fight chimney fires. It dates from the time they put the chimney in the middle of the house instead of at one end, close to 300 years ago. But nobody walked on them to watch for ships. We have seen them 1,000 miles inland.

Home Hints: To make the job of varnishing easier, place the container of varnish in a pan of hot water. The varnish flows on easier and dries faster.

OLD FARMER'S WEATHER FORECASTS

New England: Snow, heavy south and east, at start of week, cloudy and cold midweek, weekend brings rain, snow north
Greater New York-New Jersey: Rain and snow, then gradual clearing and milder, weekend is rainy and warm
Middle Atlantic Coastal: Rainy and milder at week's start, then clearing and warm midweek, week's end brings heavy rain, mild temperatures
Piedmont & Southeast Coastal: Showers, heavy west, first of week, sunny and warm middle of week, rain north and central, showers south weekend

(All Rights Reserved Yankee Inc. Dublin NH 03444)

signments with substantial percentage 4 50-1.00 lower late. Heifers closed steady to 50C lower. Cows were steady to firm, instances 25-50C higher bulls were firm.

Three day receipts 12,700 this week; last week 10,600; year age 9,100.

The fed. cattle trade followed an irregular course as demand was adjusted for the upcoming non slaughter holiday. Late trading was generally slow, cautious and selective on rather liberal marketings as buyers sought to keep live prices in line with rapidly changing carcass realizations. Yield grade was again dominant price - determining factor in reflection of the wide price differential between yield grade 3 and 4 carcasses. Supplies were rather liberal for a holiday period with some seller pressure to move market-ready cattle during the current year and also to avoid further excess finish. Slaughter steers made up approximately 44 pct and heifers 35 pct. Cows

comprised 13 pct. feeders scarce.

STEERS: Two loads choice and prime predominantly 3, 1175 lbs. 65.50-65.75. Closing trade choice 2-4, predominantly 3, 1050-1300 lbs. 63.25-64.50, part load 3 1200 lbs. 65.00. Tight credit teaches farm management lessons

SAN LUIS OBISPO, Cal. — Last spring's tight agricultural credit and high interest rates should have taught the nation's farmers some important management lessons said Marvin Duncan, assistant

vice president and economist with the Kansas City Federal Reserve Bank, here at the recent Livestock Marketing Congress '80.

Duncan was speaking to Session Two of this year's Congress, whose theme was "Money, Energy and Consumer Demand: Seeking A Management Strategy."

Also speaking at this Session was George Hickman, senior vice president with the Sacramento, California, Bank for Cooperatives. Hickman told his audience that there were several things they could do to keep their financing costs down.

The lessons farmers should have learned, Duncan said, include:

—Farm borrowers will experience continued

fluctuation in interest rates, due to increasing farm demand and the changed regulatory climate for banks and other money markets. Farmers will increasingly compete with other credit users for loan funds, thus driving up interest rates.

—Many of the nation's large commercial farms apparently have less resiliency to withstand periods of economic adversity than many had realized. Many of these farms are not diversified, and must now reassess the use of leverage and of product specialization.

—Energy prices, transportation problems and lack of irrigation water are changing the long-term economics of farming, and

adding new dimensions and importance to firm farm financial planning.

Noting the rapid increase of government credit aid to farmers, Duncan said it is probably time for a thoughtful evaluation of this assistance.

Hickman advised his audience to negotiate with their lender before settling on an interest rate, and to become aware of financing alternatives outside the commercial banking system, such as savings and loans, life insurance companies and the commercial

paper market.

Noting that in our economy, prices received are the "signals" that tell producers when to expand or cutback, Hickman said he was concerned that "We may be sending the wrong kinds of signals to producers through the proliferation of credit programs."

Asked how farmers could do a better job of marketing and distributing their products, Hickman suggested consideration of vertical integration, hedging, and selling through forward contracts.

Livestock market and auction news

Weekly Summary

Friday, January 2

Report supplied by PDA

CATTLE: 2991 Compared with 2440 head last week, and 2887 head a year ago. Compared with last Friday's market: Slaughter steers & bulls unevenly steady; Si. heifers, Cows & Bullocks 1.00-2.00 lower. SI. steers: High Choice & Prime No. 3-4, 65.85-69.00; Choice No. 2-4, 65.25-69.25, Good 58.00-64.75; Standard 52.00-58.00. SI. heifers: Choice 62.75-64.75; Good 55.00-62.50; Standard 50.00-55.00. SI. cows: Utility & Commercial 44.50-49.50; Cutters 43.00-47.00; Canner & L. Cutter 38.00-43.50; Shells down to 26.50. SI. Bullocks: Choice 63.00-68.75; Good 55.00-63.00. SI. bulls: Yield Grade No. 1, 1000-2200 lbs 56.00-62.50, few down to 48.00; Yield Grade No. 2, 1000-1600 lbs 51.00-56.50.

CALVES: 2028. Compared with 2281 head last week and 2008 head a year ago. Vealers steady to 5.00 lower, spots 10.00 lower. Few Prime 100.00-114.00; Choice 90.00-108.00; Good 75.00-95.00; 90-120 lbs. 65.00-75.00; 60-90 lbs. 50.00-70.00; Utility 50-100 lbs. 40.00-55.00.

FARM CALVES: Hol. Bulls 80-130 lbs. 70.00-111.00, mostly 80.00-104.00; Hol

Heifers 80-175 lbs. 75.00-168.00, mostly 90.00-130.00.

HOGS: 4787 Compared with 5906 head last week and 4809 head a year ago. Barrows and gilts 1.00-3.00 lower. US No. 1-2 200-245 lbs. 44.50-48.50; No. 1-3 200-250 lbs. 43.00-46.50; No. 2-3 190-270 lbs. 41.00-44.50. Few No. 1-3 140-190 lbs. 28.00-38.00; Sows 1.00-2.00 higher. US No. 1-3 300-575 lbs. 36.50-43.50; No. 2-3 300-650 lbs. 33.00-38.00. Boars 28.00-35.00.

FEEDER PIGS: 700. Compared with 1311 head last week and 1073 a year ago. Steady to weak. US No. 1-3 20-35 lbs. 8.00-20.00 per head; No. 1-3 35-50 lbs. 18.00-30.00; No. 1-3 50-75 lbs. 2.00-13.50.

GRADED FEEDER PIGS: 2740. Compared with 1070 head last week, and 2302 head a year ago. All sales by CWT. Feeder Pigs highly uneven, extremes 8.00 higher to 11.00 lower. US No. 1-2 30-40 lbs. 60.00-87.00, 40-50 lbs. 60.00-86.00, 50-60 lbs. 53.00-70.50, 60-95 lbs. 48.00-64.50, US No. 2-3 30-40 lbs. 35.00-61.00, 40-50 lbs. 40.00-63.00, 50-75 lbs. 35.00-46.00.

SHEEP: 384 Compared with 338 head last week and 125 head a year ago. Woolled sl lambs uneven Choice 70-110 lbs. 59.00-69.00, Good 60-110 lbs. 45.00-60.00. Few SI ewes. 14.00-36.00

SCS has summer jobs for students

LANCASTER — The Soil Conservation Service, USDA, is offering summer jobs to students who have completed at least one year of college and are majoring in an agricultural field, like engineering, agronomy, biology, forestry, or environmental resource management.

The student trainee program is involved with the conservation of soil and water. As a summer employee with SCS, students are offered positions during

each summer vacation and are eligible for full-time placement upon graduation.

While on the job, students will be assisting SCS conservationists, engineers, soil scientists and plant scientists in the technical aspects of soil and water conservation.

For more information, contact the local SCS office or write Personnel Officer, Soil Conservation Service, Federal Building & U.S. Courthouse, Box 985 Federal Square Station, Harrisburg, PA 17108

State farmland loses over 31 million tons of soil annually

HARRISBURG — Farmland in Pennsylvania is losing soil at a rate over 31 million tons each year, according to a new USDA Soil Conservation Service report. This averages 5½ tons annually for each acre tilled in the Keystone state.

Surprisingly, according to the report, about 70 percent of the erosion occurs on gently to moderately sloping land, rather than on steeper land.

The report also points out cropland in Pennsylvania is decreasing by some 52,000 acres each year. Woodland is vanishing at an even greater rate of over 170,000 acres per year. In contrast, the report indicates urban and built-up land increased by over 1 million acres during a ten year period from 1967 to 1977.

This data is contained in a

recently published report, Pennsylvania National Resources Inventory. Natural resource information is available on land use, conservation treatment needs and status, prime farmlands, potential cropland, sheet and rill erosion and wetlands.

Data was collected from 1400 sample land units covering 100 acres each and located randomly in Pennsylvania. Field data was gathered by Soil Conservation Service personnel. The report shows 10-year trends in land use and treatment.

A Natural Resources Inventory was initiated by Congress under the Resources Conservation Act of 1977. The Act is designed to provide for the appraisal of the Nation's soil, water and related resources. The National Resources Inventory will be continuously

updated at five-year intervals.

"The Inventory will provide direction for SCS's current conservation programs and assist in the development of future programs," said Graham T. Munkittrich, State Conservationist. "This in-

formation will be useful in government agencies, planners, and individuals interested in land use planning."

Copies of the report are available from local offices of the Soil Conservation Service.

Electromagnetic detectives to search for ag pests

ATLANTA, Ga. — Scientists at Georgia Tech Research Institute will develop electromagnetic devices for the detection of contraband agricultural products in international travelers' baggage under a research agreement with the U.S. Department of Agriculture.

Anson Bertrand, USDA director of science and education, said the project is an effort by USDA's Science and Education Administration to help speed up and improve the inspection process.

Bertrand said several electromagnetic techniques

will be investigated, such as signal transmission and reflection.

In this approach, microwaves can be transmitted through baggage or reflected by items in baggage or handbags. The device would detect fruit, meats and vegetables that may carry disease

organisms or insect pests without agricultural inspectors having to open baggage.

In 1978, 7000 disease carriers were found in foreign agricultural products confiscated at U.S. airports.

Electromagnetic in-

struments would offer more thorough inspection with less delay to international passengers, 25 million of whom arrived in the United States by air in 1979.

The one-year, \$80,075 electromagnetic study is funded by USDA's Animal and Plant Health Inspection Service and administered by

USDA's Science and Education Administration.

The principal investigator at Georgia Tech Research Institute is Ronald L. Seaman, and the sponsoring scientist for SEA is Stuart O. Nelson at the Russell Research Center, Athens, Ga.

Government releases study on weather

WASHINGTON, D.C. — A five-year plan to reduce the adverse effect of climatic conditions on the economy and environment has been released by the Commerce

Department's National Oceanic and Atmospheric Administration.

Prepared by the National Climate Program Office, the plan's goal is to help avert

weather-related problems such as food and fuel shortage through improved forecasting and more efficient dissemination of climatic data.

Funds will be drawn from appropriations 11 of the 17 participating agencies receive for climate-related activities. The proposed 1981 budget is \$126.7 million.

Specific goals of the plan include:

Insuring that industries such as farming, construction, recreation, shipping and fishing receive improved climatic data and use it more effectively;

Assessing the effect of increased carbon dioxide on the climate;

Studying the extent to which solar and earth radiation modify climatic conditions, and

Gathering more data on the oceans' roles in climate formation.

Edward Epstein of NOAA is director of the National Climate Program. Participating in the project are 11 federal departments, the Agency for International Development, Council on Environmental Quality, National Aeronautics and Space Administration, National Science Foundation, the Environmental Protection Agency, and the Federal Emergency Management Agency.

Lancaster Farming says...

Enough is enough

The time has come for the Commonwealth to stop wasting money acquiring land and start investing funds in saving it.

Today 12.7 percent of the acreage in Pennsylvania is tied up by the Game Commission, State Forest, or State Park departments. While that doesn't count federally owned land, it still represents a lot of ground in the state.

Obviously one function of any forward-thinking government is to preserve open spaces. If it weren't for the City of New York setting aside the land now known as Central Park, it's likely there wouldn't be an acre of open space on all of Manhattan Island.

But enough is enough

The Game Commission, which already owns over one million acres of land in Pennsylvania is gobbling up additional land at a rate of 22,000

acres per year over the past three years

Acquisitions of state park and forest land continue at a slower rate

There are at least three negative aspects to the constant acquisition of land by the state

For starters, the wrong land is being saved first. There is no big rush of developers to develop rocky hillsides, backwoods timber stands or hilly brush. While these lands eventually may fall prey to developers, it is the open flat areas — farm lands — that are the prime target for building.

Why not use the same money that would go to buying up Game Land as incentive payments for farmers to keep land in agriculture?

It would be a shame if hunters some day are forced to chase deer through farmers' fields because all of the wooded mountain land is gone, but it won't be as bad as having

farmers reduced to cultivating rock slides because the prime agricultural land is sprouting buildings.

Second, the Commonwealth pays no tax on state park land and only 39 cents per acre on game and forest land.

Money goes 13 cents each to county, township and school tax. Although recently increased, this pittance in no way matches the tax paying capacity of any other acre of land in the Commonwealth.

It would be naive to suggest the state increase its tax on itself. And it could be carping to say the Game Commission's proud boast about operating in the black might not look as good if the Commission paid its full share of taxes.

Still, wouldn't it be more fiscally responsible for the state to save the land that will pay back the highest return in taxes first, perhaps using

the income from that acreage to save the rest?

Third, we would argue that game lands, while open to all of the people, actually benefit a relative handful of the population.

Farm land, on the other hand, while owned by few, benefits everyone.

The widespread state parks and game lands are one of the joys of living in Pennsylvania. They should be maintained for posterity as they are today. But again we would say, enough is enough.

Commonwealth tax dollars would be better spent saving the land most endangered by creeping development, the land which will return the most to the tax pool; the land which, in the final analysis, will do the most good for the most people.

That land is the state's agricultural base.

THE "CORRECT" DISCIPLESHIP

January 4, 1981

Background Scripture: Matthew 5

Devotional Reading: Colossians 3:5-17.

Before each one of these columns is written, I spend some time reading and

reflecting upon the "Background Scripture" assigned by the Uniform Lesson Committee. Sometimes I have to wrestle with the passage for quite a while before I find the perspective from which I will reflect and write. Occasionally, however, my reaction to the prescribed scriptural passage is one of extreme discomfort.

What Christ Expects

That's the way it was this week with Matthew 5. The familiar words which I have read and heard so many times fell on me as an accusation. How many times I've waltzed through these passages with a fleeting

appreciation of their beauty and depth. I've loved the analogies, "You are the salt of the earth" and "You are the light of the world" (Matt. 5:13, 14). But somehow this week the verses immediately following them leaped off the page at me:

but if salt has lost its taste, how shall its saltiness be restored? It is no longer good for anything except to be thrown out and trodden under foot by men (5:13b,c).

A city set on a hill cannot be hid. Nor do men light a lamp and put it under a bushel, but on a stand, and it gives light to all in the house (5:14b,15).

As I read these verses it

occurred to me: That's what you're supposed to be — but are you? Am I really "the salt of the earth"? Do I bring a unique Christian flavor to the lives of those around me? Or do I simply reflect the values of my society?

And am I a "light" for my world? Or do I simply contribute to its darkness? What difference does it make that I am a Christian.

Then there's my church. Is it the distinctive "salt" and "light" Jesus expects of his followers? Or is it simply just another institution that perpetuates itself with a thin religious veneer?

What The World Sees

There are standards by

which we can find answers to those disturbing questions and we need look no further than Matthew 5. Read this chapter and then ask yourself: what is the picture of disciple of Jesus Christ that is drawn here? Read the Beatitudes and ask yourself whether that is a portrait your community sees in you, your church and Christendom. While Christians haggle over "correct" Christian beliefs, see what Matthew 5 says about discipleship: "Let your light so shine before men that they may see your good works and give glory to your Father who is in heaven" (5:16). The "light" and the "salt" are not so much

distinctive beliefs as they are distinctive acts of love. It's not enough for a disciple to refrain from killing, but also anger and hate. Truthfulness and purity carry the disciple beyond the law and moral codes. Love and magnanimity define "correctness" more than any doctrine or creed.

Is this what my neighbor and my world see in me and my church?

(INDIA & NEPAL, "A Spiritual & Cultural Journey," with Larry Althouse, March 20 to April 10. For information, write New Dimensions Center, 1st U.M. Church, Ross & Harwood Sts., Dallas, TX 75201)

TO PRACTICE FARM POND SAFETY

No doubt most farm ponds have been a very popular place during the past week. Ice skating is a very enjoyable form of winter recreation and most ponds will attract skaters of all ages. Pond owners should be

prepared to rescue anyone who breaks through the ice. In most ponds there is a part that does not freeze as fast and the ice is thinner; this is especially true with spring-fed ponds. Rescue equipment such as a wooden ladder, wooden boards or planks, or an inflated innertube with rope attached should be at the pond. If they are kept in a nearby building, it may take too long to make the rescue. The idea that another person can go

out on the ice and pull the victim from the water by hand is not a good practice; in too many cases both persons will end up in the cold water. Be prepared for farm pond rescues at all times.

TO BE PREPARED WEATHER-WISE

Winter storms continue to kill folks throughout the country. Deaths from automobile accidents, overexertion, falls, and carbon monoxide poisoning often appear in the news media. The first step in preparing

for these severe acts of nature is to be informed by the Weather Service and to become familiar with weather terms. A storm "watch" means that severe weather may be coming into your area. A storm "warning" means that severe weather is headed your way and immediate action should be taken to protect life and property. A "blizzard" is the most severe of all winter weather. This means a considerable accumulation of snow, strong winds, and very cold temperatures. The

objective is to be informed and to be prepared for the worst.

TO CHECK FOR FEED WASTE

Feed grain costs are a big factor in all livestock and poultry operations. In addition, it appears that grain costs may go even higher in the next few years. This means that feed efficiency is very important in making any profit. In this article I'd like to call attention to the feed that is wasted on too many farms. In some cases it is faculty feed bunks and

troughs; in other cases it is the self feeders that are not adjusted properly and too much feed is let down at a time. Operators are urged to inspect their feed bunks and feeders to be sure that all the feed is getting into the birds or the animals; feed is too high priced to have it going any other place. Some automatic feeders that are in outside feedlots allow strong winds to blow the grain away from the feeding bunk; in this case a windbreak may help put the grain where the

Energy saving tips for hog farmers

LANCASTER — Farmers know better than most people how important it is to save energy these days.

They know it takes huge amounts of power to raise the food the expanding world population needs...power for machines power for fer-

tilizers...power for water...power for controlling the environment of animals inside buildings and hundreds of other jobs.

Yet, the word "scarcity" comes up a lot when people talk about supplies of energy

to do all this work. This means available energy must be burned more wisely than before. Success, say scientists, will require precision in the use of energy that has barely been dreamed of in the past.

Raising hogs poses a rough

example of the problems farmers face in growing food.

Charles M. Stanislaw, swine specialist, and L. Bynum Driggers, biological and agricultural engineer, both of North Carolina State

University, tell how to solve some energy problems hog farmers face in a chapter of the 1980 Yearbook of Agriculture, "Cutting Energy Costs", published today by the U.S. Department of Agriculture.

To some, conserving energy on the farm may seem easy.

Simply lower the heat in the pig nursery. Surely that would save energy.

Be careful, caution Stanislaw and Driggers. Drop the temperature too much and the pigs skimp on changing the feed they eat to pork chops and bacon. The animals become chilled and develop diarrhea. They grow less meat. In the end, there's a net loss of energy.

Stanislaw and Driggers show how farmers can save energy by scientifically insulating the walls, ceilings and roofs of hog buildings. Also, they advise, be sure to make the necessary adjustments to allow for the healthy ventilation of gas created by pig wastes.

They say the wide variety of pork-growing equipment requires less energy when correctly used and maintained. Air filters in hot air heating systems should be kept clean and checked daily. This is especially

important in the winter, a time when hog buildings tend to be dusty.

Efficient farmers are picky about animal housing for sound reasons. They've learned that a comfortable hog yields more meat than a hog that doesn't feel well. Hence, prudent use of energy resources and other precise management practices translate into higher profits and more pork per unit of energy burned—a good deal for farmers and consumers alike.

When pigs are uncomfortable, they let you know it.

Let their housing get too cool and they'll pile up against each other or bunch up at the heat source to keep warm. They also may stay along the wall of a pen to avoid cold drafts. Comfortable pigs spread out uniformly.

To get a copy of the 1980 Yearbook, send a check or money order for \$9.50 to Superintendent of Documents, Washington, D.C. 20402, or at a U.S. Government book store in some cities. Members of Congress have limited allotments of copies for free distribution to constituents. USDA has no copies for distribution to the public.

Angus foundation to support youth, education and research

ST. JOSEPH, Mo. — A non-profit foundation to receive and administer tax deductible contributions for scientific research and education has been formed by the American Angus Association, reports C.K. Allen, executive vice-president.

The first contribution to the fund will be some \$5000 received by the Association from the sale of a registered

Angus heifer at the 1980 National Western Stock Show. That heifer was donated by A.F. Flint and Sons, Bard, New Mexico, and purchased by Jim Baldrige, North Platte, Nebraska, to provide initial funds for the National Junior Angus Association.

The second contribution will come from the sale of another heifer at the 1981

National Western Stock Show. The heifer is Band 053 of Ideal 3163 174, donated by the Martin Jorgensen Family of Ideal, South Dakota. The Jorgensen heifer will sell at 1:30 p.m., Wednesday, January 21, just prior to the National Western Angus Bull Sale

Tax deductible donations to the fund may be made by any individual or

organization by sending a check, made out to the Angus Foundation, to the American Angus Association.

Individuals who want to make a bequest to support Junior Angus work, the National Junior Angus Association, or research for the scientific improvement of Angus should specify in their will that the money is to go to the Angus Foundation.

The Angus Foundation's charter has been approved by the Internal Revenue Service.

The Foundation will be administered by a board made up of Association officers and members of the board of directors, and the executive vice-president of the Association.

Omelet King to promote eggs on TV

LITITZ — Howard Helmer, the American Egg Board Omelet King, is scheduled to receive prime-time television coverage in 91 major cities during spot-TV ratings weeks between February 4 and March 3.

PM Magazine will television a special filmed interview featuring Helmer's zany omelet-making antics and show a newscast of Disneyland's American Egg House where he accomplished his Guinness Book of World Records feat of making 217 two-egg omelets in 30 minutes.

The American Egg Board sponsored Helmer's appearance before the Newswomen's Club of New York City where the PM feature also shows the newswomen making their own omelet lunches under his tutelage.

PM Magazine is a syndicated magazine-of-the-air show for general interest audience appeal. Readers

should check their local TV guides during the ratings weeks for the listing of this show and the specific time and date for broadcast, which will vary in each city.

The eight-minute segment is humorous and lighthearted, and projects a strong, positive message about nutritious eggs in the diet. Helmer is depicted during a typical omelet workshop, which includes

blending an Instant Egg Pickup.

On closeup interview, Helmer talks about how he developed his nationally famous omelet workshop techniques that are not only pure showmanship but also highly educational.

The newswomen, for instance, are seen making omelets and commenting in startled, amazed voices about their success and perfection on the first try.

Greenhouse blankets cut fuel bills in half

Using research findings some growers are chopping fuel bills one-half, report scientists involved in the trials at Penn State.

At the firm of J. L. Dillon, Inc., Bloomsburg, thermal blankets are pulled over beds of growing plants to exclude chilly night temperatures. Blankets are removed the next day to expose plants to warm sun. The firm chopped heat bills by \$20,000 in one year.

Greenhouses used in conservation research can be inspected during the activities of Agricultural Progress Days, Tuesday through Thursday, nine miles west of State College on Route 45. The exhibits will be open from 9 a.m. to 5 p.m. each day.

University tests at Penn State, Cornell, and Rutgers produced savings up to 60 percent when thermal blankets were used. Material and installation expenses can be recovered in one to three years.

Most greenhouse operators experience

similar savings, but no single technique fits every situation, caution researchers John White, professor of floriculture at Penn State; and Robert A. Aldrich, now professor and head of agricultural engineering at the University of Connecticut. They estimate 20,000 acres are under glass in the United States.

Experimental and field applications demonstrate that operators in colder climates must innovate and make conservation decisions on a case-by-case basis, White reports.

The greenhouse of John Lochner of Kirkwood, Mo., is one such situation. After Lochner covered his 30-by-100 foot quonset style structure with double polyethylene and installed thermal blankets, one 300,000 BTU heater provide sufficient for the house.

Researchers help operators find other ways to cope effectively with fuel costs.

Without conservation measures, a Bethlehem

greenhouse enclosing 19,200 square feet needs 43,000 gallons of No. 2 fuel oil to heat the structure built with single-layer lapped glass. Penn State research found that covering the glass with air-inflated double polyethylene cuts oil to 29,000 gallons. Adding thermal blankets increases insulation value and pares fuel to 12,000 gallons.

Now on the market are practical exterior covers, thermal blankets for interior spaces, sidewall insulation,

infrared heaters, and solar and associated storage systems.

But, White indicates, some unproven techniques are on the horizon. One is soil heating in combination with blankets for individual beds of a greenhouse. "They look promising," he says, "so why heat the entire house?" Another is power-plant waste heat as a potential method of heating greenhouses.

White and Aldrich have written a manual entitled

"Greenhouse Energy Conservation". The manual is published by Penn State in easy-to-read non-technical language, with 27 illustrations.

Each section includes thorough discussions of payback times, expected fuel savings, energy efficiencies, and other economic data. Growers report their experiences, describe potential problems, and suggest solutions. Commercial products and suppliers are listed. Sections

are included on cold-tolerant crops, cultural conservation methods, boosting efficiency of present equipment and operation, and tips for hobby operators with greenhouses attached to homes.

"Greenhouse Energy Conservation" is \$2.50 per manual, postage paid; rates for bulk orders are available upon request. Order from Industrial Research and Innovation, 225 Pond Laboratory, Dept. AG, University Park, PA 16802.

Grain market outlook firm despite current weakness

LANCASTER — Grain market prices are currently under downward pressure because of high interest rates and the tense situation in Eastern Europe.

However, declining supplies of grains and

oilseeds, coupled with strong demand, provide a relatively firm base for stronger grain prices.

In early December, year end world stocks of grain for 1980/81 were estimated at 152 million metric tons —

little changed from the November estimate but 20 percent below the 191 mmt carried over in 1980.

This will be a record single-year decline in world carryover grain stocks.

Total production is expected to remain near the 1979-80 output, but consumption is trending upward. Stocks will show the greatest decline in the United States because 1980 coarse grain crops were sharply reduced and use is up in response to strong demand.

World consumption of wheat and coarse grains in 1981 is expected to exceed production by nine and 32 mmt, respectively.

Consequently, yearned stocks of wheat in 1981 will be reduced to 70.4 mmt; this would be the lowest level since 1976 and represents a lower stocks-to-use ratio than during the tight supply situation of the mid-1970's. Year end stocks of coarse grains are projected to be lower than in the mid-1970's both in absolute terms and in the stocks-to-use ratio, with the U.S. situation particularly tight.

U.S. livestock prices will also increase next year, particularly in the second

quarter. Lower pork production will be the major factor underlying the upward price pressure, but declining beef production will reinforce the situation in the spring.

In 1981, prices will rise for most farm inputs, with energy prices increasing the most. On a per-acre basis, crop production costs may average 10 to 13 percent higher than in 1980. However, if crop yields return to more normal levels next year, increases in per-unit costs will be much less.

Net farm income (in current dollars) will improve in 1981, perhaps regaining all the loss of 1980. Sharply higher prices for most farm commodities will be instrumental in raising cash receipts.

If growing conditions are more normal next year, increased farm inventories would add to net farm income, and higher yields would partly offset the impact of rising input prices.

Retail food prices are expected to rise 10 to 15 percent in 1981, led by meat, poultry, and eggs. The farm value component will account for more of the increase in retail prices than it did in 1980.

Stud sells 60 young sires

ELBURN, Ill. — Curtiss Breeding Industries has sold sixty of its surplus young sires to Select Sires, Inc. and Midwest Breeders Cooperative, the company announced recently.

Many of the young bulls are sons or grandsons of Pawnee Farm Arlinda Chief, Milu Betty Ivanhoe Chief and Paclamar Astronaut, according to Karen Drier,

Director of Communications.

The sale was part of a program to provide a better balance of genetic material among the Curtiss young sires-in-waiting, she said.

Curtiss, an innovative leader in improving both dairy and beef cattle through artificial insemination since 1949, is headquartered near Elburn, Illinois.

The Vicon KM-240 cuts and conditions the tallest, tangled, wettest, heaviest, hay. This new mower-conditioner eliminates a pick-up reel, so you can put up more hay — FASTER. With a working width of 7'10", it can mow twice as much area in a day as most competitive models. Most competitors use a pick-up reel, which limits ground speed, adds maintenance problems and allows leaf loss.

The Vicon six-disc cutter bar feeds your crop directly, stem first, into rubber rollers that

condition green hay or wet grass. It dries faster and bales easier, saving time and labor.

The KM-240 has no chains, no belts, no sickle bar. If you need only a mower, look at the Vicon CM-165 (4 discs — 5½' working width) or the CM-240 (6 discs — 7'10" working width). Both make clean cuts in heavy grass or tangled crops.

Ask your dealer to show you the Vicon KM-240 mower-conditioner. Cut your hay-making down to size with VICON — the top cat in mower-conditioners.

Grangers to kick off new insurance program

HARRISBURG — Kick-off ceremonies for the Pennsylvania Grange Insurance Agency will be held Sunday, January 11, at the Farm Show Complex, with State Master Charles E. Wismer, and Agriculture Secretary Penrose Hallowell, heading the ceremonies' program.

"This effort marks the first major effort for the Grange in providing expanded membership services to rural Pennsylvanians," notes Grange Administrator, Hal Mowery. "We are targeting our program to the needs of rural Pennsylvanians."

A wide range of new coverage such as farm and homeowner's property and casualty, including worker's compensation for both farm and non-farm businesses, excess major medical, accidental death and dismemberment, Medicare complement, and computerized estate planning will be immediately available to Grange members.

"There is no farm operation too large or too small," Mowery says. Both the farm and non-farm versions of property and casualty insurance include "extensive" liability coverage.

The accidental death coverage will go to \$100,000, and "will cover all accidental death, regardless of how they occur," Mowery says. "This coverage is for both farm and non-farm members."

Our excess major medical policy will provide members the opportunity to raise the limits on their hospital plans with deductibles of twenty and twenty-five thousand dollars, up to a maximum of half a million dollars."

Of special interest to Medicare subscribers is the Grange's Medicare complement. "We will feature a wrap-around Medicare program that pays what Medicare does not pay, with

a lifetime maximum of \$1 million." This policy also covers 80 percent of all out of hospital drug prescriptions, with a \$100 annual deductible.

Further, it will cover an additional 100 days of skilled nursing home care "over and above Medicare coverage."

"In keeping with the Grange's farm preservation policies, we are offering a computerized estate planning service to Grange members," Mowery points

BY SHEILA MILLER
LEBANON — Lebanon Valley National Bank made a landmark decision just in time for New Year's Day. The board of directors voted unanimously to freeze their prime interest rate at 18 percent.

According to Mike Firestine, assistant vice-president and ag lending officer, LVNB reduced their

out "Our service will allow members to quickly determine the extent of their tax liability, particularly those who want to keep the farm in their family."

interest rate from 20½ percent to 18 percent even though the national prime rate remains at 20½ percent.

"Several weeks ago, I spoke with the bank's president, Al Murry. I explained to him how farmer's can't afford to pay 20½ percent prime rate," said Firestine.

"He told me to suggest a ceiling. And I suggested we tie it in with the personal prime rate and try to keep the ceiling somewhere around 17 percent."

"When I addressed the

lending committee, we had come up with a suggested ceiling of 18 percent. After the committee's approval, Al Murry took it before the eighteen member board (three members represent the ag community) — and the board approved it unanimously for ag loans."

Firestine explained the board decided on New Year's Eve that if they could create an 18 percent ceiling for farm loans, they could do it for all business loans.

"They recognized times are tough for all businesses

Our bank is trying to help — perhaps we'll be starting a trend."

This new policy could possibly affect close to 300 farmers, Firestine added. He noted the 18 percent interest rate can only vary one percent above or below that rate based on the borrower's deposit ratio.

Lebanon Valley National Bank is the largest independently owned bank in Lebanon County, with seven offices. They also have offices in Berks and Schuylkill Counties.

Hog and pig numbers jump 13 percent

HARRISBURG — Pennsylvania's hog and pig inventory totaled 980,000 on December 1, according to the Pennsylvania Crop Reporting Service.

This inventory was up 13 percent from December 1, 1979 and seven percent from June 1, 1980.

Breeding stock, at 123,000, was up three percent from last year. Market hogs, at 857,000, were up 14 percent. The fall (June - December 1980) pig crop of 629,000 pigs was up 18 percent from last year's 533,000. There were 85,000 sows farrowed with an average of 7.4 pigs per litter.

Keystone farmers intend to farrow 92,000 sows during the spring of 1981. The number of farm operations

having one or more pigs on hand during 1980 was 20,000.

The national inventory of hogs and pigs was estimated at 645 million head on December 1, four percent below last year but seven percent above 1978. Breeding inventory, at 916 million head, was five percent less than both 1979 and 1978.

Market hog inventory at 554 million head was four percent below 1979 but nine percent greater than 1978.

United States hog producers intend to farrow 678 million sows during the December 1980-May 1981 period, a decrease of six percent from the same period last year and 1978.

Clinton Co. beef producer named Master Farmer

MILL HALL — A Clinton County beef cattle producer, who combines business expertise with management efficiency in operating one of the state's more successful farming enterprises, has been named a Master Farmer for 1980.

Ralph E. Dotterer, of R2, Mill Hall, senior partner in a 1500-head feeder cattle operation, will receive the coveted award January 13 during ceremonies in Harrisburg.

Dotterer also will be inducted into the Pennsylvania Master Farmers' Association whose membership consists of all former award winners. The program was established in 1927.

"We originally combined a beef operation with a herd of 80 dairy cows," says the new Master Farmer. In 1976 we decided to sell the milk cows because the two sons, Charles and Ralph, Jr., were

more interested in raising beef cattle."

With 1500 feeder cattle to be sold during the year, there is need for a steady marketing outlet. A slaughter plant in Lock Haven buys about half the Dotterer feeder steers. Other animals are trucked to the Lancaster stockyards.

"We also sell some cattle directly to packers. And others are sold through the Pennsylvania Farmers' Association on a dressed basis," he adds.

In just four years as a full time cattle feeder, Dotterer has developed a reputation as an innovator. One of the first tasks was remodeling the dairy barn to make it a useful part of the beef operation.

He took out free stalls and graded floors so animal wastes can be conveniently scraped to gutters for deposit in a storage pit. Feed

(Turn to Page A16)

Ralph E. Dotterer, R2 Mill Hall, has developed a reputation as an innovator. He has successfully remodeled a dairy operation to a modern beef

feeding facility. He has been named Master Farmer for 1980.

State lamb crop percentage continues to drop

COCHRANVILLE — It will be lambing time soon for Pennsylvania's sheep producers. For most it means cold nights in the barn and sometimes extraordinary efforts to save the lives of newborn lambs. With the birth of the new crop comes the expectation of profits for the year to come.

Unfortunately the income picture for Pennsylvania's sheep farmers is bleak unless a dramatic improvement occurs in the lamb crop.

Since 1974 the number of lambs born alive and saved per ewe has steadily declined in Pennsylvania according to the Pennsylvania Crop Reporting Service. The 1974 lamb crop

was 107 percent. In each successive year it has declined by one percent, dropping to 102 percent in 1979. Figures for 1980 will be released in January.

Actually the 1974 crop of 107 percent was a ten year high with lamb crops between 1970 and 1973 vacillating between 98 percent and 103 percent.

For the sheep flock to be profitable, lamb crops of 150 percent to 175 percent are necessary.

In a recent study done at Purdue University, David C. Petritz reported that a sheep farmer with a 100 ewe flock and a lamb crop of 100 percent would show a loss of \$1648 per year if he marketed his lambs at \$65 per cwt.

With a 150 percent lamb crop he would make a profit of \$9.50.

At 175 percent his profit would increase to \$838.25 and reach \$1667 with a 200 percent lamb crop.

Ewes have the potential to produce lamb crops approaching 200 percent, however neo-natal losses and infertility of the ewe cause devastating losses to the producer. Occasionally infertility affects as many as 20 percent of the ewes in the flock.

There is no accurate report on infertility in Pennsylvania's flocks, but W. Duane Mickelsen found sheep producers in Washington State were accustomed to an annual loss from infertility of five

percent to 20 percent.

Observations of some flocks in Pennsylvania indicate that infertility varies greatly from year to year, with an individual flock occasionally having as few as 3 percent barren ewes and as high as 20 percent in another year.

Many Pennsylvania sheep producers would like to have the School of Veterinary Medicine of the University of Pennsylvania study this problem. They hope the school will someday soon have an ovine specialist to concentrate on sheep health problems, but Dr. Robert Marshak, Dean of the Veterinary School, says there are no funds available to aid the sheep industry.

While reproductive science in other livestock species has grown technologically to include artificial insemination and embryo transplants, the sheep industry is left groping in the dark ages of reproductive science.

Neither AI nor embryo transplants have been perfected for sheep in this country. Nor has any degree of sophistication in diagnosing reproductive track illnesses in the ovine species been developed.

Essential to successful clinical diagnosis of animal reproductive problems is the ability of the practitioner to diagnose pregnancy. Two methods are commonly used for early pregnancy detection in sheep, the rod

method and the ultra-sonic device.

The rod costs less than two dollars but takes considerable skill and practice to use accurately plus extensive labor.

The sonic detectors range in price from \$250 to \$1000. With the ultra-sonic instrument, the sheep does not have to be upended or cradled as with the rod. When the sonic probe is placed in the correct position a red light flashes if the ewe is open, a green light if she is pregnant.

Pennsylvania's only veterinary school has a large department of reproductive medicine. Only a few of its faculty have made an effort to learn pregnancy diagnosis with the rod. Requests to purchase a sonic device have been denied. Yet it seems logical to sheep producers that every veterinarian who will be going out into the field to practice large animal medicine should be skilled in ovine pregnancy detection.

Good management in the lambing barn can help increase the lamb crop, and Clair Engle of Penn State's Extension Service has been doing yeoman service in teaching management skills to Pennsylvania's sheep producers.

However, even in the best managed flocks reproductive problems and infertility abound. For more information on the efforts of sheep

producers to improve ovine medicine services in Pennsylvania, contact Annette Menhennett, RD #1, Cochranville, Pa. 19330, telephone 215/593-5726.

Clinton Co. beef

(Continued from Page A15)

bunks were kept intact to final finish cattle before sending them to market.

Last fall the Master Farmer built another barn which has features to cut down on labor, including improved ventilation and more slope to the floors. A manure pit, located near the two barns, holds over a million gallons.

"It would not be a big task to pipe animal wastes into a digester for a methane generator but I can't see any financial advantages to generating my own electricity at this time," Dotterer notes.

The Master Farmer was a pioneer with his feeding program as well as barn design. His farm was the first in the country to use cold-flow anhydrous ammonia in feed to increase protein content.

The ammonia gas passes through a jet and, when lowered to minus 28 degrees Fahrenheit, is liquid. The Penn State College of Agriculture used his farm to test this feeding program and he has been using it since on corn silage and high moisture corn.

Dotterer feeds alfalfa silage at 60 percent moisture

in addition to high moisture ear corn. All feed is stored in trenches. He uses an industrial loader to remove the silage from the trench and place it in feed bunks.

Always conscious of energy, the beef cattleman planted 800 acres of corn by the no-till method this past year. He also plants 300 acres of corn for silage and another 300 acres for high moisture corn. Still another 200 acres of corn are sold as a cash crop.

"I grow 150 acres of alfalfa and have 130 acres of pasture. Most of the alfalfa goes into haylage but I do bale some hay to feed the new cattle," he emphasizes.

Dotterer was credited with over seven tons of alfalfa per acre in 1978 and 1979 while winning awards in the Pennsylvania Alfalfa Growers Program.

Recognizing the advantages of hybrid vigor, the Clinton County farmer prefers to buy crossbred cattle. He likes crosses with Angus, Charolais, Simmental, or Limousin beef breeds. The demand now is for larger crosses, he notes.

The Dotterer farm dates back to 1825 and the Master Farmer is the sixth generation to operate it.

"My sons will stay here, too," he says.

Charles graduated from Gettysburg College and is a partner in the operation. Ralph, Jr., has built a new house on the farm and shares in the management.

Ralph, Sr., a Penn State graduate, and Mrs. Dotterer, a home economics teacher, have hosted foreign exchange students and have visited exchange student families abroad.

In addition to spending full time operation the beef cattle farm, the Master Farmer is active in his church and community.

Currently he is president of the Pennsylvania Beef Council and has held offices in the Pennsylvania Cattlemen's Association and Clinton County Farmers' Association. The 1979 Pennsylvania Cattlemen's Field Day was held on the Dotterer farm.

He also is a two-time winner of the Outstanding Grassland Farmer Award presented by the Pennsylvania Forage and Grassland Council.

Dotterer is a member of the United Church of Christ and belongs to various Masonic groups and Kiwanis.

Increased farm exports benefit U.S. consumers

WASHINGTON, D.C. — "Efforts to expand U.S. food production in 1981 to meet rising world food needs will not only benefit the agricultural economy — but the consumer too."

This is one of the major conclusions drawn from a new report released today by the Agriculture Council of America entitled "Clear Signals for Full Production: The Benefit for Farmers and Consumers."

ACA, an industry-wide communications link to the non-farm public, is coordinating the U.S. Export Education Project to develop a unified plan to build a stronger U.S. economy through increased farm exports in the 1980's.

"All the data so far indicates the U.S. farmers already are responding to positive signals in the marketplace, and there is an excellent chance that we will have bumper crops in 1981," declared ACA Director Paul Mullinix, a Vice President of Southern States Cooperative based in Richmond, Virginia.

The report reflects broad-based input from the major grower organizations, grain cooperatives and grain companies and leading agribusiness firms.

"We recognize the growing concern about the impact of increased farm exports on food prices," said Mullinix. "That's why we are emphasizing that if the

market is left free to operate, rising world food needs will create a powerful incentive — an opportunity to earn a reasonable profit.

"Given this incentive, farmers will plant fence row to fence row — doing everything possible to increase production capacity. And this is positive news for both U.S. consumers and our customers around the world."

U.S. farm exports, totaling \$40 billion in 1980, are by far the leading positive factor in the nation's balance of trade. They are projected to reach \$48 billion in 1981 which would result in a record breaking \$30 billion trade surplus for U.S. agriculture.

"Purchasing groceries on

almost a daily basis and always in cash, it's very easy to lose perspective," Mullinix continued. "Sure food prices have gone up — but not as fast as the overall inflation rate — and considerably less than other major necessities."

Mullinix cited the following "if/then" computations to show the value of food products compared to important non-food items:

If red meat prices had increased at the same rate as energy prices over the past 20 years, then round steak would now cost \$4.04 per pound, and pork chops would cost \$3.24 per pound.

If egg prices had gone up at the same rate as medical costs over the past 20 years,

then large eggs would be selling for \$1.77 per dozen.

If poultry prices had gone up at the same rate as housing costs over the past 20 years, then frying chicken would cost \$1.15 per pound.

"When you get down to the bottom line: despite record levels of farm exports in 1979 and 1980, food prices are still running two to three percent below the general rate of inflation," Mullinix added.

The ACA report cautioned that direct government intervention in the market — such as a grain embargo or mandatory price controls — should be avoided at all costs, short of the most serious national security considerations.

"Such government actions may appear to some to offer a 'quick fix'. But in fact they merely add to the problem, since they reduce the incentive to expand production."

"Let's keep in mind how increased farm exports strengthen the U.S. economy," Mullinix emphasized. "In 1980 they generated \$82 billion in domestic economic activity — providing employment for 1.13 million workers — some 630,000 in the non-farm sector."

Another conclusion of the report summarized the critical dependence of foreign nations on U.S. exports to meet world food needs. Today, American farmers produce nearly 60 percent of all the grain that enters world trade. Production from one-third of U.S. cropland (over 110 million harvested acres) — is exported.

"No other country comes close to America's ability to meet future world demand

for food and feed grains and oilseeds," concluded Mullinix. "The long-run effect on American consumers of meeting this challenge is definitely beneficial. Because steady export market growth means greater efficiency and a larger volume of food production. It will provide us with the foreign exchange needed to buy a larger quantity and wider selection of imported necessities."

A Blue Ribbon Committee — 35 leaders representing every major segment of U.S. agriculture — is overseeing the development of a "Blueprint for Export Expansion" that includes specific recommendations for maximum feasible expansion of U.S. farm exports between now and 1990.

The first draft of the plan is being distributed extensively by Members of Congress to prominent constituents who are responding individually to tentative recommendations.

All responses to the first draft plan will be considered in a second draft to be presented at a National Conference on Farm Export Strategies for the Eighties scheduled for February 9-11, 1981 in Washington, D.C.

Following the conference, important features of the plan will be presented in a nationwide public education program. Efforts will focus on reaching audiences in major urban centers across the country.

Anyone interested in receiving more information on the project, should write: U.S. Farm Export Education Project, P.O. Box 23421, Washington, D.C. 20024.

Mother, son team earn Master Farmer titles

BLAIN — A Perry County mother and son, who for years have been operating one of the most efficient farming operations in the state, have been named Master Farmers for 1980.

Mary and Nevin Rice, of R1, Blain, will receive the coveted award next month and will be inducted into the Pennsylvania Master Farmers' Association whose membership consists of all former award winners since the program was established in 1927.

The Rices combine a dairy and steer feeding operation on their 325-acre farm. Their 78-cow registered Holstein herd is a state leader in production with an average of 17,500 pounds of milk and 713 pounds of butterfat.

Another income producer is steer raising. The steers are housed with the heifers until they weigh 600 pounds, then are separated and fed to market weight using high moisture corn. They weigh about 1100 pounds at 15 to 18 months and often top the Carlisle market.

Crops to feed all cattle include 124 acres of corn, 77 acres of alfalfa, 32 acres of wheat, 20 acres of oats, and 15 acres of soybeans. All crops are highly productive, especially those in irrigated areas.

Mary Rice, considered the "cow lady," started the current 78-cow milking herd with 12 cow purchased at her father's sale in 1938. At 70, she is the first to reach the barn each morning to start the milking chores. She and Kenneth, a bachelor brother, milk the cows.

Nevin feeds the 200 cows, young cattle, and dairy steers. His wife, Ann, looks after the calves. But all four may be milking before they finish chores and go to breakfast.

Also helping are Nevin and Ann's two children, George, 18, and Beth Ann, 14. George is full time and concentrates on field and machinery work. Beth fits chores around school activities.

"My family always came first," Mary says. "When my mother died in 1927, I left school at 16 to help my

father. My duties included working in the fields with horses and mules. I did everything but plow."

After she married George Rice, the young couple farmed for her father until they purchased the farm in 1945. Early advocates of artificial breeding, the Rices improved the original herd without purchasing outside cows.

Today the herd is enrolled in a herd analysis program and cows are classified on disposition, milkout, stature, strength, and conformation.

Mary became the sole proprietor of Blain-View Farm in 1957 when her husband died. Nevin was in high school and with assistance from relatives, she maintained the operation until he finished school and helped to take over management of the farm.

With Nevin and Mary combining their interests, cow numbers more than doubled and another farm was purchased. An irrigation system was developed in the 1960's. Two new silos were constructed to store forages.

"The cows receive a haylage-corn silage mixture in the feed bunk and a ration of alfalfa and grass hay is fed at noon and nights during the winter," Nevin notes. "The grain ration is computerized with shelled corn making up two-thirds of the mixture."

Home-cooked soybeans, oats, linseed oil, and such essentials as dicalcium phosphate, molasses, limestone, salt, yeast, vitamins, and selenium also are added to the concentrate mixture for the milking cows. Dry cows, heifers, and steers receive different rations.

The land is worked carefully. Soybeans have been double-cropped with barley since 1972. Oats and corn are planted by the no-till method.

Irrigation water is drawn from a one-acre, spring-fed pond. And the increases in yield made the labor of moving the pipe very beneficial, the Master

Mary and Nevin Rice, R1 Blain, have combined their skills and energies into one of the state's top dairy and steer feeding operations. Both mother

and son have been selected as 1980 master Farmers.

Farmer adds Corn averaged 150 bushels per acre on irrigated land and 80 on land beyond reach of the pipes during periods of low rainfall.

Outside activities are a big advocacy on the Rice farm. Mary is a member of the state and national Holstein associations and Blain Zion Lutheran Church where she was secretary, treasurer, and vice president of various church groups. She's a long-time member of the church choir and Blain Volunteer Fire Company Auxiliary.

Nevin, 39, has been president and treasurer of the Perry County Extension Executive Committee, chairman of Agway's Store and Petroleum Committee, and member of the Pennsylvania Farmers' Association. Farm Management and Business Analysis Service Committee. He also has been director of the county DHIA and Northeastern Breeders Association.

Nevin served as township

auditor and is currently township supervisor. He is a member of the Lutheran

Church and served two terms on the church council. He has shown his skills by

winning the county plowing contest three times and

E. Wayne Beshore wins Master Farmer award

E. Wayne Beshore of New Cumberland, York County attributes the dramatic production improvement in his dairy herd to high quality feeds.

The second generation dairyman has been recognized as Master Farmer for 1980.

NEW CUMBERLAND — E. Wayne Beshore, of 389 Old York Road, New Cumberland, has proven you don't need hundreds of cows and thousands of acres of cropland to be successful in farming.

With 43 registered Holstein milk cows producing an average of 20,000 pounds of milk each year and 160 acres of highly productive crops to feed these cows, Beshore's farm income shows that bigger is not necessarily better.

For his business expertise and management efficiency, he has been named a Master Farmer for 1980.

Beshore will be inducted into the Pennsylvania Master Farmers' Association whose membership consists of all former award winners. The program was established in 1927.

The new Master Farmer is the second generation to farm this well-kept enterprise surrounded by urban sprawl. After a stint in India during World War II, he returned in 1946. Following his marriage to former Athena Hays, he farmed in partnership with his father.

"I didn't think about having my milk production tested until 1949. It was a disappointing 7160 pounds of milk and 252 pounds of butterfat per cow," Beshore notes.

The next 13 years saw a dramatic improvement, to a herd average of 12,400 pounds of milk and 503 pounds of butterfat with 39 cows on test. In 1962 he purchased the farm from his father.

Further impressive gains in milk production came in the ensuing years, with the herd average now near the 20,000 pounds of milk mark.

In 1977, son, Jed, joined as a partner after graduating from Delaware Valley College of Science and Agriculture.

"High quality feed is

necessary to produce top milk yields," the Master Farmer emphasizes. "We grow most of our grain and forage on the 160 acres of cropland. This includes 80 acres of corn, 55 of alfalfa, and 25 of wheat."

His alfalfa-grass mixtures have earned him a Grasslander of the Year Award presented by the Pennsylvania Forage and Grassland Council.

All forage is sent for analysis testing each year. The herd is fed 12 to 15 pounds of alfalfa-grass each day. The concentrate includes ear corn and soybean meal at the rate of 35 pounds for each cow. In addition, the cows receive 35 pounds of corn silage daily.

"We plant ear corn in 36-inch rows, with seven inches between plants. The crop is conventionally planted, harrowed, and disked," Beshore notes.

The Beshores found that their scenically rolling acres had a habit of losing its top soil. So, in the early 1950's, he started a variegated strip cropping program with alfalfa or small grains in between the corn.

He also reclaimed 15 to 20 acres of wet ground with drainage tile. The wet ground came from three or four springs on the farm.

The Master Farmer's embryo transfer program is one of the newer and more exciting developments on the farm.

"It's a fast way to improve production and general body conformation," he says. "It also increases the number of offspring from one female."

The embryos are sold and placed in the recipient cow the same day. Beshore has sold animals to farmers in Brazil, Italy, and Hungary. When selecting cows for possible use in superovulation and embryo transplants, he looks for exceptional milk production and excellent body type.

Like most farmers, the (Turn to Page A20)

PERFORMANCE CONTROL THROUGH...

Uptime Service™

What is UPTIME SERVICE?

- A new economical method of performance control
- Equipment service assuring an absolute minimum of downtime
- A proven method of assuring profitable farm operation
- An exclusive International Harvester Service

Here's how we do it...

How we perform UPTIME SERVICE...

- We'll inspect your equipment thoroughly
- We'll repair any parts or components needing repair
- We'll replace those parts likely to fail during the coming season
- We'll lubricate your equipment and make all needed adjustments for top operating efficiency

How you'll benefit...

- You'll have every possible chance of full-capacity performance all season long
- We'll do all the work needed to give you peak operating efficiency without performing unnecessary repairs or replacements
- You'll have all the benefits of a complete annual checkup at a fair, reasonable cost and could profit immeasurably by avoiding downtime at a critical phase of your operations

UPTIME SERVICE at your International Harvester dealership . . . your best defense against downtime . . . your key to effective equipment management.

State vegetable growers to meet in February

HERSHEY — The Pennsylvania Vegetable Growers Annual Conference and Trade Show, scheduled to be held at the Hershey Motor Lodge on February 3 to 5,

E. Wayne Beshore

(Continued from Page A19)

York County dairyman isn't willing to take all the credit for his success. Mrs.

Beshore helps with the books and takes care of the calves. Their four children, Jed,

Marvin, Joy and Kirby, also have given considerable assistance.

U.S. Secretary of Agriculture Bob Bergland visited Central Pennsylvania in April, stopping off at the farm of York County dairyman E. Wayne Beshore, left.

will feature research results in vegetable production plus an exhibit by more than 100 suppliers and manufacturers to the vegetable, fruit and small fruit growers in Pennsylvania, according to an announcement by Burton Hetherington, Conference Chairman of Berwick.

The conference/exhibit is an annual affair co-sponsored by the Vegetable Growers of Pennsylvania, the State Horticultural Association, the Pennsylvania Grape and Wine Producers and the Pennsylvania Food Processors Association in cooperation with the extension and research divisions of Penn State's College of Agriculture.

Topics to be discussed during the three day program include: vegetable varieties, tomato production and marketing, research and control of speck and blight, transplanters, land use, mechanical harvesting, pest management including bird and deer control, herbicides, hydroponics, lime recommendations, vegetable production efficiency, post harvest control, irrigation, fluid seeding, strawberry blueberry and other small fruit production.

Among the various specific varieties of vegetable and small fruit on which research has been completed and will be discussed are: tomatoes, grapes, corn, beans, peas, muskmelon; cabbage, strawberries, brambles, blueberries, eggplants, pumpkins, winter squash and celery.

Rudy Grob, Millersville, Chairman of Social Activities, said, "In addition to the business meetings and exhibits, several socials will be held including two dinners on February 3 and 4, and a Tomato luncheon on February 3.

Charles Wismer, Pennsylvania Grange Master will address the group on February 4, at the annual banquet, a highlight of the get-together of state growers

Warren Thompson, Clarks Summit, President of the Pennsylvania Vegetable Growers Association, said that the conference is open to anyone interested in the growing of vegetables in Pennsylvania.

He said it would be one of the most interesting conferences presented giving up to date and complete information on new production techniques in agriculture.

Registration and pre-registration information may be obtained by contacting PVGA Executive Director, Bill Christian, Box 28, Dalton, PA 18414 or by calling 717-563-2690.

Participation in the conference qualifies Pennsylvania Certified Pesticide Applicators to receive a "Pesticide Applicator Update Training Certificate"

chased my share in cattle and equipment," the Lancaster County dairyman notes.

Being a lease farmer hasn't stopped him from genetically improving his herd. He purchased several "fancy" cows in the last three years and had 70 embryo transfer calves on the farm. His bulls are sold for breeding and the embryo transfer heifers are added to the dairy herd.

"We're investing money in cows. Barns and silos don't reproduce. We built the facilities first, now we're working to improve the animals that use them," Crouse emphasizes.

In 1978 he purchased "Windy Mont Matt Kathy" for \$15,000. The investment proved to be a good one. "I've sold two calves out of Kathy for \$8000 each when just four months old. They paid for her, you might say," he says.

This cow has 10 offspring by embryo transfer due in February. She was the third cow of the Holstein breed to produce 1000 pounds of butterfat and 23,000 pounds of milk at two, three and four years old. There are 31 offspring from the cow and

Crouse has sold four of her bull calves for stud prices.

Encouraged by the profitability of that "fancy" cow, the Master Farmer purchased others.

"It isn't any more work to have good cows — so why not have good offspring to sell?" he asks.

For the embryo transfer program, Crouse deals with a firm that supplies the host heifer and does all technical work involved. He estimates total costs at \$1900 for each live calf.

With 310 acres of land, the Lancaster County dairyman is kept busy, as are sons, Philip, 21, and Neal, 18. Philip manages the dairy herd and much of the AI work. Neal, just graduated from high school, has the prime responsibility for feeding the dry cows and young animals.

Carolyn Crouse, Galen's wife, is in charge of feeding the calves, serves as a relief milker, and does all of the bookkeeping.

All of the crops are produced to feed the dairy animals. In most years, yields include 6 tons of alfalfa per acre, 4 tons of mixed grass hay, 104 bushels of shelled corn, 20 tons of silage, and 30 tons of sudan-

sorghum forage.

The family is active in their community, but they don't neglect the farm. The secret of community in-

volvement without work interference is to say no, Crouse says.

Despite limiting outside activities, the Master

Farmer has been involved with the state and county Holstein Associations, Dairy Shrine Club, and Pennsylvania Farmers'

Association.

He has been a member of the Shoeneck Volunteer Fire Department for 34 years and

(Turn to Page A23)

These four ET heifers out of Crouse's five-year-old Windy Mont-Matt Kathy are joining Crouse's top-notch herd. Their mother's production records have been in the 22,000 to 24,000 pound range,

earning her an EX-90 rating. The limestone quarries are background for these fine black and whites.

FmHA raises interest rates

WASHINGTON, D.C. — The U.S. Department of Agriculture's Farmers Home Administration raised its basic interest rates to 13 percent on December 20, FmHA Administrator Gordon Cavanaugh said last Monday.

Because of the higher costs in borrowing from the U.S. Treasury, FmHA raised interest rates to 13 percent on

—low to moderate income rural housing loans,

—farm operating loans (including economic emergency loans for operating purposes) and

—disaster emergency loans for annual production or operating purposes above actual losses.

Cavanaugh said the increase in housing interest rates applies only to non-subsidized FmHA housing loans.

"Home loans will still be available at rates as low as one percent for low-income families under the 'interest credit' provision of the national housing act," he said.

According to Cavanaugh the agency's interest rates are now set at 12.25 percent for most long term farm loans, including farm ownership, soil and water, recreation, grazing association, irrigation and drainage, economic emergency loans for real estate and disaster emergency loans for major adjustments above actual losses.

"Indian land acquisition

loans and biomass fuel facilities loans will also be made at 12.25 percent," he said.

"For disasters occurring between July 3 and December 19, 1980, emergency loans will be made at 11.75 percent to applicants who can get credit from other sources," Cavanaugh said.

Rural renting housing and rural housing site loans will be made at 11.5 percent.

Cavanaugh also said that interest rates on

—loans to limited resource farm applicants will be made at seven percent for operating purposes and five percent for real estate purposes;

—loans to cover actual losses from disasters occurring after Oct. 1, 1978, will remain at five percent;

—loans on water, waste disposal and community facilities will remain unchanged at five percent.

"FmHA interest rates had not changed since September 26, but increases were forced up because of recent rises in the prime interest rate," Cavanaugh said. "Interest rates will continue to be negotiated between borrower and lender for the agency's guaranteed loan programs."

The formulas used in setting FmHA's interest rates and other government lenders are prescribed by law and closely tied to the cost of federal borrowing and prevailing private market interest rates for similar maturities.

With the approaching energy crisis, the best oil or gas burner you can install, is also the best wood or coal burner you can install.

Introducing the HS Tarm Multi-Fuel central heating system. It heats your home and hot water with any combination of available fuel. Including wood, coal, oil, gas, and electricity. So when oil and gas run short and burn up your budget, you can supplement or totally replace them with wood or coal. Automatic controls will safely and instantly switch to the fuel of your choice. You can heat with wood or coal as the primary fuel or use them only as emergency back-up fuels.

All in all, there is no better or less expensive way to keep your family warm. Write today for information about HS Tarm heating and hot water insurance for your home.

(Continued from Page A21)

Ephrata Church of the Brethren for 37 years.

Crouse was named "Outstanding Farmer Over 40" by the Ephrata Area Young Farmers' Association.

Association.

The Master Farmer program, established in 1927, is sponsored by the Pennsylvania Farmer magazine, Harrisburg, and Cooperative Extension Service of The Pennsylvania

State University.

Formal award ceremonies will be held January 13 at a special luncheon in Harrisburg. Crouse will be inducted into the Pennsylvania Master Farmers' Association whose membership consists of all former award winners.

Crouse poses with Lime-Hollow Elevation Jessie. This cow made Holstein history last March when she was purchased by a syndicate for \$116,000. Crouse, who is one of the partners owning Jessie, serves as guardian of the sixth generation Excellent cow.

Fighting ice with ice to save fruit crops

UNIVERSITY PARK — Imagine an apple, pear or lemon bud. Sensing spring, it bursts into bloom one warm day in February, March or April—only to freeze to death that night as temperatures plunge.

Multiply such occurrences by millions, and it's easy to see the plight of the nation's fruit farmers.

Seeking to protect fruit trees on freezing early spring nights, Penn State researchers are trying to fight ice with ice.

They're developing a computer method to predict when and where frost will occur in mountainous terrain, to monitor its arrival and to activate sprinklers automatically in order to keep fruit buds and leaves "warm" by coating them with ice.

"Though the original concept wasn't ours," says project director C. T.

Morrow, associate professor of agricultural engineering, "we think it offers important and inexpensive protection for highly vulnerable fruit crops; and we're trying to adapt and perfect it for conditions in the Northeast."

As Morrow explains, the fruit frost protection technique has been used for a few years in the drier West and South. There, due to different climate and terrain, sudden frosts are more common, and economic losses are greater than in the humid Northeast.

The ice method is the most promising alternative to farmers' traditional practice of heating orchards on freezing nights, with wood, oil, gasoline, or charcoal-fired braziers. While heating remains one of the most reliable techniques, spiraling energy costs have sparked a search for cheaper ways.

The most effective of these is a sprinkler system, whereby tree boughs and branches are continually sprayed with water. As the water turns to ice, a "heat of fusion" is emitted. Absorbing this heat, the crucial plant parts are kept above a critical temperature.

Conversely, to prevent buds from blooming prematurely on warm spring days, a technique called "bloom delay" is used. Intermittently during the day, the trees are sprayed to keep the plant's flowering parts below, rather than above, a critical temperature—probably 45 degrees Fahrenheit.

Thus far, such methods have not gained wide acceptance in Pennsylvania and the rest of the Northeast. The practices are new and not well understood; compared to some other parts of the country, frosts are infrequent; and the method can do harm, if not used properly.

Consequently, most Northeastern farmers do nothing, and often get away with it.

Essentially, Morrow's group is trying to make the method work well in the Northeast, and to take the guesswork out of when to spray.

"We think the system is particularly useful and economically worthwhile," explains Morrow, "because, in addition to protecting fruits from frost, the system can be utilized for other purposes."

"Water flowing naturally downhill or pumped through a pipeline system connected to a central water source, also can be used for drought relief, and to apply water-soluble nutrients and pesticides."

However, Morrow continues, both frost protection methods are fraught with uncertainties and problems. The main difficulty with the bloom delay technique, he explains, is that an enormous water supply is needed under Pennsylvania-type conditions, because there are so many warm early spring days when night temperatures plunge below freezing.

To be safe, farmers have

to spray, day after day. Also, it's still unknown what the critical temperature is—the temperature below which the buds are likely to develop.

As for the "heat of fusion" technique, the dangers are even greater, says Morrow. A mistake can lead to unnecessary bud deaths or even to death of entire trees, as in the case of very sensitive citrus trees.

"One danger," says Morrow, "is that the trees can be overloaded with ice. As water is added all night, ice layers will build up, causing structural damage."

"Another hazard of too much water is a condition called 'wet feet.' The tree roots become surrounded by too much water, which chokes off their oxygen supply. On the other hand, too little water will result in too thin an ice film, causing plant temperatures to fall below the critical 32 degrees."

Still anger danger, he adds, is associated with wind, even wind as low as five miles per hour. For if the sprinkling and freezing is occurring in the presence of such wind, the heat of fusion may be dissipated into the atmosphere, and the plant parts will sustain more damage than if nothing had been done.

To overcome these and other problems, Morrow's group is trying to develop better prediction and detection methods for ice formation; to learn how much water to supply at different intervals; and how to use as little water as possible.

Monitoring such climatic parameters as air temperature, temperature inversion (temperature at different atmospheric heights), relative humidity, wind speed, and, possibly, blossom temperature, a computer would automatically activate a sprinkler system, adjust the water supply as conditions change and shut the sprinkler off when necessary.

"We have four years' data and we're confident that we're well on the way to solving the problems," says Morrow, adding that his team hopes to continue testing their system next spring.

"Farmers First always treated me like a special customer.

This year they made it official." I've worked hard to get where I am. And I enjoy the rewards it's brought. To me a bank is more than a convenience. It's a personal, financial resource. And Farmers First has always offered me that kind of service. Take checking accounts for instance. Farmers First gives people a choice of five different kinds. It's all in their booklet: The People Bank's Guide to Preference Checking. One of the accounts—Check-Mate Checking—suits me perfectly. More so than a NOW Account. With Check Mate Checking, I earn 5-1/4% on my bill-paying money. Plus, I get a long list of special services. Like a \$10,000 Personal Line of Credit. Up to \$1,000 withdrawals from Round-the-Clock-Tellers. A special card useful in the 24 hour tellers and to identify me to the people at the bank. It goes on and on. The point is, I found the checking account right for me by reading this booklet . . .

Pick up your Guide to Preference Checking at any Farmers First office. Or call 626-4721 Extension 207.

...so even if you don't bank at Farmers First, read their Guide to Preference Checking.

*Beware those high school sophomores***Vandalism tops list of rural crimes**

BY SHEILA MILLER

LITITZ — Vandalism is the leading crime committed in the rural community, reports G. Howard Phillips of the Ohio State Rural Crime Prevention Department.

In studies conducted at Ohio State, Phillips showed 38 percent of all crimes committed against rural residents' properties were acts of vandalism.

Looking back at FBI records for the years 1972 and 1973, he discovered a 15.7 percent increase in the number of rural vandalism arrests in the U.S. And, of those arrested for the offense, 59 percent of the offenders were under 18 years of age.

His delving into the records also revealed that from 1972 to 1973, the number of persons under 18 years of age arrested for rural vandalism increased 25 percent, with the sixteen year old age group being the largest.

As a result of these surprising statistics, a study was undertaken at three rural Ohio high schools to survey sophomore students in an effort to discover who was committing these acts of willful and malicious destruction of property and why.

The findings of the study disclosed that 52 percent of the students had committed one or more acts of vandalism. Thirty-seven percent of the girls reported having been involved in vandalism while 68 percent of the boy students admitted involvement.

The study pointed out

there was no relationship between whether a student committed an act of vandalism and if he or she was a member of a religious organization. And, it didn't seem to make any difference whether the student was a hometown boy or girl or a short-term resident.

One factor that did point towards being significant was the marital status of parents.

"Rural high school sophomores are more likely to have committed acts of vandalism if the head of the household where they resided was divorced, separated, or widowed when compared to students from households where the head was married," reports Phillips.

The study also pointed to the fact that students whose family was headed by the mother or a parent over the age of 50 tended to be more involved in vandalism.

The survey findings also showed the crime was most often committed when the students were responding to peer pressure and had been drinking. Although most of students traveled to the scene of the crime in a car (47 percent), it was reported 36 percent walked to the vandalized site.

The findings also revealed the most frequent time for vandalism was in the fall (31 percent), on weekends (59 percent), and usually in the afternoon (36 percent).

And, Phillips reported over half of the vandalism acts were done "for the fun of it", with 12 percent done to get even.

Phillips attributes this

increasing rate of vandalism among teenagers to a number of things.

"... these students have low regard for the rights of other people to own or hold property unmolested. It perhaps suggests these rights have not been taught to modern youth or at least they have not fully accepted them.

"Perhaps a low regard for others' property rights is a spin-off of contemporary affluence. As more people have more property, perhaps it has less meaning or value as when it was scarce."

He also cites modern transportation, consolidation of schools, an increasing number of one spouse households, the declining sense of belonging to a community, and less defined roles for adolescents as part of the "rising phenomenon of vandalism in rural areas."

"Vandalism used to be thought of as pranks," he said. "Now it's a serious problem. It costs taxpayers over \$600 million to repair and replace the damages and losses for vandalism committed in rural schools."

"What's changed is accessibility."

"Building farm to market roads has been a popular political idea since World War II. However, the transportation system also allows the town and city residents a means of traveling to the country, committing criminal acts, and getting away anonymously."

"Added to that is the fact that in our affluent society,

more students have their own vehicles and too much time on their hands.

In years past, the farmer dominated the rural community — now the non-farm residents have integrated into the social setting. It used to be a crime control when everybody knew everybody — now there are a lot of strangers in the new population mix."

And recognizing a potential criminal is no easy task, he added. The Ohio State research team characterized offenders as follows:

— 74 percent are under 30 years of age;
— 16 and 19 year olds are the most often arrested age group;

— 87 percent are male;
— 27 percent are students,
— 60 percent are urban residents;

— 64 percent are unmarried;
— 45 percent are arrested in a group;

— 23 percent are intoxicated,
— 31 percent have previous records known to the police,
— 93 percent are white.

What are the types of things taken, damaged or destroyed by rural thieves or vandals?

The number one thing on their list, says Phillips, is gasoline. Automotive related items are the highest percentage of stolen or vandalized goods, ranking 21 percent.

Following automotive items are tools, 16 percent, residential belongings, 10 percent, recreational items, 8 percent, money, 8 percent;

televisions and radios, 7 percent; mailboxes, 7 percent; appliances, 6 percent; jewelry and guns, 6 percent; animals, 3 percent, and food and drink, 3 percent.

In next week's issue of Lancaster Farming, we'll take a look at where rural crime is likely to occur and what can be done to discourage it.

Firm makes three executive appointments

LANCASTER — Donald E. Horn, 4059 Robinwood Road, York, has been named Vice President, Allied Division of Pennfield Corporation, 711 Rohrerstown Road, Lancaster.

The appointment, effective January 1, 1981, was announced by Robert B. Graybill, President.

Previously Horn was General Manager of Pennfield Farms Eggs, the company's egg processing operation, located in Ephrata.

In his new position he will be responsible for the company's allied operations, including Pennfield Farms Egg Division; Beachley-Hardy Seed Company Shiremantown; Palmer Green Company, Shippenburg; Allied Products, York; and J. Brame Witmer, Inc., Lancaster.

Horn also serves as Vice President, Pennfield Farm Poultry Division, Fredericksburg; and Secretary of Pennfield Corporation.

He is a member of the Board of Directors of Egg

Richard A. Hobday

Clearing House, Inc.; American Egg Board; Egg Council of the Pennsylvania Poultry Federation; and the Commonwealth Agri Loan Corporation.

Glenn U. Smith, 102 Meadow View Drive, Leola, has been named to succeed Horn as General Manager, Pennfield Farm Eggs. Smith previously served as Sales Manager for the Egg Division, and Area Manager with Pennfield Feeds.

Donald E. Horn

A native of Lancaster County, Smith is a member of the Pennsylvania Egg Marketing Association, and serves as Chairman of the association's Consumer Research and Education Committee. He also serves on the Pennsylvania Egg Exchange and is treasurer of the Upper Leacock War Memorial Association.

Prior to joining Pennfield, Smith was General Manager, Chick Sales Egg Farm, Hanover; Operations Manager, Hy-Cross Company, Doylestown; and

Glen U. Smith

Production Manager, Indian River Poultry Farms, formerly of Lancaster now located in Texas.

Also announced was the appointment of Richard A. Hobday, 2629 Marietta Avenue, Lancaster, as Vice President of Finance for the corporation. Hobday has served as treasurer since April, 1967.

Previously he was associated with Hatter, Harris & Beittel, Lancaster; and Hubley Manufacturing Company, Lancaster.

Farmers to meet on pepper growing

NEW HOLLAND — During the summer of 1980, 23 farmers in the New Holland area grew peppers for the Ben Lipitz Packing Company of Philadelphia.

Lipitz said he would like to expand the acres of peppers grown in Lancaster County and surrounding area in 1981. He not only will be expanding the number of varieties of peppers grown, he also is interested in growing tomatoes in the area.

On Wednesday evening, January 7 at 7:30 p.m. the Adult Farmer Program of the Eastern Lancaster County School District will sponsor a meeting with Lipitz at the Union Grove School to discuss these crops and contact potential growers for 1981. All interested persons are invited to attend.

The Union Grove School is located two miles north of Blue Ball on Route 625. For more information call 215/445-5041.

Brecknock ag zoning

(Continued from Page A1)

The proposed ordinance contains many agricultural safeguards, Robinson said, and the concerned farmers are looking to get further clarification and explanation concerning these certain restrictions.

Actually, one of the three main purposes cited in the beginning of the ordinance is:

"To preserve prime agriculture and farmland considering topography, soil type and classification, and present use."

The intended purpose of the Ag District set up in the ordinance further states:

"The regulations for this District are intended to encourage continued agricultural activities in those parts of the Township where agriculture is the predominant use, and to protect those areas with slopes greater than twenty (20) percent. Since agriculture is the intended primary use, residential and other non-agricultural uses must accept the nuisances and hazards which are a normal adjunct to farming."

Permitted uses in the ag district, which is the largest district in the township, include agriculture, public park and recreation areas, single family detached dwellings and customary accessory uses, buildings, and structures incidental to the above permitted uses.

A number of uses are also permitted as special exceptions.

Residential development in the ag district is based on a sliding scale formula, which limits the number of dwellings according to a certain amount of contiguous acreage of land under single ownership.

For example, one dwelling is permitted on parcels of land from one acre to less than six acres; two dwellings for parcels from six acres to less than 30; three dwellings for parcels from 30 acres to less than 80, etc.

The minimum lot area for dwellings in the ag district is one acre.

Other requirements

governing agricultural uses include:

All grazing and pasture areas must be fenced.

Liquid manure must be incorporated into the soil within 10 days of application. This requirement further recommends that such spreading be done on a clear day with a slight wind in order to promote drying of the manure.

Garbage can't be fed to livestock.

Dead livestock must be disposed of properly within 48 hours.

Non-dairy farm products can be displayed and sold provided that at least half are produced on the property on which they are offered for sale.

Parking space for at least three cars must be provided behind the street right of way line. The products must be sold from either a portable stand located behind the street right of way line and which will be dismantled at the end of the growing season, or from a permanent building located a minimum of fifty (50) feet from the street line.

Future poultry houses of more than 5000 birds or structures for more than 25 sows or 50 head of other livestock must comply with setback requirements, including 75 feet from all street right of way lines, 50 feet from all other property lines and 500 feet from all existing dwelling units other than the dwelling unit owned by the person building the structure. The 500-foot requirement can be reduced by the Zoning Hearing Board to 250 feet if certain conditions are met.

In addition to the ag district, agriculture would be permitted in other districts, including the light industrial, the flood plain, and as a special exception in both the residential low and residential medium districts. It is not permitted in the forest recreation or neighborhood commercial districts.

But in the two residential districts intensified livestock operations of more than 5,000 birds, 25 sows or 50 head of other livestock will not be permitted.

Agricultural requirements in the flood plain district specify a filter strip between any watercourse and any tilled land. Such a strip must be 15 feet in width and must be planted with a permanent ground cover.

Also, in the flood plain district, a cover crop, such as annual rye grass, must be planted when the land is not being tilled for major crops.

Brief answers
to short questions

Sheila's Shorts

By Sheila Miller

Just Coincidence?

In last week's issue of *Lancaster Farming*, I began a series on rural crime and its growing occurrence in the U.S.

It seems as if I've touched on a topic that has stabbed at a greater number of farmers in our area than I suspected.

I began the series with a fictitious account of teenagers trying to have some fun by turning out a farmer's cows. This story was based on statistics documented by the Ohio State research team on rural crime — who does it, when is it most likely to occur. This report comprises the gist of this week's article on rural crime found in Section B.

Since the first article of the series came out, I have had several farmers tell me how current the problem is — a living nuisance or nightmare for many.

One farmer recounted how vandals entered his hog finishing barn late one night and turned the hogs out of their pens. The fun for the hogs turned to fighting and tearing into the fiberglass insulation around the barn's furnace.

The next morning, the farmer walked into the barn to find two dead hogs —

killed from the stress and fighting that occurred when the pens were mixed. He figured the loss at several hundred dollars.

The insulation around the furnace was shredded and destroyed. The prank of the vandals cost the farmer another couple hundred dollars.

Slightly more difficult to calculate the loss, the farmer also said he felt all of his hogs were set back — fiberglass and fighting are not great methods for putting on pounds of pork. Again, more feed costs to finish out the barn meant more expense for the farmer.

What happened to the vandals?

As the farmer recalled, somewhat disturbed by the outcome, he reported the incident to the local police who offered to patrol the area more frequently. Needless to say, the culprits were never caught.

Now, the farmer said, he has installed a floodlight and locks on all the doors of his barns. Additional expense and aggravation — but a necessity to try to prevent other occurrences of vandalism from taking place.

Another farmer told me

how local police busted a drug pusher at the farm. He told how the peddler was parking his car along the road behind a fence row — a secluded pick-up point. How long this was going on before the bust was remains an unanswered question.

Striking a bit closer to home, neighbors recently had their mailboxes torn from their posts and stuffed with beer cans. Don't people respect property of the federal government anymore? If apprehended in the act, these vandals could be charged with a federal offense.

But that's the trick — catching them. And even if you do, you might find they're people you know. And, depending on the police authorities and lawyers, the vandals might get off scot-free anyway. All the time and effort of prosecuting has cost a lot more than just hammering the mailbox back in place.

How do you cope with this problem? By trying to solve it — and that doesn't mean ignoring it or thinking it will just go away.

Farmers need to get back in touch with neighbors. They need to watch out for each other's well-being.

Other precautionary measures could include installing locks on barn doors and gas pumps, putting up floodlights, keeping a good watch dog around — and checking to see what it's barking about, even if it's only a stray cat.

For more ideas on how to make rural crime more trouble than it's worth, read next week's issue of *Lancaster Farming*.

Even though it's three

PMMB to face fire

(Continued from Page A1)

Such a process would give opponents of any agency, including PMMB, a chance to close it down or at least to modify its structure or purpose.

Common Cause said it definitely will fight for sunset laws in the coming legislative session.

Olson would seem to agree with Common Cause that the purpose of PMMB should be modified.

"The price fixing power of the Board is unfair," she maintains.

"There is nothing wrong with the basic milk marketing law if it is properly administered. I don't think it is properly administered," she says.

"It is always a fight and it's hard for consumers," she says.

Dealers have attorneys and accountants to speak for them, farmers are well represented by PFA and the Grange.

But, Olson says, it is unlikely a group of people in the neighborhood are going to get together to pay \$20,000 a year to testify at a milk board hearing.

"All I want is to get consumers a fair shake," she says.

"What if there were an oil board with Gulf, Standard and some housewife running things. Do you think the

consumer would get a fair shake?" she asks.

Olson said she feels it is appalling there are two industry representatives on the board. "It really is wrong," she maintains.

Olson said she would like to see better representation, someone from another walk of life.

The impact of such a move would be to remove the two-to-one margin held by dairy interests on the Board, a long-standing tradition.

Repeating that his group does not yet have a policy on PMMB, Thomas DeWall, executive director for Common Cause of Pennsylvania, said Common Cause may favor abolishing PMMB's price-setting function while keeping other functions like the Board's standards setting powers.

On the other hand, farm groups generally support PMMB.

Pennsylvania Farmers' Association policy, adopted last month, strongly supports PMMB and recommends, "The minimum

pricing of milk be controlled by the Pennsylvania Milk Marketing Board, the way it stands presently."

Thus, the lines in any battle are drawn.

Perhaps reflecting unfavorably on PMMB's chances in the coming fight are the current milk glut and the artificially high price of milk required by federal milk orders and supported by Commodity Credit Corporation buying.

While PMMB and federal orders are not working hand-in-glove, the bad taste from the federal pricing structure carries over to the state group.

Consumer discontent with federal pricing shows up in the Community Nutrition Institute proposal to allow restructuring of Class I prices as reflected in powdered milk sales.

Thus the sides are drawn for potential conflict between dairy farmers and consumers. The outcome will effect the pocketbook of whichever side carries the battle.

THINK AHEAD...
Read Futures Markets on Page 3.

ANDY GLICK, Oley, Pa.

"I used to get my crib corn shelled for feeding my hogs. But since that cost around 8¢ a bushel even before hauling costs, I decided I'd be better off with storage. I went with the Harvestall and have never regretted it.

"I've put as high as 32% moisture corn in my Harvestall and you know, I've never had a mold problem."

"So I'm impressed with the Harvestall system and the quality corn I get with it. And I get it cured down for less than it used to cost just for shelling.

"I've recommended the Harvestall to my friends. I'm really happy with it."

**"Harvestall

The Harvestall Chillcuring System

It's simple. When grain comes out of the field it's a living seed. So instead of destroying the seed with high heat, moisture is removed with natural air ventilation. The grain keeps all its feed value, there is less shrinkage than with heat drying because only moisture is removed, not dry matter. You'll never see white dust in Chillcured corn. You actually save half of what you're used to losing in heat shrink.

There's no gas or oil to buy. Natural air carries away heat and moisture as the corn releases it.

Harvestall Chillcuring is a back-to-basics system that just simply makes good sense. Find out more about it.

'MARTIN-AIR'

PATENT PENDING

**Fully Automatic Total Confinement
Ventilation Systems**

**Why The 'Martin-air' System
is best for you**

The success of Martin-air systems rests on a different concept than that used by most ventilation designs. Others work by exhausting air completely then drawing cold air from outside—usually at the other end of the barn. Martin-air units use an exclusive damper system which mixes fresh air and exhaust air so the output of the unit is never more than 4°F different from the room temperature. And, at any given spot in a properly designed barn, the temperature should seldom vary more than 1°.

The Martin-air principle is simple and effective. Thermostats control fan speed and a dampered mixing chamber to blend fresh air with warm air. Constant circulation throughout the building maintains uniform temperature, eliminates drafts and reduces condensation to provide a dry environment.

Open

Mixing

Recirculating

**'Martin-air' can fill your
specific needs**

No matter what your livestock confinement requirements, a Martin-air System can be designed and installed to fulfill your needs. Systems are designed to create a stable, draft-free environment based on building architecture, insulation, number of animals, and all heat sources. Successful installations are operating in many calf barns, dairy houses, hog, poultry and rabbit operations and even horse barns.

Martin-air units are available in a wide range of ceiling or wall-mount models and each installation is carefully designed by ventilation specialists.

Martin-air ventilation can be installed in any existing building you may be using for livestock confinement, even old bank barns.

Conservation meeting

(Continued from Page A1)
state government leaders included Representatives Gibson Armstrong, June Honaman, Nicholas Moehlmann, and Noah Wenger.

Representative Wenger expressed his appreciation for the work the local District is carrying out in Lancaster County. He pointed out he received assistance installing conservation practices on his farm in West Cocalico Township from District technicians.

Wenger reviewed the past year's legislation that benefited the agricultural segment of the state.

"It's been a good year for agriculture," he stated, "with the passing of House Bill 1608 and 1176 which deal with family farm incorporation and inheritance taxes, respectively."

"It's no good preserving farmland if we can't preserve the people who farm that land," he said.

Wenger expressed optimism for a farmland preservation bill to be passed in the coming year, along with other major agricultural legislation that was side-tracked in 1980.

Senator Manbeck echoed Wenger's sentiments when he assured the District Board he will be working with the county commissioners and state representatives for a land preservation act in 1981.

During the business meeting, the directors expressed concern for the conservation practice — grass waterways — and their frequent failure in Lancaster County.

On a recent trip to Carroll County, Maryland, the directors recalled how they saw a waterway protected from the scouring and digging-out disasters of too much water through the use of a holding pond. This pond releases water at a controlled rate and allows it to drain down through the waterway at a safe speed.

Director Everett Kreider pointed out this may be an answer to Lancaster County's waterway washout problems.

Relating to troubles with too much runoff, the directors expressed concern with the current storm water management problems created by inadequate subdivision and development plans.

Aaron Stauffer stated since the District assumed

the inspection responsibilities for sediment and erosion control, the state's Department of Environmental Resources took several violation cases in front of local magistrates.

Unfortunately, Stauffer pointed out, the track record for wins is not impressive. He said the only case that was decided in the District's favor was thrown out for procedural technicalities.

"We're looking into taking on the litigation responsibilities on a local basis too," Stauffer said. "The image of DER is not too high with our local magistrates."

Concern was shown by the directors when they learned from an Agricultural Stabilization and Conservation Service spokesman for Lancaster County that it is expected the 1981 ACP funds will be 30 to 40 percent of last year's allocation.

"We've requested \$200,000 and have received \$60,000 to date," he said. "Assuming the new administration continues with its plans, that partial funding may be all we get. Last year Lancaster County received \$160,000."

Funk exclaimed farmers in the county would not put in conservation practices without government funding. Stauffer agreed with this statement and added "the public reaps the benefit of the farmer's conservation investment through the low cost of food in the U.S."

One Lancaster County farmer who has earned the recognition of Conservation Cooperator of the Year has learned the benefits of installing conservation on his dairy farm.

Robert L. Kauffman Jr. was honored with the 33rd Annual Goodyear Conservation Award "for outstanding accomplishments in resource conservation." Making the presentation was Richard Green of the Goodyear Tire Company.

On receiving the award, Kauffman said, "I want to thank everyone for the honor. It's because of people like you who are involved in conservation that our lives are better. And it gives our children a chance to take over the farm."

School prayer amendment becomes law

WASHINGTON, D.C. — "It is a triumph for school districts across the country who wish to implement voluntary school prayer programs. Those who choose are now free to do so without fear of interference from the U.S. Department of Education," Congressman Bob Walker declared Monday in reaction to his

voluntary school prayer amendment being passed into law.

The Walker School Prayer Amendment was adopted as part of the Continuing Appropriations Resolution package, one of the last pieces of legislation approved by Congress prior to the final adjournment and signed into law by the President.

Specifically, it forbids the use of federal funds to prevent the implementation of voluntary school prayer and meditation programs in the public schools. It is the first federal law to be passed by Congress dealing with the school prayer issue since the 1962 Supreme Court decision forbidding prayer exercises in public schools.

"Nationwide opinion polls indicate the majority of Americans support the restoration of prayer in our public schools. And there is a trend developing among many states and localities to permit voluntary school prayer," Walker noted.

"By all indications, there was a need to add a degree of flexibility to the 1962 Supreme Court decision. My amendment does not mandate or require that voluntary school prayer be

returned to the classroom, rather it prevents the federal government from interfering with the rights of states and localities to determine their own educational policies," he continued.

"If states and localities determine that they want their school day to include an opportunity for voluntary prayer and meditation, we

have now assured that federal bureaucrats will not interfere.

"Prayer and meditation have always been an integral part of our American heritage. It is reassuring to know that our system of government is working as it should to reflect the attitudes and beliefs of its citizens," the 16th District congressman said.

Huntingdon Holstein Club to meet

ALEXANDRIA — The Huntingdon County Holstein Club will hold its annual banquet and meeting January 17.

The meeting will be held at the Juniata Valley School in Alexandria.

The evening's activities will get underway with a milk bar at 7 p.m. to be followed by the annual dinner at 7.30.

Awards for the year's top producers will be made following the banquet. In addition, a review of the year's events and election of officers for the 1981 season will be held.

There will be comments,

and perhaps even some pictures by R. Wayne Harpster, Spruce Creek, of President Jimmy Carter's fishing trips to Spruce Creek Valley.

Tickets to the event are available from club directors or from the County Extension Office.

Lancaster dairyman Robert Kauffman was honored as Goodyear Conservationist for 1980.

Livestock & Grain Bodies

Bigger Than Ever, Better Than Ever

Precision engineered roll formed 52" high steel sides provide greater capacity at less cost.

We've built rugged truck bodies for over 50 years and today we're continuing that tradition. That's the reason you can't make a better investment than an Omaha Standard steel or hardwood farm body.

■ One-piece roll formed steel sides with built in tarp rail. Available in 28', 40' and 52' extra-capacity heights — all with maximum corrugation for maximum strength.

■ 40' and 48' hardwood sides also available — the truck body Omaha Standard built its reputation on.

■ The toughest platform in the business — laminated wood, smooth steel or tread plate.

■ Easy-conversion hardwood upper racks — greater flex and life than steel fold down racks.

■ A full line of rugged gates — all engineered to make your job easier.

Omaha Standard Hoists

■ Seven precision-engineered scissor hoists from 4 to 34 tons for bodies 8' to 24'.

Olympic Series — twin telescopic hoists with greater torsional stability for bodies 16' to 24' and 15 to 43 ton capacity.

Omaha Standard bodies and hoists

time-tested on thousands of farms throughout the United States and Canada.

Look to Omaha Standard for the best. Our equipment takes all the punishment you can dish out and comes back for more, year after year. We stake our reputation on it.

We've been a part of successful farming and ranching for over 50 years.

FARMERSVILLE EQUIPMENT INC.

RD 4, Ephrata, PA

HOURS: Mon.-Fri. 7:30 to 5:30, Thurs. till 9:00, Sat. till 3:00

Re-elected as chairman and vice-chairman of the Lancaster County Conservation District Board of Directors are Aaron Stauffer, Ephrata, left, and Amos Funk, Millersville.

Cold facts

What ever happened to the 'big snows?'

LANCASTER — "Where are the snows of yesterday?" asked an American writer named Justin McCarthy, echoing a question first raised several centuries earlier by the French poet Francois Villon.

If McCarthy, who died in 1936, had only looked, he would have found the answer. Those snows—the big ones, anyway—are preserved in history and record books.

The current issue of National Wildlife magazine takes a look at those books and comes up with some cold facts concerning the most fearsome, frigid winters of yester-year:

The lowest temperature ever recorded in the U.S. was minus 79.8F., at Prospect Creek, Alaska, on January 23, 1971.

The heaviest snowfall was 86 feet at Rainer Paradise Ranger Station during the same winter of 1970-71. That's about as deep as an eight-story building is tall.

One of the earliest American blizzards tracked down by National Wildlife was in February, 1698. One New England pioneer called it "the terriblest winter ever" as Boston got buried under 42 inches of white stuff. And that was before the days of snow plow.

Perhaps the granddaddy

of all blizzards was in March of 1888.

From the Chesapeake Bay to Maine, for four days, an average of 40 inches of snow buried the region. Winds gusted up to 70 miles per hour, and there were more than 400 deaths—200 in New York City alone. Train passengers were marooned and 200 ships foundered.

One historic snowstorm came as a disguised blessing. At 6 p.m. on Christmas Day, 1776, a bitterly cold blizzard struck the East. General George Washington wrote in his diary: "The wind is northeast and beats in the faces of the men. It will be a terrible night for the soldiers who have no shoes. Some of them have tied old rags around their feet, but I have not heard a man complain."

Later that night Washington crossed the Delaware with his shivering army of 2400 men and slipped into Trenton, N.J. After a long night of Christmas revelry, the Hessian mercenaries were no match for the ragged Americans.

The Revolutionary War would not be won for five more years, but the Battle of Trenton was a turning point. Had it not been for the cover of that snowstorm, it might have gone the other way.

Snow blanketed the Commonwealth this week — keeping spirits bright, except for anyone driving on slippery roads. A slight warming trend, with temperatures nearing the freezing point, was

gratefully received by farmers who suffered the headaches of freezing water lines. Photo taken near Host, Berks County.

Free horse clinics available

MONTICELLO, N.Y. — A selection of over a dozen different one and two day equine clinics are available as a public service to horse and riding clubs, 4-H groups, livestock organizations and horse fair organizers.

Sponsored by the Rhulen Agency, Inc., the nation's largest animal insurance specialist, and conducted by author Susan Harris, the clinics are available at no charge to established livestock organizations or groups.

"Our equine clinics are designed," notes Peter L. Rhulen, vice-president of the Monticello, N.Y. based firm, "to give horse owners and horse enthusiasts a hands-on opportunity to see, learn, work with and ask questions of an expert."

Susan Harris' publications include "Grooming To Win" and "Horsemanship In Pictures". She directed the 5-H Acres School of Riding, a nationally accredited 2 year course for riding instructors, for 10 years and has conducted over 50 clinics in the past 2 years.

Harris has trained horses and riders and has competed in Hunters, Jumpers, Dressage, Combined Training, Western Pleasure and Performance, Saddle

Seat Pleasure and a variety of breed divisions. She teaches and judges all three equitation seats and basic dressage.

Among the clinic programs available are: Hunter Seat, Stock Seat and Saddle Seat Equitation; Dressage; Hunter/Jumper Over Fences; Western Performance Classes; Schooling the Young Horse; Grooming & Preparation for the Show Ring; Horse Care and Conditioning; Selecting the Right Horse; Conformation, Balance & Movement; Equipment Selection and Use; and Safety in riding and Handling Horses.

Programs can be presented at an organization's headquarters

or conducted as part of an existing fair or event," according to Rhulen.

"Attendance at the clinics," he points out, "range from 25 in the case of small 4-H groups to over 5000 at a horse fair. When an organization or group lets us know that they would like to schedule an equine clinic, we give them the details of running such a program, the topics available, open dates and other pertinent data."

Organizations interested in learning more about the Rhulen public service equine clinics should write The Rhulen Agency, Inc. - 217 Broadway, Monticello, New York 12701, Attention - Lilyan. or call (914) 794-8000; (212) 994-1950 or (800) 431-1270, extension 427.

Stressed pig shows good common sense

LANCASTER — When this little piggy went to market, it carried an FM radio.

Its heart beat faster and faster as it climbed the loading chute to begin its trip to the feeder pig auction.

As its heart rate passed 210 beats per minute, it began to lose some of its muscular coordination. If this kept up much longer, the pig would surely collapse.

But the stressed pig showed its good common

sense by slowing down, then standing still and finally lying down until its heart rate dropped to 200.

In fact, the scientist monitoring the stressed pig said once it was lying down, "it just plain ignored any stimulus to make it move."

The scientist had taped a miniature FM radio transmitter to the pig's back to record heart rate and to get

information about the stress that feeder pigs undergo during each step of the marketing routine.

"We're trying to gain insights on chances in market facility design and handling procedures that could minimize stress," said agricultural engineer Herman F. Mayes of USDA's Science and Education Administration — Agricultural Research

When the rates exceed 110, muscular movements in pigs' hearts lose some of their coordination. That makes blood flow slower than it should, and body temperatures rise.

Prolonged pressuring for physical exertion could cause the pigs to collapse, said Mayes, but the 35 to 85 pound pigs in his study took every opportunity to adjust their activity to reduce those heart rates.

Mayes observed no great differences in the average heart rate as pigs stood, ate, drank or walked. But differences were significant in pigs running, lying down alert and lying down asleep.

As the study continues, Mayes will observe pigs in all of the stressful situations

Mayes work is part of a larger project in the University of Missouri-Columbia's animal husbandry department. The project includes a follow-up study of effects on diet and medication on the stressed pig.

"We're studying weight losses associated with handling and transporting and subsequent weight gaining performance of the pigs," said Mayes.

The studies show that sleeping pigs' heart rates usually remain between 100 and 160 beats per minute.

When the porkers are forced to climb a loading chute to begin their trip to a feeder pig auction, heart rates may jump to 250 to 260 beats per minute.

in which they find themselves.

For example, he said, feeder pigs are often stressed when they are sorted, graded, weighed and penned with pigs that are strangers to them.

At some markets no feed and water is provided. And after the sale, the pigs may remain at the market facilities from one to 15 hours awaiting transportation, which may take another one to 20 hours.

Herman F. Mayes, USDA agricultural engineer, holds a miniature radio transmitter he tapes to feeder pigs to pick up heart beats and thus measures the pigs' stress as it goes through the marketing process.

South Central Pork Producers to hold sale

BY MARY MYERS
Staff Correspondent

GETTYSBURG — The South Central Pork Producers Association met recently at the Adams County Extension Office. Members present were from Adams, Cumberland, and Franklin Counties.

Ken Ketterer, Newville, president of the group, conducted the business meeting.

The possibility of holding another feeder pig sale was a major discussion topic. The decision was made to organize the second annual sale. The sale will be conducted at the Shippensburg Fairgrounds in early April.

Other details are to be handled by a committee and announced at a later date.

Representatives were elected to serve on the

Pennsylvania Pork Council. They are Ken Ketterer, Newville; Dave Reinecker, York Springs; Clyde Strock, Mechanicsburg.

Clyde Strock and Ed Hildebrand, Littlestown, reviewed the results of the Slaughter Check Program. It was noted that nine producers participated in October.

This innovative program was the first of its kind to be instituted in the state. The Pennsylvania Pork Producers Council sponsored the event in the tri-county region.

The Slaughter Check Program is designed to assist the producer by examining and testing several slaughtered hogs for various undesirable conditions.

Each producer is sent a report on the findings. If any problems are found, recommendations for controlling the existing conditions are provided along with the final report.

The members provided the Council with suggestions concerning the Slaughter Check Program. The group felt the program was a worthwhile venture and should be continued. Continuance should be on a regular schedule so more producers could participate.

Also suggested was the idea that participation in the program be at least once a year to be of benefit to the producer.

Laura Watts, extension agent from Cumberland County, showed the group a slide presentation entitled "Pork Industry Programmed for Profit" and a short consumer-oriented movie, "Fork More Pork."

The next meeting will be held in March. Members will be notified.

The board members will meet on Thursday, February 5 at the Cumberland County Extension Office in Carlisle.

Herman F. Mayes, USDA agricultural engineer, holds a miniature radio transmitter he tapes to feeder pigs to pick up heart beats and thus measures the pigs' stress as it goes through the marketing process.

York County's Lauxmont Farms has emerged as one of the leading new Standardbred horse farms. One of their stallions, Tarport Adios, is standing at stud on the 1400-acre Wrightsville breeding complex.

The 1980 tobacco crop produced a good quality leaf but yielded on the thin side, according to John Yocum, left, agronomist and tobacco researcher at Penn State's Southeast Research Lab, Landisville, and Arnold Lueck, agronomist and county extension agent.

It happened in 1980

Robert Hodge, president and general manager of Highland Orchards, Chester County, was selected as one of last year's Master Farmers.

Lancaster County's Outstanding Cooperator Award was presented to Robert and Susan Kauffman, Peach Bottom by Director Robert Wagner, left. Looking on with their parents are daughters Karen and Beth.

Governor Thornburgh proclaimed April as Egg Month this year. John Hoffman, executive director of the Pa. Poultry Federation, center, and Paul Fischer, president of the Pa. Egg Marketing Association, right, accept the official proclamation from Secretary of Agriculture Penrose Hallowell.

For top corn yields
this year!

UNIPEL[®] 21-7-14 fertilizer!!

It meets the changing needs of most soils and supplies the ratio of Nitrogen, Phosphate and Potash...to maintain a favorable plant-nutrient balance for top grain and forage production.

Pelleted UNIPEL 21-7-14 is an ideal fertilizer for the grower who wants a Uniform Single Application of a complete fertilizer on corn in Spring or Fall. It's especially good for programming high yield corn for grain, or for silage, and for corn/soybean rotations.

Lebanon ASCS names 1981 county committee

LEBANON — Farmer have recently selected representatives from their respective communities to serve as community committeemen for the Lebanon County Agricultural Stabilization and Conservation Service during the elections.

Community committee

members serve for a term of one year. The committee members inform farmers of programs, policies, changes of program provisions, report disaster conditions, damage assessments, recommend emergency measures, verify information, and assist the county committee in any

other duties assigned to them.

Following election, the community committee serve as delegates to elect the county committee. They serve a three year term

For 1981, they have elected John Stick, R6 Lebanon as chairperson; Edward Krebs, R1 Grantville, vice-chairman; Henry

Royer, Prescott Rd., Lebanon, regular member; Mark Ruhl, R1 Lebanon, first alternate; and Ken Blatt, R1 Jonestown, second alternate.

Community Committee members are as follows:

Community 1 Heidelberg Donald Bollinger Millcreek Vernon Balmer Walter Heisey Warren Bucher Richard Haller
Community 2 So Lebanon Cyrus

Bomberger N Cornwall Frank Reist Jr W Cornwall Elwood Houser Cornwall Boro Ivan Parker Ronald Kelchner
Community 3 So Annville John Alger S Londonderry Earl Weidler Timothy Tyson Henry M Berger G Elmer Ungemach

Does wood heating really pay?

POTTSTOWN — When a bragging relative or neighbor tells you about the money he saves by heating his house with wood and urges you to do the same, do some serious thinking before you do.

According to the Bureau of Forestry of the Department of Environmental Resources, although the possible savings may look great, wood heat may not be for you.

Let's look at costs first. Cheap stoves can be bought for \$100, but to be safe a good airtight stove or fireplace insert will cost \$300 to \$800. A chimney is required. It is possible to use the fireplace chimney or the chimney for your present furnace if you

discontinue using it for the use of your furnace. For safety reasons, furnaces and stoves should have separate chimney flues. If a new chimney is needed, this will cost \$300 to \$500 minimum.

If you expect to cut the firewood yourself, a chain saw is needed. The smaller saws cost about \$80 and can be used for cutting and trimming small trees, but for cutting larger trees, a saw will cost \$150 to \$400. Needed with the saw are such items as extra chain, sharpening files plus the gas and oil to operate the saw.

Once the wood is cut, it must be hauled home. It can be carried in the trunk of a car or in the back of a station

wagon, but only a small amount can be carried safely. Some type of truck or trailer is recommended.

Once it's home, it will be necessary to split the wood. This can be done with an axe or wood maul with the aid of a splitting wedge and sledge hammer. The cost for these items is another \$50.

If you own a woodlot or if you have a relative or good friend that owns a woodlot, you may not have to worry about a wood supply. Otherwise, getting low cost firewood may be a problem.

Wood can be cut on public lands such as State Forest lands, however, the closest areas of State Forest land are in the Poconos or west towards Chambersburg.

If the wood is bought on the market, it will sell for \$80 to \$120 per cord, depending upon where you live. It is expected that this price will increase in the coming years as the demand increases and the supply changes.

The average home will require five to eight cords of wood for total heat. The average woodlot in this area

will grow about one-half cord per acre each year.

This means that if you expect your woodlot to supply your entire heating needs for many years to come, you will need 10 to 15 acres. However, if using wood as a supplement to gas or oil, then less wood will be needed.

One final aspect should be considered. No matter what your neighbor says, cutting, hauling, splitting and lifting firewood is very heavy and time consuming work.

If you have access to the

wood, can afford the stove and the accessories needed, are in good health, and have time to cut and haul wood, heating with wood can be very beneficial and rewarding. If you cannot meet these demands, the Bureau of Forestry warns that trying to heat with wood could be a costly and painful mistake.

For more information, contact the Department of Environmental Resources, Bureau of Forestry at Route 23, R4 Pottstown, 19464, Area Code 215/469-6217.

VR Seeds Leave Bin Beans In The Dust.

Bin beans are just has beans. Battered and worn-out losers. In the long and short run, they'll cost you yield power and management control. Everytime. Because you have no way of knowing how many bin beans to plant per acre. How many will even germinate or how they'll perform and under what conditions. *How could you possibly know what your crop is costing you per acre?* So, the best thing is to sell your bin beans and get your money. Then start fresh with vigorous VR Seeds. Every single lot of VR Seeds is tested in our own laboratories (how many soybean seed companies even have laboratories) under the growing conditions prevalent in your area. That's how we determine VR Seeds vigor rating. And that's why, when we say 90% germination, that's what you get. And our recommended population per acre is something you can count on *even if it seems too good to be true*. Remember, VR Seeds only have to out-yield bin beans one bushel per acre to pay for themselves. It's no contest. VR Seeds set the standard for the soybean seed industry ten years ago when we introduced Vigor Rated® Seed and we're setting them today. Vigor Rated®. What do you think the "VR" stands for?

Call 800-348-2405, Toll Free, (Indiana 800-552-2326) for the name of your nearest VR Dealer. And, if we don't have one in your area, we'd like to talk to you about becoming a VR Seed Dealer.

Wheat, oats output increase but barley, rye drop

HARRISBURG — Pennsylvania's 1980 winter wheat and oats crops exceeded 1979 production, but barley and rye production declined, according to the Pennsylvania Crop Reporting Service.

Pennsylvania winter wheat production totaled 9,250,000 bushels, 27 percent above the 1979 crop. The 250,000 acres harvested were six percent above a year ago. Yield per harvested acre averaged 37 bushels, compared with 31 bushels a year earlier.

Pennsylvania oats production, at 19,040,000 bushels, was three percent above a year ago. Acreage harvested was 340,000 acres, with an average yield of 56 bushels per acre.

Barley production in Pennsylvania totaled 3,750,000 bushels in 1980, down six percent from last year. Acreage harvested was 75,000 acres, with an average yield of 50 bushels per acre.

Rye production, at 434,000 bushels, was five percent below 1979. Rye acreage harvested was 14,000 acres, with an average yield of 31 bushels per acre.

Pennsylvania farmers seeded 260,000 acres of winter wheat this fall for the 1981 crop, the same as last year. Winter wheat production for 1981 is

forecast at 7,800,000 bushels, down 16 percent.

Pennsylvania growers seeded 65,000 acres of rye for all purposes in the fall of 1980. This is 18 percent above 1980 plantings of 55,000 acres.

United States 1980 winter wheat production increased,

but 1980 crops of barley, oats and rye declined. Production of winter wheat totaled 1.89 billion bushels, 18 percent more than last year's 1.60 billion bushels.

U.S. oats production, at 457.6 million bushels in 1980, was 13 percent below 1979. Barley production totaled

358.5 million bushels, six percent less than a year ago, while rye production, at 16.3 million bushels, was down 27 percent.

U.S. farmers have seeded a record high 63.9 million acres of winter wheat for the 1981 crop. This is 11 percent more than last year's 57.4

million acres and five percent above the previous record 61.2 million acres seeded in the fall of 1948.

Based on December 1 conditions, 1981 winter wheat production is forecast at a record 1.98 billion bushels, five percent above the 1980 crop. Seeded yield is

forecast at 30.9 bushels per acre, compared to last year's 32.9 bushel average.

Growers across the nation seeded 2.61 million acres of rye for all purposes this fall, three percent more than the 1980 crop of 2.53 million acres, but 11 percent less than the 1979 crop.

What are your major corn yield robbers?

LITITZ — "What are the five most important yield-limiting factors for corn?"

In most instances, they include:

1. Soil moisture deficit.
2. Inadequate soil fertility (including low pH).
3. Low plant population.
4. Stalk rots.
5. Mechanical harvest losses.

Many corn growers have specific problems, but some of these factors must be near the top of the reasons they don't put more corn in the bin or silo. In many areas, crop damage due to heat during the 1980 growing season is a fresh memory, but high temperatures are not likely to be a year-after-year concern.

Every year, most U.S. corn fields suffer a period of moisture deficit sometime during the growing season. Sometimes these are of short duration and yield losses are

overlooked. The longer and deeper a drought, the more severe the yield reduction. Inadequate soil moisture during the three-week corn pollination period is the most disastrous of all. Even with irrigation, enough moisture stress to cut yield sometimes occurs.

During the 1970's, many serious corn growers built their soil fertility levels appreciably and some have reached the point that maintenance amounts of P and K will provide yield insurance. Yet, fertilizer is a big-ticket item in corn production costs and there is a tendency to cut costs by cutting fertilizer rates. The long-range effect can only be lower yields and reduced income.

Soil acidity deserves special mention as it may well be the number one problem for many corn growers. Lime products

continue to be one of the best buys in agriculture. National statistics reveal there is not enough lime being applied to even balance the acidifying effect of the nitrogen fertilizers being applied.

Low plant counts are taking more of the yield basket than most realize. There are expectations - top notch corn growers whose management permits them to use very high populations with yield success. Yield-increasing higher populations demand good management of all the other input factors. But, when average corn plant populations across the major Corn Belt states run between 20,000 and 21,500 per acre, there is room for improvement, especially for about half the farmers who have harvest stands below these averages.

It may seem strange to pick out one disease and list

it as a top five yield robber, but over the years stalk rot has earned that distinction.

Stalk rot is primarily an indication of stress during the growing season. Thus, weed competition, insect infestations, leaf diseases, and other adversities take their direct toll while adding indirect yield losses by inducing stalk rot.

There is too much unnecessary yield loss due to improper adjustment and operation of harvesting equipment. Growers seem less concerned about these losses than would be expected. It seems that the pressures of harvest dull the mind to what is being left in the field. It's a loss that comes right off the top of the profit column.

Big corn yields pay if management is right

LANCASTER — Every corn harvest brings at least a handful of overwhelming high corn yields that are grown at scattered locations across the U.S. Accompanying these high yields are a number of critics who say it's not feasible because there is no way to get a return-on-investment with high yields.

But Robert Munson, Midwest director for the Potash and Phosphate Institute, recently threw new light on the subject in an article appearing in Better Crops With Plant Food, PPI's official publication.

Munson carefully studied several farm operations that

continuously produce at or near the elusive 300-bushel mark and found that not only is producing at that level economically feasible, but it is very economically feasible.

For instance, when Roy Lynn, Jr. of Schoolcraft, Michigan set a new world yield record of 352.6 bushels per acre with DeKalb XL-54 in 1977, the seed company sponsored him at farmer meetings around the country where he insisted his special 10-acre plot was his most profitable piece of corn ground.

Munson's figures bear that out. Lynn's high corn yield compares to the Michigan

1977 average of 85 bushels per acre. His production costs ran at \$347.91 per acre while the average grower in the state racked up \$255 per acre in production costs. Breakeven prices, then, are 99 cents per bushel and \$2.65 per bushel respectively.

The record holder netted \$357.29 per acre on his 10 acres of special ground if you figure he sold his corn at \$2 per bushel, while the average Michigan producer would lose \$55 on each acre in 1977.

Lynn's story turns out to be typical of that told by other high-yield corn growers. Stanley Wilson of Saybrook, Illinois, took

DeKalb Yieldmasters Club dryland honors in 1978 with a 280 bushel corn yield.

The average Illinois corn grower had production costs of \$254 per acre in 1978. Wilson spent \$21.84 more for fertilizer, \$2.38 more for a higher plant population and another \$30.42 for extra harvesting and drying costs. When added to the \$254 figure, Wilson had a per acre cost of \$308.64.

Even if he sold his crop as low as \$2 per bushel, he'd gross \$560 per acre, leaving net profits of \$251.36 per acre. His Illinois peers averaged a net loss of \$32 per acre that year.

Houston County Minnesota farmer Hildus Wold hit 247.6 bushels per acre in 1977 while the average farmer in his state produced 100 bushels per acre. At \$2 corn, Wold made \$.68 per bushel, leaving him with a net profit of \$168.68 per acre while the average Minnesota farmer lost \$.54 per bushel, or \$54 per acre.

Munson points out that an inherent problem is that most of the high yields are grown on limited acreage or at least checked on limited acreage. The limitation seems to be the intensive management practices, not the intensive inputs.

For example, Lynn literally baby-sat his traveling irrigation unit so the corn wouldn't lack at all for water.

"Sometimes, I'd get up at 3 a.m. to turn the machine

around at the end of the field," he says.

It's practices such as that which make growing outstanding yields unfeasible on large acreages. But, Munson points out that there remains a more basic problem.

"The rate of nitrogen in corn production still is the limiting factor in many fields over most of the country," he says.

Munson estimated the needed nutrient content for a 400-bushel corn crop based on what it took to produce 235, 255 and 257 bushel crops.

He pegs nitrogen needs at 393 pounds, per acre for a 400 bushel crop, naturally with good environmental factors.

These examples are not to say that going all-out is for everyone. But, for those farmers who have experimented enough to consistently produce at high levels, the economic incentive exists.

The farmer's goal, once he is convinced special high yield plots return more money per acre, is to expand the increased management inputs to the rest of the farm.

Maximum production increases erosion potential

LANCASTER — Tight economic restraints and fluctuating markets have led farmers to continuous farm such row crops as corn and soybeans, according to USDA Soil Conservationist, Paul Petrichenko.

"Erosion potential is increased dramatically with continuous row crops," he said, "but there are several simple inexpensive ways to reduce that potential."

The use of crop residue management, minimum

tillage and a cover crop are a few basic means of reducing erosion.

Crop residue management includes leaving corn stalks on the soil after harvesting. These stalks protect soil by reducing the force of rainfall striking the particles of soil and causing soil movement — leading ultimately to soil erosion.

Likewise, sowing a winter rye cover crop forms a protective cover which also reduces soil movement.

Another means of reducing erosion potential is through the use of chisel plowing or minimum tillage. Limiting the amount of soil plowed is advantageous in that less soil is exposed to rainfall.

By coupling these simple soil management techniques with intensive cropping systems, farmers can reduce soil erosion potential while realizing maximum crop yield, concluded Petrichenko.

TO BE A BETTER FARM MANAGER

As we look ahead to 1981, it is difficult to realize just what major problems will confront the average farmer. However, it is evident

that profits will be more difficult to realize and some very good management will be needed to come out in the black. Today's farmer must be a better business man than his forefathers. He must be able to handle labor, money, equipment, and keep up to date on all regulations and cultural practices. He must be able to plan ahead and to be organized with all of his responsibilities. He should practice good public relations with his neighbors and respect the rights of others. Good management is just as important in farming as it is in any other industry or business. Work at it and it will pay dividends.

PENNSYLVANIA AGRICULTURE

WE'RE GROWING BETTER

Letters To The Editor

Dear Editor:

In regards to the article in the December 27 issue paper about the bridge in Lancaster County, I see it as another way of harrasing the farmer and an easy way to collect money.

Lt. Hunter maintained state troopers are only doing their jobs, but what about the speeding, drunk and

careless driving, which kill or injure more people than overweight trucks.

I am yet to see most of the state troopers and most of the state cars driving the speed limit. The excuse is the state doesn't have the money to fix the bridge. If a lot of people wouldn't have to have their pocket filled, the

cost at replacing a bridge or any road could be cut quite a bit.

Instead of Gov. Thornburgh giving big raises, he should cut the pays by one-half and they still would be overpaid. He could get rid of 90 percent of the so-called traffic inspectors and at least 85 percent of the engineers.

It would be interesting to know how much money was spent on roads and bridges in the Harrisburg area and how much more on the new bridge next to I-83 which looks like a four lane bridge.

Harold E. Gordon
R1 Spring Grove

Dear Editor:

I read your Bridge article in the December 27 Lancaster Farming with much interest and noted that there were 30 mobile scale teams sent out on state roads this fall to catch overweight trucks.

I don't know how much these scale teams cost in terms of man hours, equipment and money, but it would seem that these costs over a one year period would be enough to replace the Conrail bridge east of Quarryville.

At least we'd have one new bridge.

717-866-5692

Dear Friends,

The staff at Farmer Boy Ag wish to extend to you greetings for a Happy New Year. We are pleased to have had the privilege to serve your swine equipment needs.

Because of you we have just completed our best year to date, however, we still have room to expand and be of better service to you.

We are hopeful about what 1981 will have in store for all of us. Our wish is that we will be included in your plans for hog expansion.

The staff at Farmer Boy Ag wishes you health, happiness and prosperity.

Sincerely,
Leon and Mary Hoover

It
happened
in
1980

Gary Leader of R3 Everett, was surprised last August when his Holstein gave birth to triplets.

Governor Dick Thornburgh signed House Bill 1176 which will change inheritance tax laws to encourage continued use of farmland for agricultural purposes during ceremonies in December at the Amos Funk Farm Market, Millersville. Seated next to the Governor are: Rep. Joseph Pitts, left, and Sen. Richard A. Snyder. Standing are: Secretary of Agriculture Penrose Hallowell, left, Rep. Noah Wenger, Rep. Gibson Armstrong and Amos Funk.

The Philadelphia FFA Chapter held their first market hog show and sale at the Biddle High School in January. Todd Quinby showed the grand champion which sold to Penn Packing for \$5.25 per pound.

"AJK", a 160-pound Holstein calf, was born at the Melvin Kolb farm, Lancaster this past September. The calf is believed to be a record for size and weight in the area.

Facts about food prices, farm exports

LITITZ — Food's still still contribute to the payments in a big way. a bargain. And farmers U.S. balance of Consider these facts:

DUROC BRED GILT SHOW AND SALE

Held at the Farm Show Building,
Harrisburg, PA.

Show - January 10 - 10:00 A.M.

Sale - January 12 - 2:30 P.M.

For Catalogs Contact

Ken Fetterolf

RD 2 Centre Hall, PA 16828
814-364-9901

Despite consecutive record farm export years in 1979 and 1980, food prices are still running two percent to three percent below general rate of inflation.

Between 1960 and 1980 food prices increased less than other major necessities - energy, housing, transportation and medical costs.

During this period: if red meat prices had increased at same rate as energy prices, then round steak would now cost \$4.04 per pound,

and pork chops would cost \$3.24 per pound; if egg prices had gone up at same rate as medical costs, then large eggs would be selling for \$1.77 per dozen.

Winter wheat acreage is up eight percent to 10 percent over last year indicating that farmers are already responding to challenge of increasing production.

U.S. farmers produce 60 percent of all grain that enters world trade, yet Americans spend less of their after-tax

income on food (16 percent in 1979) than consumers in other nations around the world: West Germany - 22 percent, Japan - 23 percent, Soviet Union - 34 percent, Brazil - 41 percent, India - 59 percent and People's Republic of China - 60 percent.

U.S. farm exports are projected to reach \$48 billion in 1981 which would put agriculture's contribution to plus side of trade balance at a record breaking \$30 billion.

Current third quarter

U.S. trade surplus (second largest on record) is due in large measure to expanded agricultural exports. These exports are a very positive factor in countering inflation, creating jobs and strengthening the dollar.

Agricultural exports account for 1,300,000 jobs for U.S. workers; 630,000 of these are in non-farm sector. Every time we increase farm exports by one billion dollars - we create 31,700 jobs for Americans.

What's the secret to Harvestore® system ration consistency?

First-in, first-out feeding.

First-in, first-out feeding. It doesn't matter how good your feed is if it changes from one load to the next. Even changes too small to notice can cause a drop in milk and meat production.

But when you feed the Harvestore® system way, what you feed today will be the same as what you feed next week.

What goes in first comes out first

Because Harvestore structures load at the top and unload from the bottom, the forage you put in first is what you feed first. You can refill your structure anytime without a feeding interruption. You can put one forage crop right on top of another, yet the change is gradual when you feed.

Never climb a silo chute again

Harvestore structures don't have them, you don't have the chore of climbing up dusty, chaffy tunnels to take out silo doors. You never have to hoist bulky, awkward unloaders to the top. And even in long, hard northern winters, you never have to haul an axe up 50, 60 or 80 feet in the numbing cold, and put it to work breaking up rock-hard, frozen silage.

Every Harvestore structure loads at the top and unloads from the bottom, it is a feed processing system rather than just somewhere to store feed. Even when changing from one layer to the next, change is gradual so there are no surprises to put your livestock off their rations.

Easier on you and your pocket

The Harvestore system is truly a better way to farm and feed, a way that gives you time you never had before to get on with other, more important things. Feeding is reduced to a quick and easy routine that can save you money on hired labor, and the rich, consistent feed quality can make you more money in increased performance.

The best time to check out what the Harvestore system can do for you is right now. Have your dealer prepare a Farm Profit Plan for you and arrange for you to go along on a Harvestore system farm tour. Or fill out and mail the coupon below and discover just how much a Harvestore system can help you.

Nobody else has these unique Harvestore system features

- Single motor for simplicity and reliability
- Unloader can be moved easily from one structure of the same diameter to the next
- No dangerous, uncomfortable tunnel to crawl into
- Unlike some bottom unloaders, Harvestore system unloaders can be easily pulled and serviced at ground level
- 32 years of oxygen-limiting storage experience
- Coast-to-coast dealer and service network

It happened in 1980

Grand champion female at the 27th Pa. Holstein Show held in April was Northcroft Ella Elevation, shown by George Knight, R2 Airville, York County.

Chester Heim, Deputy Secretary of Agriculture, fielded questions from farmers and farm leaders at the ag town meeting held in Manheim last January.

The blue ribbon winner of the Pennsylvania Apple Marketing Board's recipe contest was Edith Kampen, Brickerville, Lancaster County. Her first place recipe, called Streusel 'N Apple Cream Pie, walked away with the judges' taste buds and Mrs. Kampen walked away with a check for \$200.

Governor Thornburgh hands Pennsylvania Secretary of Agriculture Penrose Hallowell the signed proclamation declaring October as Livestock Month. Looking on at the ceremonies held at the Capitol in June are: seated, left to right, John Kimbark, secretary-treasurer of the Pa. Sheep & Wool Growers Association; Pat Halloway, secretary of the Pa. Angus Association; standing, left to right, Henry Gruber, head of livestock procurement at A & B Packing; and Everett Denlinger, president of the Pa. Livestock Association.

FARM SHOW
BOOTHS 485 & 510**

Ann Starr, the National Pork Queen, attended the 1980 Pa. Keystone Pork Congress, held February 13 and 14 in Lancaster.

What made the news in 1980?

A couple of hundred farmers and truckers filled the Refton Fire Hall on December 29 to protest weights limits and the condition of bridges in the southern section of Lancaster County. State Dept.

of Transportation officials promised priority will be given to troublesome spans. But availability of limited funds for repairs will remain as a major stumbling block.

PAY FOR YOUR TRIP TO THE FARM SHOW WITH THIS RED BEDDING CHOPPER SALE OFFER.

Your choice of one of these steam locomotive limited edition fine art prints is included free with a special Pennsylvania Farm Show purchase of a tough built, red bedding chopper from US Farm Systems of Pennsylvania. When you think about the early days of American Agriculture, you remember these steam-driven engines hauled your grandfather's produce, grain and livestock to the hungry cousins in the growing towns and cities of the Northeast. The return trip provided the life-blood link of mail and medicine to the remote farm whistle-stop communities that nestled in the plains and valleys of that by-gone period of history.

Because these prints were created as limited edition prints designed to grow in value as they hang in your home or farm office, only a relatively small number of sets were produced before they threw away the original.

Get A Free Historical Americana Limited Edition Steam Engine Print.

Order At The Farm Show
To pay for your trip to the Pennsylvania Farm Show this year, be prepared to place an order for the tough-built, red bedding choppers on display at our booth. These science-engineered choppers, take bales of straw, old hay or corn stalks and chop the material into fluffy short-cut bedding even your highest producing cows can enjoy. No more sawdust to hold moisture and germs under your cows. No more long straw to shake out.

In addition, dairymen use the tough-built, red bedding chopper to make first-cutting hay more palatable. With the short cut hay stems, cows eat more. Eat all of it. Produce more milk.

So pay for your trip to the farm show. Order a tough-built, red bedding chopper from the models on display at our booth. And choose your free limited edition investment locomotive print from the set on display.

To take early delivery on this special farm show offer, write to U S Farm Systems of Pennsylvania, 4070 Blue Ball Road, Nottingham, PA 19362. Or better yet, call: (301) 398-2948.

USDA to change planting report schedule

WASHINGTON, -D.C — The U.S. Department of Agriculture's crop reporting board will issue a modified prospective plantings report January 21, covering planned acreages of cotton, rice, corn, oats, barley, sorghum, sweet potatoes, soybeans, and peanuts in 16 states, according to Howard Hjort, USDA's director of economics policy analysis and budget.

Hjort said the 16 states are Alabama, Arizona, Arkansas, California, Florida, Georgia, Kentucky, Louisiana, Mississippi, New Mexico, North Carolina, Tennessee, Texas, Oklahoma, South Carolina and Virginia.

A second prospective plantings report for major spring planted crops for 32 states will be issue in late March, Hjort said. This report will provide early-

season indications of farmers' planting intentions and allow more time for producers to monitor markets and make production and marketing plans, he said.

Hjort said USDA will update the January report in selected areas of events suggest farmers are likely to change their earlier planting intentions.

The January and March reports will be combined to provide a national prospective plantings report in lieu of the usual April report, Hjort said.

1980 in review

The high-selling calf at the Berks Dairy Calf Sale made history in November as it walked out of the sales ring for the top price of \$2325. Donated by Linden-Loch Holsteins, Oley, the heifer sold to Kevin Hertzog, also of Oley. Pictured with the calf are, back left, Ernest Miller, calf sale chairman; Doty Remsburg and Denny Remsburg, auctioneers; front left, Kevin Hertzog, buyer with Jim Shaw, and Wendy Shaw who donated the calf. Monies raised from the sale will go towards a new 4-H Center.

Kris Shutt, from Ortanna, Adams County became the 1980 Pennsylvania Apple Queen in January.

FARM LOANS?

We Take Care Of The Hands That Feed Us!...

Family farmers!!! Do you want a lender with agricultural experience who will visit your farm to save your valuable time and who understands your particular problems and needs? Brownstown Agri Loan Corp is just right for you. Established

to provide credit for local farmers, Brownstown Agri Loan Corp is large enough to handle your short and intermediate term credit needs, but still small enough to know you. Call us to arrange a meeting. New Customers Welcome!

1980 News Highlights

Lancaster County's Dr. E.E. Denlinger, V.M.D., was selected as Cattleman of the Year by the Pennsylvania Cattlemen's Association meeting held in March. Making the presentation was Harry Stambaugh, right, director.

Matt Haist, another Master Farmer, selected in January, 1980 raises over 100,000 assorted flowers and vegetables on his 18-acre Philadelphia farm.

A freak July windstorm toppled a 20,000 layer house on the farm of Tom Grassel, Conestoga. Grassel said the building, built in 1974, fell during the beginning of the storm. He said he was in his other chicken house when fierce winds hit — he watched as his house collapsed. Friends and neighbors pitched in to help clean debris scattered over an adjoining field and crawl through the roof to load out chickens.

Meet the nominee for U.S. Agriculture Secretary

GALESBURG, Ill. — John R. Block, named Illinois Director of Agriculture in February, 1977 has been nominated by President-elect Ronald W. Reagan to be U.S. Secretary of Agriculture.

If approved by the U.S. Congress, Block will bring with him to Washington a broad background in farming and agricultural administration.

His accomplishments both

in farming and as Director of the Illinois Department of Agriculture are many. He has made a name for himself in market promotion and administration.

Block is a 1957 graduate of the U.S. Military Academy at West Point.

Since 1960, when he completed U.S. Army service as an infantry officer, he has been at the helm of Block Farms located near Galesburg, Ill.

The family operation has grown in the past 20 years from a 300-acre farm producing 200 hogs annually to a 3000 acre enterprise with a yearly production of 6000 farrow-to-finish head.

Like most of the other farms located off I-74 Northwest of Peoria and not too far from Iowa, corn and soybeans are his major crops.

Block's farming career has been starred with

awards and honors.

In 1969 he was named Outstanding Young Farmer in Illinois in the U.S. Jaycees competition.

He was given the Illinois Extension Service's Meritorious Service Award for outstanding contributions to state agriculture. He was named to serve as a trustee of the state farm foundation.

He is a former board member of the Illinois Farm

John R. Block

Bureau, served as Farm Bureau director, and was chairman of the 11-state midwestern farm leaders' summit conference this past July.

More important than gathering honors, though, is what a man has done.

If nothing else, Block has

shown himself willing to travel.

This past September he led a three-week fact finding mission to the Soviet Union, Poland, Hungary, Austria and Switzerland.

He served as a member of

John Block

(Continued from Page B9)

ag export teams traveling to China and Japan in 1978 and 1979. He went to Taiwan to conduct a marketing survey for farm exports there.

He represented Illinois at the Anuga Food Show in West Germany in 1977 and during that trip met with agricultural attaches in West Germany, France, Belgium and the Netherlands.

The Illinois Department of Agriculture also reports Block supervised the Department's export offices in Brussels, Belgium and in Hong Kong.

In short, Block is an export-minded farmer whose passport shows he's been around to see potential U.S. farm products customers face-to-face.

Block's list of accomplishments since becoming Director of the Illinois Department of Agriculture leads off with his work in market development.

He expanded promotion of Illinois agricultural products both domestically and abroad through strong cooperation with commodity groups and food exporting companies.

Block claims to have established over 50 direct markets for agricultural products through food shows and similar activities.

Some of his programs were a bit more controversial. He doubled the number of thoroughbred and standardbred horses in Illinois through purse supplements at tracks.

Preservation of agricultural land also received attention during his administration of the Illinois Ag Department.

He obtained an executive

order from Illinois Governor James Thompson giving the Agriculture Department the responsibility for preservation of prime agricultural land.

State agencies must now meet certain criteria before farmland can be converted to non-farm use under that order.

He was instrumental in establishing statewide sedimentation and erosion control guidelines.

He led the development of strict guidelines for reclamation of mined lands.

In addition the Department, under Block, developed and implemented the state's first conservation cost-share program, providing funding for soil and water conservation districts and establishing state funding for soil surveys.

Since 1977 the Department established an alternative fuels program which led to conversion of the entire fleet of Illinois state cars to gasohol.

The Department also undertook a program to identify markets for agricultural by-products which were being wasted.

Farmers received further protection from the Department in their grain marketing.

Under Block, the most comprehensive grain handling industry regulations in the nation were enacted into law. The Illinois law now is a model for other states seeking to protect farmers.

Block guided agency participation in a state-wide effort to develop pesticide container disposal procedures. Efforts likely will reduce regulatory

duplication and minimize the compliance burden to agriculture, Block says.

Block and the Illinois Department of Agriculture are credited with playing a leading role in Congress passage of the Swine Health Protection Act of 1980.

It's not surprising that an influential hogman would have pushed for a law giving the nation's swine industry more protection from the dread African Swine Fever disease.

Illinois became the first state in the nation to be Mycoplasma Gallisepticum free. That state pioneered efforts to eradicate the turkey disease.

It also has a nationally recognized information program to alert practicing veterinarians and cattle producers to the threat of cattle scabies.

Block also pushed for greater understanding between the farm and city people of the state through several programs including country fairs. Upstate-Downstate differences are legend in Illinois. The Chicago Country Fair Farm-City day, and farm visits for minority and inner-city children may help to lessen the difference.

A nutrition and ag education program was developed to provide resources to schools. A number of consumer information activities were instituted to expand off-farm awareness of food and food products.

Under Block, Illinois Ag Department implemented a long-range system of goals and objectives planning, including a data planning and information study section.

The first employee training program to increase efficiency and skills of ag department employees was instituted.

Meantime Block was working as vice president of the National Association of State Departments of Agriculture.

Perhaps more immediate to his being nominated U.S. Secretary of Agriculture Block was a strong Reagan supporter. He was ag advisor on Reagan's Voters Advisory Council chaired by Elizabeth Dole.

He served as a member of Reagan's Agricultural Task Force.

He is apt to bring to Washington a bit of the old Earl Butz philosophy. He did serve as a member of the former U.S. Ag Secretary's Committee on Feed Grains and Soybeans in 1977.

Other than that association, Block is slim on Washington experience.

He is likely to be a strong proponent of free market opportunities for farmers already being on the record as opposed to embargoes. But he has said he would

support the use of food as a weapon.

One of his early problems will be to get to know the Washington scene as well as he has gotten to know the international export scene.

There should be little surprise that a mid-westerner was nominated as Agriculture Secretary. The fact he is from the grain belt will help him with a number of influential people on the Hill at Washington. What his reception will be among the Southern farm bloc remains to be seen.

It should come as no surprise that a man who

maintains the kind of schedule Block has kept in past years is something of a physical fitness buff.

Block describes himself as an avid runner and has competed in a number of races.

He counts his finish in this year's Boston Marathon as an important achievement. Indeed many persons with fewer than Block's 45 years would like to list a finish at the Marathon among their accomplishments.

John Block and his wife Sue have three children—a son and two daughters.

Uni-Loader... for power-in-hand command

**SEE YOUR LOCAL
DEALER FOR A
GOOD DEAL ON A
CASE UNI-LOADER**

Uni-Loader design eliminates pedal controls. Helps dairymen get their scraping, lifting, dumping and other backbreaking chores done faster and easier, without unnecessary "steps" to coordinate foot and hand movements. Two hand levers control everything—power, speed, direction, loader and bucket functions.

Other productive advantages include hydrostatic 4-wheel drive for smooth going with infinitely variable control. 360° turn capability for getting in and out of pens, out-

buildings and other tight spots with ease. Quick parts and service—with dealer access to the Case nationwide network of computer-linked parts depots.

See your nearby Case dealer for the Uni-Loader to suit your needs. Available in 16, 30 and 45 hp models with lift capacities up to 1700 lbs.

Lebanon Co. names 4-H Steer, Pig Roundup champs

BY SHEILA MILLER

LEBANON — It was a frosty, winning day for three Lebanon County young women on Saturday at the Lebanon Fairgrounds as they tied up three of the four championships during the county's 4-H Beef and Pig Roundup.

In the steer competition, the grand champion was shown by Kelly Heisey, R7 Lebanon. Her Chianina x Angus crossbred steer, 'Fonzie', was the first

project for the twelve-year-old.

Kelly topped the medium heavyweight class with her 1290 pound entry before being tagged by Judge J. Clyde Brubaker, Lancaster, as the best steer in the show.

Not only did Kelly's steer get recognized as being the best. Kelly, herself, was selected as champion showman. Not a bad first year for the 4-H'er who hails from a 240 acre dairy farm.

The reserve grand

champion steer was exhibited by Dorene Eberly 'Blackjack', another Chianina x Angus crossbred followed the grand champion steer in their class of medium heavyweights Dorene, too, received special honors for her fitting skills — she was chosen reserve champion fitter

The champion buddy steer was shown by Dorene's brother, thirteen-year-old Bryan Eberly. Bryan, in his third year of 4-H, earned the

reserve champion showman honors while showing Champ

The champion fitter award went to ten-year-old Rodney Bomgardner who clipped, washed, brushed and combed his Maine-Anjou x Hereford crossbred to earn the top honors

When the time came for the 4-H'ers to sell their steers, the buyers went all out to break last year's record

Lebanon Valley National Bank topped the bidding on (Turn to Page B13)

Rodney Bomgardner received the champion fitter at Saturday's Roundup.

Showing the grand champion steer was quite an accomplishment for first year beef steer exhibitor Kelly Heisey. She was named champion steer showman.

The reserve grand champion steer, 'Blackjack', was exhibited by Dorene Eberly, the reserve champion fitter

Bryan Eberly showed the champion buddy steer, 'Champ', a Chianina x Angus crossbred steer. Bryan was also selected reserve champion fitter.

Mike Firestone of the Lebanon Valley National Bank pats 'Fonzie', the grand champion steer exhibited by Kelly Heisey. A long-time supporter of the Lebanon County 4-H program, the bank continued its tradition of buying the champ. This year the price tag was \$1.40 a pound.

The reserve grand champion market hog was exhibited by Bonnie Arnold

Tom Arnold's grand champion market hog sold to People's Bank, Lebanon, for a record \$4 a pound. Setting the new winter sale record were G. Harold Bucher, Senior Vice-President, center, and Joseph K. Kreider, Director, right.

Lebanon Co. Roundup

(Continued from Page B12)

the grand champion and bought the steer for a whopping \$1.40 per pound, beating their 1979 bid of \$1.20 per pound and earning Kelly Heisey \$1806. Contending bidder on the steer was Wenger's Farm Machinery, Myerstown.

The reserve grand champion steer went to Glenn Kilmer of Kilmer's Country Meats, Myerstown, for \$90 a hundredweight.

The twenty-two steers auctioned at Saturday afternoon's sale averaged \$82.70 a hundredweight and averaged 1335 pounds.

In the market hog show, Tom Arnold guided his Yorkshire x Duroc crossbred to grand champion honors for the hog and himself. The hog was selected as grand champion by Lancaster County's Mark Nestleroth,

while Tom was chosen champion showman.

Keeping it in the family, Tom's sister Bonnie showed the reserve grand champion market hog. Her entry was a Yorkshire x Duroc cross whose mother was also the dam of the top-indexing boar at the Delaware Test Station this past year, according to Arnold.

The champion fitter honors went to Mark Deaven of Fredericksburg. He also exhibited the reserve champion buddy hog.

The champion buddy hog ribbon went to fifteen-year-old Jodi Kreider and her Duroc x Yorkshire crossbred.

This year's hog sale was a record breaker in both price and numbers. There were over sixty hogs sold for an average price of \$80 per cwt. Last year, only 19 hogs were

sold, with their sale price averaging \$79.56 per cwt.

The grand champion's price tag was no exception to the record-breaking trend. Auctioneer Harry Bachman's gavel rapped down on the stand when bidding stopped at a new high for the winter sale of \$400 per cwt. Contending bidder on the champion was Hatfield Packing who purchased the 1979 champ for \$210 per cwt.

Hatfield then settled for the reserve champion hog and purchased it for \$240 per cwt.

Other buyers contributing to the success of the sale included LeAnn Yorkshires, Henry Arnold and John Ansbach, Wenger Farm Machinery, Lebanon Agway Farm & Home Center, Evergreen Tractor Co., Keller Brothers

(Turn to Page B14)

Last year's champion steer exhibitor was this year's champion hog exhibitor and showman — Tom Arnold.

Jodi Kreider exhibited the champion buddy hog.

Hatfield Packing bought the reserve grand champion hog for \$2.40 a pound. The hog was exhibited by Bonnie Arnold, Lebanon.

STRASBURG — Six Atlantic Breeders Cooperative headquarters employees were honored recently for their records of service to farmer-members.

Willis Ritchey, 1829 Stevens St., East Petersburg, was cited for completing 30 years of employment in the position of Technical Services Manager, he is responsible for training farmers in the technique of artificial insemination to breed their own cows. He also assists with training Atlantic's Professional Technicians and conducts farm tours for visitors to see progeny of Atlantic's bulls.

Roger Gundlach, 1730 West State Street, East Petersburg, was recognized for completing 20 years as communications manager in charge of the Cooperative's information and advertising program.

Franklin Reichard, 416 Owl Hill Road, Lititz, was honored for completing 20 years as herdsman of the bulls.

Joan Frantz, 186 Warren Way, Lancaster, received an award for 10 years of work in the data processing department.

Five-year award were presented to Kevin Oniffrey, 1549 Princess Anne Drive, Lancaster, printing press operator, and Betty Stoltzfus, 53 West Ridge Drive, Leola, WATS Supervisor.

The awards were presented by David Yoder, Atlantic's General Manager, at a banquet for headquarters personnel held at the Historic Strasburg Inn Restaurant.

**On being
a farm wife
- And other
hazards**

Joyce Bupp

There must be something good to be said for sub-zero temperatures with breath-snatching wind, like the stuff that rolled in over us last week. But I can't think of anything.

Wait, there is one advantage to such numbing cold. Once the outside air turns that bitterly nasty, our usual winter lows of 20 degrees seem relatively bearable by comparison. In fact, we almost start to perspire when the thermometer climbs to a balmy 32 degrees and Jack Frost's masterpieces dissolve in dirty drops sliding down the wall of the calf pen.

Zero and howling wind is uncomfortable, inconvenient and expensive for everyone who has to go outside for any reason, start up a vehicle or pay to heat a home.

But zero and howling wind on a farm, with livestock outside to tend, equals sheer non-stop, 24-hour frustration.

Let the weatherman merely breathe a hint of an Arctic air mass headed this way from Canada and our pipes to the heifer barns start swelling with anticipation of a rest from regular water deliveries. Then, watering animals, which we normally take for granted, becomes a slip, slide and carry-from-the-barn-over-the-icy-blacktop twice-a-day marathon.

And every livestock producer (and his wife) knows that animals gulp down hand-carried water with three times the gusto of the ordinary stuff that flows out at the touch of a nose to an automatic fountain.

Other interesting occurrences further complicate sub-zero weather farming.

Tractor batteries slip into a coma and refuse to stir to life without at least an hour of intravenous persuasion via a battery charger.

Unloaders turned onto dig out silage frozen on top of a packed and matted pile of chopped corn immediately sputter, groan and bust a belt.

The cement block that I use to block the calf barn door either open or shut, as needed, freezes to the ground, necessitating a field-goal type kick and potentially bruised toe before it yields.

And inside the calf barn during the bout with bitter weather last week, even the drain to the sink froze shut. That gave us a scenic little miniature skating rink on which the calf nurser bottles skidded around aimlessly as we attempted to fill them.

There is one more nice thing that can be said about such weather. It makes last summer's weeks of hot humid air a pleasant memory.

Make every bite right.

**Combine
Ensilimixer®
feed mixer,
with scales,
and a
Jamesway
TMR system.**

You can increase production. Reduce feed costs. And improve labor efficiency. All, when you use an Ensilmixer feed mixer, with scales, by Oswalt® to round out your Jamesway Total Mixed Ration (TMR) feeding system (including silage distributor unloaders, conveyors and cattle feeders). Or, use it with any mechanized feeding system. Whether you prefer the stationary, trailer-mounted or truck mounted model, it's a real profit building management tool.

Unique mixing pattern blends feed thoroughly. Three augers move feed from front to back and side to side. Reverse flighting at both ends lets feed fall freely for recirculation or discharge by the bottom auger. Uniformly mixes even partial loads.

Precisely weighs ingredients. Accurate weighing means consistent, balanced rations, eliminates waste. Lets you calculate the amount of feed needed and mix that much. Weigh bar system is standard, electronic scales optional.

That's why the Ensilmixer feed mixer, with scales, and TMR feeding system are right for you as well as your cattle. And, can help make raring just a little bit better. Ask your Jamesway Power Choring dealer.

We Have Models In Stock - Available At:

DEPENDABLE MOTOR CO.

East Main St., Honey Brook, PA

ON PARTS****MF SERVICE - Because you deserve the very best.**

As you know, all machines break down at some time. And it usually happens when you can least afford the time. But when you call us, help is on the way in no time. Because we make sure you get the service you need, when you need it. Our mechanics and service personnel are specially trained to locate mechanical problems fast and go straight to the solution.

And they stay up to the minute on the latest machinery technology too. That means we'll have you back at the wheel and rolling again in no time. You've got what it takes with Massey Ferguson.

Sizes 20' to 36'

The Series 42 WingPacker is available
 in sizes from 20 through 36 to fit your
 every application. Choose the size that
 best fits your operation. If you want to
 pull the Series 42 behind a disc harrow
 or field cultivator, choose a size to allow
 for plenty of overlap

All Hydraulic Operation

A single hydraulic control operates all
 functions on the Series 42. A simple
 movement of the hydraulic lever places
 the WingPacker in transport position
 then the wings fold up and over into
 their flat storage position. Reversing
 the sequence the center section is first
 lowered to the ground followed by the
 wings unfolding

IN STOCK

 Hydraulic Fold 22 Pt. Wide
 Transport Width 12 ft.
 Cylinder and Hose to Tractor

\$6400.00

Wings fold hydraulically for handy transport and turning in the
 field. They can be pinned for safety and to take the load off the
 cylinders in transport. The long, sturdy double hitch pole adds
 stability to wide models, eliminates wobble in rough fields ab
 sorbs the strain of trailing planters or fertilizer nurse tanks

Now You Can Cut Your Crops Quickly,
 Without Plugging, With Gehl's

JUST ARRIVED

Turn plowed ground
into finished seedbeds

**International®
415 Packer-Mulcher**

Makes plowed fields into firm finished seedbeds in one trip over. Helps you take full advantage of critical spring working days, and get better seedbeds as well. Crushes both surface and buried clods. Sizes from 12 1/4 to 15 feet non-folding. 20 1/2 and 25 1/2-foot wing-type folding.

- Spring-loaded self-leveling hitch assures even work in rough terrain
- Massive channel steel frame stands up to rigor of rough work
- Big 17-inch notched packer wheels offer extra weight for complete crushing action, "crow feet" wheels available as an option
- Regreasable triple-sealed gang axle bearings extend service life
- Spring-tooth penetration controlled hydraulically

Let's arrange a demonstration. Finance plans available.

NEW International

Early Riser Planters

**FASTER, EARLIER PLANTING—
EARLY RISING CROPS.**

Introducing the International Early Riser Planters, the planters for the 80's. Early Riser Planters are designed to work through the toughest terrain. To let you plow less, plant sooner. Faster, too — with simple hand adjustments that get you going in minutes. No tools. And the Early Riser Planters provide the best possible seed environment to start your crops out right.

Choose from four to twelve row Early Riser sizes. Cyclo Air or Plate models. The Early Riser Planters.

TORQUE AMPLIFIER, CLUTCH & TRANSMISSION PARTS & SERVICE

TA UNITS GUARANTEED UP TO 2 YEARS.

Rebuilt TA assemblies available for all IH tractors, New and rebuilt water pumps. Dynalife clutches and pressure plates for A, B, C through 1586, also for most models of IH combines.

If you are operating a shop or are a farmer who does his own mechanical work, then you will do well to compare the parts which I have to offer. Complete TA assemblies for 706-1586 are priced from \$525 and come with a Dana Co Heavy Duty Sprag clutch instead of the usual IH sprag. The Dana Sprag is guaranteed for 2 years against failure. Ramps and Carriers for older style TA units are priced \$135 & \$145 respectively, and carry a 90 day guarantee.

We have most parts needed for TA repair in stock and are prepared to do complete installation at competitive prices.

Shop is also now available for engine overhauls and other major tractor repairs
For a no obligation estimate or for information and references write or call me

GUNITE

Silo Relining

& Repairs

Extensive tests have
been conducted on
Gunite. Below are some of
the properties of Gunite

1. Excellent bonding
2. High Density
3. Extreme strength and hardness
4. High resistance to abrasion

The excellent physical
properties of the material
are due to the water
content being only the
amount needed to satisfy
chemical hydration
Reseal and re-
strengthen your silo with
Gunite

The ATTA GLANCE COW DIARY

The simplest most economical dairy breeding record available keeps your entire herd's yearly breeding record constantly available / Atta Glance

50 cow size
costs \$44.95
is 24 x 42 has mounting straps and can be wiped clean

Keeping records is as easy as pushing a thumb tack into a bulletin board. Each cow's name or number is placed in the left margin on any of the 50 horizontal lines using embossing tape (shown above) or use felt tip or c. case pens. Color coded pins are then placed on that line to record the dates of breeding and freshening

BLUE CHIP OPPORTUNITY IN AGRICULTURAL SALES

Penn Dutch Farm Systems, Inc., is seeking experienced oxygen-limiting bottom unloading silo sales representatives. Maybe you have noticed our presence in the field. SEALSTOR is growing very rapidly in this area. We have several good and protected territories open in Central and Eastern Pennsylvania, Maryland, and New Jersey, and will give you an area to cover that will allow you to be successful.

No territory cutting - No high pressure selling. Just a good selling opportunity for the right person. If you are interested in a career in selling the fastest growing bottom unloading silo, and liquid manure systems on the market, call or write for a confidential interview.

Russell Darkes, Jr.

How did Pioneer 3591 and DeKalb XL-55a do against Jacques JX180?

Our new Yieldbook shows you the results of Jacques hybrids against top competitive varieties. Most tests have at least one main Pioneer or DeKalb number.

You can't decide whether to plant one of these two old standbys next year without comparing them to possible replacements like Jacques.

We give you the information you need to do just that. The tests of our hybrids against top competitors make the hottest reading in the corn belt.

These tests are run just the way you would want: field length rows combined and moisture-tested out in the

open and the results published for everyone to see — even when we lose. Is there any other company that you know of that does all that?

Send for your free 1980 Yieldbook now. Then sit back and study how your present hybrids did and which ones may need to be weeded out.

We bet you'll find an hour spent on this will make you more money than any other hour you can spend. Send in the coupon right now.

1980 Field Shelling Trial

Fred Bechtel
Curryville, Pennsylvania

Planted: May 5, 1980 in 34 inch rows
Fertilizer: 100 lbs actual N as Urea plowdown 200 lbs 10-20-10 starter
Soil Type: Clay Loam
Insecticide: Furadan
Weed Control: Atrazine and Lasso with planter
Previous Crop: Corn
Harvested: October 20, 1980 with a 6500 John Deere

Farm wife practices nursing too

BY JOYCE BUPP
Staff Correspondent

Trying to catch Treva Markey for a couple of pictures is like chasing after a honey bee

With an unspoken purpose of helping others, Treva quietly goes about her full schedule of responsibilities, touching the lives of countless people, and leaving a bit of accomplishment and cheer behind at each stop.

Treva is a farm wife, married to Dwight Markey, of Joppa Road, and the partner in a greenhouse, truck farming and market stand business for nearly 30 years. She's also the mother of three daughters, a grandmother, and church and community leader.

But this busy woman wears yet another, most unusual, hat.

A licensed practical nurse, Treva is the Blood Bank Coordinator for York's Memorial Hospital, a position she's held for 13 years.

Two days each week, she schedules and processes volunteers who generously donate a pint of blood for the hospital's store of the vital life-saving fluid. Treva also does occasional private duty nursing, which once filled most of her professional nursing hour.

One blood donor on a recent afternoon was Elmer Hall of 2675 Lewisberry Road, York. Hall is an employee of Consolidated Freightways and one of the numerous blood donors that Treva calls in on a regular basis, perhaps once in every six to nine months. Other donors are likely to come in response to urgent blood needs for a friend or relative.

Before Treva can accept an individual's donation of blood, she must run a hemoglobin test. Taking just a drop of blood from a tiny puncture to a finger, she then runs that sample through the computerized Coulter Counter machine in the hospital blood lab next door to her offices.

"That test gives us the red cell or hemoglobin count, and performs several other tests as well," she explains. "Basically, it tells me that a donor can afford to lose a pint of blood with no harm to his health."

About 45 minutes are required for the complete processing of a blood donor. After the hemoglobin test shows that the donation is safe for the volunteer, Treva takes the donor's blood pressure and temperature. When those vital signs also show that the donor is in normal good health, the actual blood donation can then be started.

It takes only about five minutes for the fluid to fill the sterile plastic blood storage bag, with pre-measured amounts of anti-coagulant. When the bag is full, an automatic trip device stops the flow from the vein in the donor's arm.

A long, narrow, clear plastic tubing, extending from the bag, is also filled with blood. Using a special machine, Treva clamps that tubing into small sections, each about three-inches long and automatically marked with a corresponding number. Before any of the stored blood can be used on a patient, those marked samples are run through an hour-long series of tests, including mandatory sampling required for records of the state.

Blood is then refrigerated at 40 degrees and can be used in a variety of patient needs. As it cools, the blood separates, with the red cells dropping to the lower portion of the plastic bag and the white cells, or plasma, rising to the top. Depending on the needs of a patient, either whole blood can be given or the red and white cells can be used separately as needed.

When the actual donating process is finished, Treva offers her donors fresh orange juice and cookies or

Treva Markey, a licensed practical nurse and partner in a greenhouse and truck farming

business, checks the Coulter Counter as it performs a hemoglobin scan on a potential blood donor

pretzels, foods to help quickly boost the body's sugar count. Donors are asked to stay and rest for a brief period, a precautionary ten or fifteen minutes of time to monitor them for any possible reaction.

Treva also presents each donor with a peel-off sticker, colored in brilliant red and shaped like a drop of blood, that announces, "I helped save a life today."

Before they can become a donor, volunteers must sign a release form that also includes the hospital's recommendations for post-donation care. Donors are advised to drink extra fluids for the following several hours and eat hearty meals. No strenuous athletic activity is recommended for a 24-hour period.

According to Treva, the body quickly replaces such amounts of blood loss and quantity levels return in just a few hours under the body's normal health conditions.

At all times, no matter where she is any day or night, Treva knows that "Plan Purple" could go into effect. "Plan Purple" is the hospital's large-scale disaster code.

Periodically, "Plan Purple" is run, always thus far as a practice drill. However, when staffers receive the disaster warning, they never know if it's another practice run, or a genuine emergency. In case of a large-scale disaster happening, Treva has emergency blood donor processing methods at her disposal, in addition to the hospital's usual methods of blood screening.

On those days that she doesn't don her white uniform and supervise the blood program, Treva can be found in a score of places fulfilling her role as an operating family-farm partner.

Serving and preparing for retail customers at their stands at the area's farmers' markets claims many of the Markey's hours. Fresh produce is a mainstay of the year-round retail stands, with many of the vegetables raised on the several acres of truck crops included in the operation.

Much of Treva's time at home revolves around the seven greenhouses clustered near the farmhouse. Bulbs, annual bedding plants, a variety of vegetable seedlings, mature decorative indoor plants, hanging baskets and fresh floral arrangements are all part of the floriculture side of the retail-wholesale and market business.

As the last Christmas poinsettias, bought in for resale, were going home with regular market customers, Dwight and Treva were already well into the scheduling of the Easter line of potted bulbs that must be brought into

Homestead Notes

bloom at just the right time. In order to better handle their bulb forcing schedules, the Markeys are in the process of remodeling their barn to include a large bulb cold storage refrigeration unit, just a part of the expansion program recently begun.

The Markey's have three daughters, Donna Jean, Carol and Bonnie. Donna is married and her year-old son is Dwight and Treva's first grandchild. Carol is a secretary for the Campbell Chain firm in York and Bonnie is a junior at Juniata College, studying chemistry and biology with plans to further her studies in the medical field.

Through their daughters, the Markeys have gotten involved in the American Field Service program and have hosted numerous foreign visitors. In 1973, they were the host family to two Finnish students and in 1978 opened their home to a German high school exchangee.

Treva serves as president of the AFS's adult chapter at Dallastown Area Schools and recently held a dinner for the school's two current exchange visitors, one from Australia and one from Spain.

Their interest in hosting visitors from around the world grew even stronger when the Markey's were invited to become part of Friendship Force, an organization founded by President Jimmy Carter to expand the goodwill between nations.

Last May, Friendship Force took a planeload of 354 travelers from the area to live with West Berlin families for ten days, and returned with an equal number of German travelers hosted a week and a half by local families. Since the exchange took place over their extra

(Turn to Page C4)

Elmer Hall, a blood donor, has his blood pressure and temperature checked by Treva. Both must be normal before final preparations can begin for the actual donation of blood.

When a pint of the life-giving fluid has filled the plastic storage bag, an automatic trip is activated to shut off the flow from the donor's vein

**Shorten refill stops
by equipping your
7000 Max-Emerge™ Planter
with Quik-Fill™
attachments for liquid
or dry fertilizer**

Getting good stands is important. That's why Max Emerge Planters feature up-close gauge wheels, Tru-Vee™ openers and angled firming wheels to help you get better germination and emergence.

But completing planting on time can be important too, especially if you're carrying dry or liquid fertilizer. Quik Fill attachments for dry or liquid fertilizer make refilling easier and less time consuming, especially important when you're striving for maximum yields. Come in and visit about Quik-Fill attachments and all of the other attachments in the Max-Emerge Planter line that can help you do a better, quicker job of planting.

PERFORMANCE PROFILE

**More traction, more pull
power with front-
wheel-drive option on
John Deere 40-, 50- and
80-hp Tractors**

John Deere 2040, 2240 and 2940 Tractors offer a mechanical front-wheel-drive option to boost pulling performance in slick or soft conditions. You get excellent front-axle clearance, fingertip control of on-the-go engagement and disengagement, and a limited-slip front differential. The MFWD option is packaged with a synchronized 8-speed transmission on 40- and 50-hp models. On the 80-hp 2940 you get the synchronized transmission plus hydraulic Hi-Lo for 16 speeds, standard front-wheel drive is optional. Stop in soon for the complete list of features on these tractors and the performance-boosting MFWD option.

Pure and Simple

John Deere "Little-Big" Diesel Tractors

John Deere "Little Big" tractors are built to handle a number of jobs, using just a fraction of the fuel often required of larger tractors. They're basic, simple tractors designed for easy upkeep, easy operation. Tractors that take a turn at mowing, loading, digging postholes, dredging ponds, plowing and planting ... then come back for more.

And there are three models to choose from — the 850 with 22-PTO hp, the 950 with 27 PTO hp and the 1050 with 33 PTO hp*. All have a 3-cylinder wet-sleeve diesel engine ... 8-speed transmission ... differential lock ... color-coded controls ... and more. The 3-pt. hitch handles Category 1 implements ... and features load-and-depth control on the 1050. The 540-rpm PTO (continuous-running on the 1050) engages with a conveniently located lever.

The 1050 is turbocharged for more power, smoother operation. Both the 1050 and 950 can be equipped with mechanical front-wheel drive for added traction.

If you need a compact tractor that doesn't require a degree in advanced mechanics to service and operate, see us today. We have a "little-big" tractor, plus the implements you need for your particular operation.

*Maximum PTO horsepower at 2600 engine rpm for the 850, 2400 engine rpm for the 950 and 1050 by official test.

Homestead Notes

(Continued from Page C2)

busy Mother's Day market plant sales weekend, Dwight and Treva offered to be hosts, rather than participants.

Later this summer, they returned the visit, spending three days with their new friends in West Berlin. Such trips are not new to Dwight and Treva, who are enthusiastic and extensive travelers. They've visited friends in South America and been to Europe twice, including the Scandinavian countries.

Two years ago, the family purchased a self-contained mobile home camper, and have visited 49 of the 50 states, including Alaska, in the past several years. Dwight is an ardent photographer, combining that hobby with the camping interest.

Before she became a farm wife, Treva served some time with the Brethren Volunteer Service, a corps of both foreign and domestic mission workers for the Brethren Church. Her dedication to similar programs have kept Treva deeply involved in her local Fairview Brethren Church, where she teaches an adult Bible class, as well as in church affiliate groups.

Recently, she served as the president of the auxiliary of the Brethren Home at Cross Keys, in Adams County. The auxiliary plans special programs, such as picnics, holiday parties and barbecues for the home's elderly residents, as well as organize highly-successful fund-raising drives. During the last three years, some \$70,000 was raised for the Home's building fund, with the women pledged now to earn another hundred thousand dollars in the next three years.

Treva also represents the church's central Pennsylvania district on the board of Bethany Hospital, a general medical care facility located in Chicago and sponsored by the Brethren Church. That board is presently overseeing construction of a new hospital and Treva has traveled to Chicago in the past to visit the hospital.

The Markey's are members of the York County Farmers Association and Treva is a charter member of Agri-Women. This past November, Penn's Agri-Women hosted the national convention and Treva handled the bank accounts as the convention's financial chairman.

Modest and dedicated, Treva is embarrassed when praised about her accomplishments. Her philosophy probably comes pretty close to the poster that adorns the wall in the blood program office at Memorial Hospital. It says "Sometimes it takes more than love - give blood." That's what Treva Markey gives to others, not only her love, but her time and her leadership as well.

Saturday, January 3

Lancaster Society 6 meets at the home of Martha Eshelman to hear Pastor Earle Fike.

Wednesday, January 7

York Society 1 to meet with Evelyn Paige.

Thursday, January 8

Lancaster Society 21 meets for a game night at the home of Alice Ressel.

Friday, January 9

Lancaster 13 meets with Laura Denlinger and Ethel Landis with a 50 cent gift.

Saturday, January 10

Lancaster Society 19 meets at the Landisville Church of God for a cancer sewing program.

Save that poinsettia for next year

LANCASTER — You can enjoy the poinsettia you received for Christmas beyond the holidays if you follow these tips. Keep your poinsettia in a sunny, warm window but make sure it is not drafty. If there is danger of chilling at night take the plant out of the window before you go to bed.

Try to maintain soil moisture at moderate and uniform levels. The soil should be neither too wet nor too dry. When the top of the soil is dry, water it.

After the plant stops blooming and the leaves begin to fall, gradually stop watering it. The leaves will soon turn yellow and fall. Store the dried-off plant in a cool dark basement at 50-60 degrees until April or May and water it lightly. Give it just enough water to keep the roots and stems from drying out.

In May, cut the stems back 3 to 5 inches and repot the

poinsettia. Then put the plant in a warm sunny place in your yard and keep it watered and fertilized during the summer.

Before cool weather sets in next fall, bring the plant inside again and put it in a window facing south where it will get lots of light.

If plants are to flower they must be kept in darkness from 5 PM to 8 AM from the first of October to Thanksgiving. It takes a lot of special care but some people like the challenge of trying to flower their 1980 poinsettia for Christmas 1981.

Microwave an easy meal

Millions of Americans live alone today and still more in two-person households. Convenience, versatility and good nutrition are especially important considerations for everyone in making food purchases.

But if the size of your household isn't the most important factor when you cook, and speed is, then either way you'll love using that energy and time-saving microwave oven.

Even though life styles of today's households differ widely, their food requirements are similar. A microwave can fit easily into your lifestyle whether you love to spend lots of time cooking or you just want to "get it over with." It also will help you maintain your tradition of serving nutritious meals, but at a faster pace.

Here are some recipes which will both save you time and put a smile on your family's face.

The Chicken-Broccoli dinner is a chicken lover's delight which will serve two without waste. But if you have a larger family, simply double the ingredients. Either way it's sure to please.

CHICKEN—BROCCOLI DINNER

- 2 broiler-fryer chicken breast quarters
- 1 tablespoon margarine
- 1/2 cup white wine
- 1 teaspoon bottled browning sauce
- 1/2 teaspoon paprika
- 1 packaged (10 ounce) frozen broccoli
- 1/2 teaspoon salt
- 1/8 teaspoon pepper
- 1 cup cooked rice
- 1 teaspoon parsley

Stove Top Method: In small frypan, melt margarine over medium high heat. Add chicken and brown evenly, about 10 minutes. In small bowl mix together wine, browning sauce and paprika; pour over chicken, cover and reduce heat to low. Cook about 30 minutes then add broccoli, salt and pepper. Cook, covered, 10 minutes more; stir in rice and parsley and cook about 5 minutes more to heat thoroughly.

Microwave Oven Method: In small dish, mix together margarine, wine, browning sauce and paprika, place in microwave oven and cook on high for 1 minute. In small baking dish, arrange chicken and baste with above sauce. Cover and cook on high for 6 minutes. Rotate chicken, baste and add broccoli, salt and pepper. Cover and cook 6 minutes more on high. Add rice and parsley, stirring into pan juices. Cover and cook 3 minutes more on high or until fork can be inserted in chicken with ease. Let stand 5 minutes covered before serving. Makes 2 servings.

Chicken-Broccoli Dinner is tailored to meet the food needs of small households and the fast pace of both large and small homes. Like other good microwave meals, it is done in a matter of minutes

and still offers the essential vitamins your family needs to keep them active and healthy. For larger families, simply double the recipe and double the fun.

SUNDAY BRUNCH FOR FOUR

- 1 10 3/4 oz. can cream of mushroom soup
- 1/2 cup (2-oz.) shredded Cheddar cheese
- 2 tablespoons milk
- 1 tablespoon finely chopped onion
- 1/2 teaspoon prepared mustard
- 4 eggs
- 2 English muffins, split, toasted

Combine soup, cheese, milk, onion and mustard in 1 1/2-qt. casserole dish. Cook 3 1/2 to 4 minutes on FULL POWER or until mixture boils. Stir, reserve 1/2 cup sauce. Carefully break eggs into sauce. Pour reserved sauce over eggs, cover. Cook 4 minutes on FULL POWER. Let stand 2 to 5 minutes or until eggs are desired degree of doneness. For each serving, spoon egg and sauce onto muffin half. Sprinkle with paprika, if desired.

ZUCCHINI CASSEROLE

- 1 teaspoon salt
- 2 medium zucchini, diced
- 1/4 cup chopped onion
- 2 tablespoons flour
- 6 eggs
- 1 cup milk
- 1/2 teaspoon basil, crushed
- 1/2 teaspoon oregano, crushed
- 2 cups (8-oz.) shredded mozzarella cheese
- 3 crisply cooked bacon slices, crumbled

Sprinkle salt over zucchini, let stand 10 minutes. Combine zucchini and onion in 8-inch square baking dish, cover. Cook 6 minutes on FULL POWER or until crisp-tender, drain. Sprinkle flour over zucchini, toss lightly. Beat together eggs, milk and seasonings. Add egg mixture and 1 1/2 cups cheese to zucchini, cover. Cook 6 minutes on FULL POWER, stir, moving cooked portions to center after 3 minutes of cooking. Stir, sprinkle remaining cheese and bacon over top. Cook 1 to 2 minutes on FULL POWER or until cheese melts. Let stand 5 minutes before serving.

SAUSAGE SCRAMBLE

- 1/4 lb. bulk pork sausage
- 6 eggs
- 1/3 cup milk
- 1/2 teaspoon salt
- 1/8 teaspoon pepper
- 1 7-oz. can whole kernel corn, drained
- 1/4 cup green onion slices

Line 8-inch square baking dish with double layer of paper towels. Crumble sausage onto paper towels, cover with additional paper towel. Cook 2 1/2 to 3 minutes on FULL POWER, remove paper towels. Beat together eggs, milk, and seasonings. Add egg mixture, corn and onion to sausage, mix well. Cover, cook 5 minutes on FULL POWER. Stir in green onion slices. Cook 1 minute on FULL POWER. Let stand 5 minutes before serving.

QUICK CRAB QUICHE

- 1/2 cup light cream or milk
- 2 green onions, thinly sliced
- 1 tablespoon white wine or sherry, optional
- 1/2 teaspoon salt
- 1/2 teaspoon dry mustard
- 1/2 teaspoon tarragon, crushed
- 1 6-oz. pkg. frozen crab meat, thawed, well drained
- 1/2 cup (2 oz.) shredded Swiss cheese
- 4 eggs
- 1 9-inch baked pastry shell

Combine cream, onion, wine, salt, mustard and tarragon in 1-qt. measure. Cook 2 minutes on FULL POWER. Add crab meat and cheese. Cook 1 minute on FULL POWER, stir until cheese is melted. Beat eggs until well blended. Gradually add crab mixture to eggs, stirring constantly. Pour into pastry shell. Cook 15 to 16 minutes on SIMMER. Let stand 10 minutes before serving, center will continue to cook during standing time. 9-inch quiche.

CREAMY MUSHROOM STUFFED CHOPS

- 4 pork loin chops (6 ounces each), 3/4-inch thick
- 1 jar (2 1/2 ounces) sliced mushrooms, drained
- 1/2 cup (2 ounces) grated Swiss cheese
- 2 tablespoons parsley flakes
- 1/2 teaspoon dried sage
- 1 can (10 1/4 ounces) condensed cream of mushroom soup
- 1/4 cup dry white wine or water

Cut pockets in pork chops. Season pockets of chops with salt and pepper. Place chops in 13x9x2-inch baking dish. Cook, covered with clear plastic wrap, at MEDIUM HIGH for 10 minutes, giving dish half a turn once. Drain.

Meanwhile, combine mushrooms, cheese, parsley, and sage in small bowl. Stuff pork chops with mushroom mixture. In same bowl, combine mushroom soup and wine, pour over chops. Cook, covered, at MEDIUM HIGH for 11 to 13 minutes or till pork is done, giving dish half a turn and spooning sauce over once. Makes 4 servings.

SMOKED SAUSAGE 'N BEANS

- 4 slices bacon
- 1/4 pound smoked sausage, cut in 1-inch pieces
- 1 can (31 ounces) pork and beans
- 1/2 cup molasses
- 2 tablespoons packed brown sugar
- 2 tablespoons prepared mustard
- 1 tablespoon dehydrated minced onion flakes
- 1 tablespoon Worcestershire sauce

Place bacon between paper toweling on paper plate. Cook at HIGH for 3 minutes, set aside for topping. Combine all other ingredients in 1 1/2-quart casserole. Cook, covered with clear plastic wrap, at MEDIUM HIGH for 12 minutes or till heated through, giving dish half a turn once. Stir, scraping edges. Lay bacon atop and cook, covered, at MEDIUM HIGH for 2 minutes. Makes 4 to 6 servings.

(Turn to Page C7)

QUESTION - There must be an easier way of broiling steaks so that the oven and the broiler pan don't get such an awful mess. Does anyone know the secret?

Please send all questions and recipes to Lancaster Farming, Box 366, Lititz, PA 17543

How to increase ventilation efficiency

ELIZABETHTOWN — excess amounts of fuel are burned to compensate for a sizable waste of money. Wastage can occur during cool weather or during brooding periods when

Over-ventilation can cause a too high volume of cool air coming into the broiler house from over-ventilation. However, efficient ven-

tilation of the broiler house is important year round and some tips are listed below for increasing the efficiency of your fans and saving money.

Keep fans clean and lubricated and make sure belts are tight and in good repair

Keep shutters clean and moving freely. A dirt build-up on fan blades and shutters can reduce air flow by one-third or more.

When practical, run one fan continuously instead of using several fans that are triggered by time clocks. A fan on a 10-minute cycle starts six times each hour, and the frequent start-ups boost electricity use and shorten motor life

Do not control fan output by restricting the flow of air through the inlet opening. This causes the fan to use slightly more power than necessary for air delivery

Make sure electrical service to the broiler house is adequate. Low voltage

decreases motor efficiency and life. Voltage drops can be prevented by using wire of the correct gauge in the motor. Wire capable of handling 240 V should be used wherever possible.

Don't operate exhaust fans while adjacent windows are open. Move the fans to the center of the house during warm weather so they will create air turbulence. One may want to turn off exhaust fans and use other fans located in the center of the house

Know the rating of a fan. All reputable fan manufacturers have their fans rated by the Air Moving and Conditioning Association. If the manufacturer can't or won't tell a customer the rating of a particular fan, it may be because it won't deliver as much air as is claimed

By following these recommendations energy and money can be saved. Also, the life of your fans and equipment may be extended.

Home on the Range

(Continued from Page C6)

ZIPPY HAM KABOBS

- 1 pound fully cooked ham, cut in 1-inch slices
- 1 green pepper, cut in 1-inch pieces
- 1 can (23 ounces) sweet potatoes, cut in 1-inch chunks
- 1/2 can pineapple preserves
- 2 tablespoons prepared mustard
- 1 tablespoon prepared horseradish

Alternate ham, pepper, and sweet potato on six bamboo skewers. Place in 13x9x2-inch baking dish and cook, covered with clear plastic wrap, at MEDIUM HIGH for 4 minutes, giving dish half a turn once. Meanwhile, combine pineapple preserves, mustard, and horseradish. Brush kabobs with pineapple glaze, turn, and brush glaze on second side. Continue cooking, covered at MEDIUM HIGH for 4 minutes or till heated through, giving dish half a turn once. Spoon extra glaze over kabobs. Serve with rice

If desired, substitute one 15-ounce can pineapple chunks, one pint cherry tomatoes, two oranges, two zucchinis, or one-fourth pound fresh mushrooms for green pepper and sweet potatoes. Makes six 6-inch kabobs.

OVEN BAG MANICOTTI

- 1 tablespoon flour
- 8 manicotti shells
- 1 pound ground beef
- 1/2 cup chopped onion
- 1 clove garlic, minced
- 1 egg, slightly beaten
- 1 cup shredded mozzarella cheese
- 1 teaspoon parsley
- 1 1/2 teaspoons oregano, divided
- 3 cans (8 oz. each) tomato sauce
- 1 tablespoon sugar
- 1 teaspoon basil

Preheat oven to 350°F. Shake flour in large size (14"x20") oven cooking bag and place in 12x8x2-inch baking dish. Cook manicotti shells according to package directions. Brown ground beef, drain fat. Stir in onion, garlic, egg, cheese, parsley and 1/2 teaspoon oregano. In small bowl, combine remaining ingredients; pour 1 cup sauce in bag. Carefully stuff manicotti with meat mixture; place in bag and pour remaining sauce over top. Close bag with twist tie; make 6 half-inch slits in top. Bake 20 to 30 minutes or until hot and bubbly. Makes 4 servings.

Microwave Oven. Follow directions above except close bag with rubber band, string, or 1/2 inch strip cut from open end of bag, make 6 half-inch slits in top. Micro-cook 10 to 12 minutes, turning dish once. Makes 4 servings.

To all Farm Women Societies: Lancaster Farming would like to request that you send in your 1981 yearbooks as soon as possible so we can continue coverage of your scheduled events in the farm women calendar.

Lancaster Co. Society 3

Farm Women Society 3 held their Christmas party at the Fellowship Hall of Salem Lutheran Church, Ephrata, on December 20. Mrs. Salinda Resner and Mrs. Alva Reinhold acted as hostesses.

Connie and Carroll Balmer entertained with instrumental Christmas music. Debbie Harnish and her friends Huggy, Coconut and Kelly presented a ventriloquism show.

Santa Claus visited the gathering and gave each child a gift. Also, ten members received a gift for perfect attendance.

The next meeting will be held January 17 at the home of Mrs. Harold Schoener for a safety talk on woodburning stoves.

Lancaster Co. Society 11

Farm Women 11 met for their monthly meeting December 18 at the home of Mrs. John Swarr.

Members answered roll call by telling something

they plan to do for someone for Christmas.

A \$50 donation will be made toward those who will be going to the state convention.

The members will help carry out a party at the Conestoga View on January 15.

The next meeting will be held January 29 at the home of Mrs. Norman Wood Robert Ross, associated with the ambulance service in Quarryville, will give a talk on his work.

Lancaster Co. Society 13

Farm Women 13 held their annual Christmas party at the Ronks Fire Hall on December 13.

Musical selections were provided by children and grandchildren of members.

Santa Claus visited and gave each child a gift. Members also exchanged gifts.

The next meeting will be held on January 9 at the home of Mrs. Laura Denlinger, 28 Greenfield Road.

Lancaster Co. Society 19

Farm Women 19 and their husbands met for a Christmas celebration at the Rothsville Fire Hall on December 13. Thirty five members were present.

Entertainment for the evening was Bob and Vera Kensinger. Bob, the speaker, had dialogue with the country doctor, Raggedy Ann and Clownie (each portrayed by Vera).

During a short business meeting, out-going president, Naomi Spahr, announced plans for attending the state convention. Betty Saylor and Millie Eshleman will be delegates.

Cumberland Co. Society 15

Cumberland Farm Women 15 held its annual Christmas party, December 13 at the Huntsdale Fire Hall.

Christmas carols were sung and Santa Claus visited. Gifts were distributed to all present.

Secret pals were distributed for the new year.

The next meeting will be held on January 22 at the home of Janet Kutz, Carlisle.

Red meat production drops 10 percent

HARRISBURG — Commercial red meat production in Pennsylvania during November totaled 80.1 million pounds, down ten percent from November 1979. Cattle slaughter at 62,000 head was down from one percent while calf slaughter at 21,500 head was

up three percent from last year.

Hog slaughter at 254,000 head decreased 17 percent from a year ago. The number of sheep and lambs slaughtered totaled 12,700, down four percent from November 1979.

Nationally, commercial red meat production during November totaled 3.10 billion pounds, a decrease of six percent from November

1979.

Beef production at 1.71 billion pounds was down four percent, while veal production at 31 million pounds was down six percent.

Pork production totaled 1.34 billion pounds, down nine percent from November 1979.

Lamb and mutton production increased nine percent to 25 million pounds.

Junior Cooking Edition

Juniors, last week we suggested that you start a hobby of your own. If you still can't decide what you want to study, collect, make and save, then starting at the beginning of the alphabet, write down any ideas which

come to your head. Examine each one and carefully decide which is your favorite.

For instance, A may have included airplanes. Why not make a scrapbook of airplanes? Put together plastic models and display them in your room. Visit your closest airport and museum and take pictures of your trip. Add them to your scrapbook.

Perhaps "A" included art. Visit museums and study other painters. Begin your own sketching, with a pencil and gradually save money for paints, brushes, modeling clay and colored paper.

Try combining interests also. If people interest you, paint them. If your other interest is nature, sketch trees and mountains.

If you like to cook, combine it with gardening this summer.

If you decide on a hobby write and tell us how it is working. Share your ideas with other friends.

Until you decide what you want to collect, decorate some bottles for mom.

Remove the label and paint flowers and leaves on with fingernail polish. Or

Crumble tiny pieces of egg shells. Paint your bottle with colored enamel and add the shells while the enamel is still wet. Or

Tear tiny pieces of freezer tape and cover the bottle completely, overlapping the tape for special emphasis. Cover the tape with any color shoe polish to get an antique look.

To finish, put dried flowers in the bottle and surprise mom.

Now try these goodies. Elsie Zook and Sylvia Beller requested that their recipes be used together. So Elsie and Sylvia and all you other junior cooks, here they are—more cookie recipes.

Nutty Fingers

1/2 cup margarine
1/4 cup plus 1 tablespoon powdered sugar
1 teaspoon vanilla
1 cup enriched flour
1 cup finely chopped nuts

Cream margarine and add powdered sugar and vanilla. Add flour gradually, then add nuts. Form cookies the size of little fingers. Bake at 370 degrees for 8-10 minutes or until lightly browned when cool. Roll in powdered sugar.

Elsie Zook, Age 10, Atglen

Yummy Cookies

1 cup sugar
3/4 cup butter or lard
2 eggs
1 tablespoon water
2 1/8 cup sifted flour
2 teaspoons cinnamon
2 teaspoons baking powder
1/4 teaspoon salt
2/3 teaspoons raisins
2/3 cups chopped nuts

Cream together the sugar and shortening, add well beaten eggs and water, flour sifted with salt, baking powder and cinnamon. Last of all the raisins and nuts, well dusted with flour. Mix thoroughly.

Sylvia Beller, Age 10, Christiana

Egg production increases six percent

HARRISBURG — November 1980 egg production in Pennsylvania totaled 360 million according to the Pennsylvania Crop Reporting Service. The November production was six percent above the 341 million eggs produced in November 1979.

The November average of 16.8 million layers was three percent higher than a year ago. Egg production per 100 layers was 2,140 compared with 2,079 in November 1979.

The nation's laying flocks produced 5.77 billion eggs during November, slightly below the 5.79 billion produced a year ago.

The number of layers for

November averaged 293 million compared with 295 million a year earlier. Egg production per 100 layers during the month was 1976 compared with 1977 a year ago.

THAT EGGNOG HAS ENGLISH ANCESTRY

Nog comes from the word, "noggin," meaning a small drinking vessel with an upright handle. Eggnog has been popular in England for centuries, but it probably came from the Canary Islands or Spain because it contains wine. Eggs, milk, ale or sack, a dry wine, are standard ingredients for eggnog.

Throughout its early years, eggnog was known by many other names: egg-pop, custard posset, syllabub, milk punch, flip, one yard of flannel and auld man's milk. Instructions for making it appeared in diaries and travel notes. Later it was included in cookbooks under "Invalid Foods."

However, according to travel diaries, many comforted themselves with eggnog enroute to their destinations. And eggnog was found at a number of taverns, so it didn't take much persuasion to use it for socializing while engaged in holiday travel.

Eggnog parties were very popular in the nation's capital during the whole period between Christmas and New Year's. Members of the Cabinet and Congress as well as Washington socialites looked upon this time as a good season to make their rounds. Southerners, then and now, keep a pitcher of eggnog refrigerated for such a time as callers appear.

Whether you make your own or buy it ready-made, eggnog is an easy refreshment to serve during the holidays. It's a sip-able way to toast your friends

with a "Merry Christmas or "Happy New Year

ABOUT HOW TO STORE CHOCOLATE

Chocolate is becoming more and more of a precious commodity as the price indicates. If you received chocolates for Christmas and want to portion out the goodies past the holiday season, here are some tips on how to store chocolate.

Chocolate can be stored successfully because the cocoa butter in chocolate is a stable fat and keeps for years at room temperature. It's the cocoa fat in chocolate that makes it melt in your mouth, unlocking the taste.

But this same cocoa fat can also cause chocolate to "bloom." When exposed to high temperatures the cocoa butter will melt and rise to the surface. When the chocolate rehardens a gray film on the surface remains. This is called bloom. Chocolate with bloom is perfectly safe to eat but it may not be as creamy as when it was bought fresh.

To get the full benefit from chocolate, follow these simple rules:

- Keep chocolate away from moisture.

- Refrigerating or freezing chocolate is not desirable. When chocolate warms, or is defrosted, moisture may form on the surface and cause "bloom."

- Ideal conditions for storing chocolate are over 60° to 70° F and about 50 percent humidity.

- In hot weather, keep chocolate in a cool place. Over 80° F milk chocolate will begin to soften, over 85° F it will begin to melt.

Soybean Foundation names president

ST LOUIS, Mo. Arthur Goeken of Delavan, Illinois has been elected President of the American Soybean Development Foundation.

He began his term of office at the Foundation's December board of directors meeting in St. Louis.

Also elected were Vice President Carl Gangwish of Shelton, Nebraska; Secretary James Ferguson of Cainoun City, Mississippi; Treasurer Mike Willette of Delavan, Minnesota; and Assistant Treasurer Andrew Whisenhunt of Bradley, Arkansas.

The 36 soybean growers who serve as directors of the American Soybean Development Foundation have been elected as representatives by their state soybean promotion boards. Producers in 23 states, who invest one-half to one cent per bushel in state soybean grower investment programs, are represented on the Foundation's board of directors. Directorships are allocated on the basis of funding, with a maximum of

three representatives per state.

Funds forwarded to the Foundation by the 23 state promotion boards are invested in overseas market development, soybean research and education programs. Programs are selected and funded on their ability to promote profitable soybean production.

The Foundation contracts with the American Soybean Association to conduct activities on behalf of the grower investment program.

Soybeans are now the nation's top cash crop and No. 1 agricultural export. The soybean's two basic products — soy oil and soybean meal — are important in both human and animal diets and have many industrial uses.

U.S. soybeans must compete with other oilseeds and soybeans produced in other countries for their share of the world market. Soybean growers opened the first soybean market

development office 25 years ago when soybean exports accounted for 25 percent of a 450 million bushel crop. This year, one out of every two rows of a 2.3 billion bushel 1979 crop made their way to foreign markets.

Through the nine foreign offices of the American Soybean Association, soybean growers conduct work to maintain their market share and to develop and expand market opportunities in 76 countries. As a result, U.S. farmers

now export more soybeans than were grown just 12 years ago.

Soybean research projects selected by the Foundation for funding are developing ways to boost production efficiency and increase soybean demand. Production research has helped farmers cut harvesting losses and provided them with improved soybean varieties. Utilization has created new and improved uses for soybean and soybean products.

Starts ag consulting firm

LEWISBURG — John C. York has announced the formation of York and Associates, a consulting business that will provide agriculturally-related services to the dairy and food industry.

Former vice president of member relations for Lehigh

Valley Cooperative Farmers, York will maintain offices in Lewisburg, and Washington, D.C. Well-known in dairy circles, York will utilize four decades of experience to help clients with their market research and analysis needs, interpretation of government

regulatory activities and financial consulting.

One of the new clients of York and Associates is Atlantic Processing, Inc., one of Pennsylvania's largest dairy operations, trading under the name of Lehigh Valley Farms. York will advise API in pricing

and government programs for dairy products.

Robert P. Barry, president of API says, "We are happy to be the first of John's new clients. We intend to capitalize on his knowledge and background in planning for the future growth of API.

"As we look toward alliances with other organizations, what better help can we get than the services of a man who has been such a major force in the corporate movement?"

Ida's Notebook

Ida Risser

INTRODUCING FOUR NEW TRACTORS FROM ALLIS-CHALMERS.

Meet the four new powerhouses from Allis Chalmers. The new 6080's with a powerful 83 PTO HP. And the new 6060's power packed with 63 PTO HP. Each in two wheel drive and four wheel drive models. Four rugged hard charging machines that are built by Allis Chalmers to take on all your farm tasks. Plow disk plant cultivate mow and more. Versatility to do it all on the farm with the power to make it easy.

Power that starts with an Allis Chalmers four cylinder direct injection diesel engine. Turbocharged in the 6060's turbocharged and intercooled in the 6080's. Here's high performance power years of reliability and excellent fuel economy.

This is the same Allis Chalmers diesel engine field proven for years in powering other Allis

Chalmers machines like Gleaner combines. You can count on its dependability and its reserve power system with outstanding torque back up to pull you through tough spots.

When you need additional traction and power you've got it with the 6060 and 6080 four wheel drive models. Punch in this gutsy added traction package and go. Mechanical four wheel drive pulling power pure and simple.

Transfer power into pull with a 12 forward speed transmission in the 6080's 8 forward speeds in the 6060's. Each with many speeds in the work range between 2.0 and 6.5 mph. Large planetary final drives handle the load, and do it effortlessly.

Big tractor features continue with wet disc brakes and mechanical differential lock. A category II, 3 point hitch with Traction Booster, lower link draft sensing and extendable lower links. A big capacity open center hydraulic system. Independent PTO of 540 rpm in the 6060 540/1000 rpm in the 6080.

The new 6080's and 6060's. Built to take on all your farm tasks with the power to make them easy.

See your Allis Chalmers dealer for a close look at these four new powerhouse tractors.

Recently I leafed through a small almanac printed in 1920 by "The Lititz Express". Naturally it contained the usual advice for farmers and hints for housewives, plus weather forecasts and historical events. But some of the most interesting reading was a comparison between prices then and now.

The Lancaster published "News-Journal" could be purchased for one year for four dollars and for one dollar extra "The Lititz Express" would also be delivered.

A box of sweet milk chocolate was advertised for six cents a bar and a book of 96 pages "Seeing Lancaster County From A Trolley Window", reprinted from Pa. German was ten cents postpaid.

The Farmers National Bank of Lititz was paying four percent on Certificates of Deposit.

Several properties were also listed for sale; one being a barber shop in Lititz with a tobacco and cigar store included. A farm of 170 acres in Virginia was listed as well adapted to raising flu-cured tobacco, sweet potatoes, clover, corn and peanuts. The asking price was \$6500.

Some of the pictures are extremely primitive looking. The electric washing machine with a separate rinse tub has very large

metal wheels and was made in Illinois.

The John Deere "Waterloo Boy" tractor with a tank of kerosene mounted on the front and the radiator placed sideways on the chassis is an odd looking contraption to say the least.

However, some things sounded quite similar to present day advertisements. One was "Carbonvoid" which was said to eliminate the carbon troubles for motorists and make gasoline 25 per cent more effective. Another were the number of booklets for sale which expressed men's ideas in solving the world's problems.

One was stated as follows, "The abolition of privilege will make 'getting a living' easy for all and thus put the merit incentive in control of all human action," and all this for five cents.

One advertisement urged the reader to write for particulars and enclose a two cent stamp so as to learn how to grow hair without drugs. But to show how far we've come in 60 years was this item listed under Good Ideas - "For women M.A. should only stand for good old-fashioned 'ma'."

They should meet some of today's women with their higher education and incentive to be more than a mother.

CUSTOM BUILT FEED BINS

FEATURING:

- High quality 14 gauge steel
- Solid Welded Seams Making it Water and Rodent Proof
- Long Taper and Large Opening for Easier Flow
- Can be installed inside or outside building

Most Installations Can Be Made Without Auger!
WILL DELIVER AND INSTALL ANYWHERE

Lancaster County DHIA Monthly Report

NOVEMBER 1980

A Registered Holstein owned by John M. Harnish, 1036 Beaver Valley Pike, Lancaster, completed the highest 305 day lactation.

Fern produced 26,807 pounds of milk, 1042 pounds of butterfat with a 3.9 percent test.

Second high lactation was completed by a Registered Holstein cow owned by Aaron K. Stoltzfus, R1 Honey Brook. Starz produced 26,810 pounds of milk, 1018 pounds of butterfat with a 3.8 percent test in 305 days.

The herd of Nelson H. Wenger, R6 Manheim, had the highest daily butterfat average. This herd of 450 Registered Holstein cows average 50.4 pounds of milk, 2.21 pounds of butterfat with a 4.4 percent test.

The herd of Paul H. Martin, R1 Ephrata, placed second. This herd of 548 pounds of milk, 2.20 pounds of butterfat with a 4.0 percent test.

First 305 days of lactation with 700 or more pounds of butterfat.

when power fails...

DEPEND ON

PINCORTRACTOR DRIVEN
ALTERNATORS

No one can match PINCOR—the new leader in farm standby power! Models from 15,000 thru 75,000 watts AC ■ Continuous and conservative output ratings ■ No aluminum wire, all copper wired and wound ■ Long life 1800 R.P.M. alternator operation ■ 5 Year parts and labor warranty ■ Lease purchase plan ■ Affordably priced

If you shop and compare you will buy PINCOR!

HAVERSTICK BROS., INC.

211 Stone Mill Road
Lancaster, Pa. 17603
Call Us At 717-392-5722

Farm Credit can help you fill your feed trap.

If cash flow or bill consolidation headaches have you talking to yourself, talk to us. We're Farm Credit, and there's hardly a money problem that we can't help you with.

WE'LL HELP WITH LOW RATES

Look around. Check prevailing interest rates. Then check in at your Farm Credit office. We think you'll see the advantage of a Farm Credit loan.

YOUR PAYMENTS WILL FIT YOUR INCOME PATTERN

At Farm Credit, we always try to schedule your payments around your peak income periods. So you pay us when your crops or livestock pay you.

LET'S TALK . YOUR PLACE OR OURS

You'll always get prompt attention at your Farm Credit office. And if you're too busy to make the trip in, give us a call. We'll come to you. Most of us were brought up on farms, and we know how tough it is to break loose sometimes. It all comes down to this. Whatever farm-related need you want money for, chances are, Farm Credit can help. Drop by or give us a call. You'll find that we're your kind of people.

**Finally,
a Snowplow
for 2WD Trucks**

**SnowKing[™]
by WESTERN**

The first lightweight snowplow designed specifically for 2-wheel drive trucks. SnowKing is perfect for clearing your driveway or in light commercial use and the low price will surprise you.

This winter, sit in your heated cab and move drifts in minutes or face the cold for hours. The choice is yours. SEE

Volumatic® III

silage distributor-unloader

by JAMESWAY®

Cold weather performer

Another reason why all ring-drive silo unloaders are not alike: New four-blade chipper wheel easily removes hard-packed or frozen silage from the silo wall. Blades can be reversed to double their cutting life. Wheel cast of rugged ductile iron to take the daily shock of cutting through stubborn silage.

See us for systems and service that help make the good life better.

Holiday eating syndrome in cattle

When you think about it cows have a lot in common with us. When it comes to holidays, many good eating habits go out the window at least mine do! Remember all those Christmas cookies and candies and those big meals with lots of rich desserts?

Remember too that over stuffed feeling and the acid indigestion your experienced shortly after you pushed yourself away from the dinner table? If so you now have a better appreciation of how some cows feel because of the way we feed them.

These cows suffer from what I have termed the holiday eating syndrome. To put it another way they experience acidosis and loss of appetite.

We get this feeling when we indulge in a lot of rich foods (breads, cookies, cakes, candies, pies, etc.) Cows are affected similarly when we feed them an abundance of corn silage, high moisture corn and concentrates. This problem

is compounded by the high acid content of ensiled feeds.

You probably wouldn't think of starting off your day with several big pieces of rich pie topped with whipped cream followed by some cookies and candy and then having nothing but a salad for dinner. But how often have you gone out to the barn first thing in the morning to give your cows a big helping of corn silage, high moisture corn and concentrate (all acid producing feeds) followed by hay later on during the day?

These kinds of eating habits can foul up our guts and those of cows too.

Remember a cow relies upon millions of microscopic-sized microorganisms in her rumen to digest a lot of the feed she consumes.

These microorganisms perform best between certain pH ranges (acid levels). If we allow a cow's rumen pH to bounce around wildly throughout the day because of poor feeding habits we

Over 80 Years Experience

Patz builds feed handling systems you can depend on year after year after year

That's because Patz spends a great deal of time in design and field testing, to make sure that our equipment will stand up to your requirements.

Whether you need a large or small feed handling system, a silo unloader, a conveyor, or feeder.

Year after year, you can depend on

Patz

Dairy Pipeline

(Continued from Page C16)

can kill off a lot of rumen microorganisms and impair the activity of others.

High levels of acid can also reduce the absorption of nutrients through the walls of the digestive tract and into the blood stream. In addition, stomach ulcers caused by excess acids can produce substances which

are toxic to the cow's system.

As a result we experience health problems, reduced appetite, depressed fat tests and poorer feed conversions. She is like a tractor running on half its cylinders; it doesn't do much for her output!

Hay encourages cows to

produce saliva, and saliva is nature's own buffer; it helps cows to neutralize acids and to stabilize rumen pH.

Thus, there appears to be some merit in giving cows some hay before feeding them a lot of silage, high moisture corn and concentrates; it helps to get their rumen prepared for these acid-producing feeds which will be fed later. At least, this is the thinking of some nutritionists.

It is similar to you starting your meal with a salad and finishing with dessert.

Feed frequently

Another way to keep the rumen more stable and to maintain a large population of active microorganisms is to feed frequently, or blend the feeds into total mixed rations. These practices prevent the rumen microorganisms from the shock of slug-loading.

These microorganisms are your free hired men working for you in the cow's rumen. So, it's to your benefit to maintain a high population and to keep them working happily.

Being particular about the order of feeding and feeding frequently or blending the feeds into a total mixed ration can improve feed efficiency — more milk with less feed. And, with today's feed costs, that is worth shooting for.

These experiences help to explain why mix wagons have become popular on many dairy farms, and why many dairymen with top producing herds feed frequently throughout the day.

Feed efficiency can also be improved by the use of buffers when heavy reliance is placed upon corn silage, high moisture grains and concentrates. This may be particularly true in early lactation when a cow's appetite is being challenged

and when a high proportion of concentrate to forage is being fed.

If hay is scarce, here's where a few pounds of your best hay will probably return biggest dividends, too. And speaking of hay, don't forget to save some for those dry cows. It helps them to restore their gut to good health, and a healthy gut is a more efficient gut.

A balanced ration also contributes to increased feed efficiency. The best guide is forage testing and feed programming. The more frequently it is done, the better it is as a guide.

Remember too, there is no magic to forage testing and a computerized feed program; they are not better than the brains behind the program, the accuracy of sampling, the herd data provided to the computer, and the way the program is carried out on the farm.

Fresh clean feed

Again, when feeding cows, think of yourself. You probably appreciate fresh food served on a clean plate. So do cows! Keep feeds fresh, especially ensiled feeds, don't "throw down the silage" until you are ready to feed it.

Keep the mangers clean and remove the leftovers.

Remember, water is an important feed, too. So be sure to keep it clean and unfrozen, and the water bowls clean.

True, these suggestions do not make your job easier, but they may encourage your cows to work a little harder for you, improving your cash flow without any great increase in expense. With this in mind, and the new year upon us, it may be a good time to resolve spending a little more time on those little things around the barn that can mean a lot to your satisfaction.

Have a good New Year in Eighty-One!

No Competitor
Can Beat The
WIC CHOPPER
For Performance
And Cost!

WIC BEDDING CHOPPER

The Wic bedding chopper chops straw, hay or corn fodder and spreads it uniformly under your cows, all in a single operation. When you use chopped bedding, you save on straw and your cows stay much cleaner. On top of that, cleaning up is a breeze...

All models of Wic's bedding chopper have four rows of knives insuring a better spreading action.

Wic has also foreseen an adjustable grill in 5 positions to avoid overloading the motor while using different bedding such as damp straw, old hay, etc.

With a simple adjustment that either speeds up or reduces the rotation of the tub, you can cut the bedding to the desired length. Wic the futuristic chopper now!

FRAME steel monocoque paint
BARREL plastic 3/16" thick
WHEELS 2 pneumatic of 16"
WHEELS 1 swiveling
BRAKE on wheel swiveling
CAPACITY 1 bale/50 seconds approx
DIMENSIONS width 31" (80 cm) (with-out handle) length 45" (115 cm)
DIMENSIONS height 55" (140 cm)
WEIGHT 440 lb (200 kg)

ELECTRIC BEDDING CHOPPER

Wic also makes an electric 200 volt a.c. chopper or a 24 volt d.c. battery operated chopper including an automatic charger. These two models are equipped in the factory with a manual starter panel and are protected by fuses to diminish risk of accidents.

Very quiet, these bedding choppers are mostly used on small or medium sized farm. As well as being mobile, the 220 volt a.c. model can be installed stationary. Motor: 220 volt a.c. 3 h.p. 24 volt d.c. 2 1/2 h.p.

GAS BEDDING CHOPPER

The gas powered bedding chopper is the most popular on the market. Its operation is simple and it handles easily. Equipped with a Honda 4 stroke gas engine, the Wic bedding chopper insures maximum output while in use.

Motor: 5, 7 or 10 h.p. 4 stroke Honda
Starter: 5 h.p. manual and 7 and 10 h.p. manual or electric start

WIC MOTORIZED SILAGE WAGON WITH HYDROSTATIC SPEED CONTROL

- ★ Regular Feed Discharge or 40" High Feed Discharge
- ★ Electric or Gas Operated

POWER TAKE OFF BEDDING CHOPPER

Wic has perfected a three point hitch PTO chopper activated by the power of your tractor. Easy to install, it is ideal for free stalls or in strawbale fields for mulching purposes.

the systems that make hogs **SUPER THRIFTY...**
SUPER PROFITABLE...SUPER EASY TO RAISE

Chore-time® feed bins, flex-auger®, and other equipment work together to help you modernize quickly, efficiently, economically

sow feeding...

Taking gestating sows out of the "maddening crowd" and putting them into their own individual stalls with a Chore-Time feeding system is the way to bigger litters, better litters, more litters from each sow, and more money for you to keep. Farmers can get back \$16 or more for every dollar invested in a Chore-Time Sow Feeding System.

hog feeding...

Your imagination is the limit when it comes to the hog feeding layout you can get with Chore-Time's patented FLEX-AUGER® Feed Delivery System — it goes up, down, around, thru, over, or under. And it does it all without gears, corner cogs, or other energy-eating mechanism. The secret is our sensible one-piece, continuous, spring-type "centerless" auger.

feed bins...

With more than 40 models to choose from, Chore-Time's line-up of feed bins lets you choose exactly what you need — not what somebody wants you to have. They're all completely galvanized (no painted parts) and have other quality features that you need in a bin for long years of trouble-free service at low cost.

ventilation...

Keep animals comfortable, and you keep them far more thrifty and far more profitable. Chore-Time's Advanced Air Systems approach combines controlled air inlets with the finest variable speed and single speed fans and other components. They're fitted to your specific building. The result is year-around, day-in and day-out comfort for your animals.

Martin LIMESTONE

Apply lime on frozen ground

Lime can be applied almost anytime, however winter months are ideal, because the ground is firm and the freezing and thawing action helps to disseminate the lime in the soil.

Put warmth where you want it... with a John Deere Space Heater

Three models are available to heat machine sheds workshops cabins anywhere 115 volt current is available. Chrome handles and easy-rolling wheels make these heaters truly portable. Fuel-conserving thermostatic control is standard on the 150 000 Btu model optional on the 50 000- and 90 000-Btu models. All three burn either kerosene or No. 1 or No. 2 fuel oil. Don't let Old Man Winter catch you cold again. See us soon for portable warmth from John Deere.

(Turn to Page C22)

A Cage isn't enough

It takes more than wire to make a cage system. More than anything else it takes a feeder

Sure, other components are important, but mainly it's the feeder that makes the system. That's why Big Dutchman's Systems are equipped with a SPEED FEED chain feeder that feeds every bird the right amount at the right time, without waste.

When you compare poultry equipment remember that the real test of a cage system is its feeder. Big Dutchman is ready for the test.

Big Dutchman, where proven ideas are put into action.

Don't Settle For Anything Less Than The Original

Big Dutchman.

FREY FREE STALL

LIFETIME FREE STALL HOUSING

Cut bedding costs 75 per cent, reduce labor for barn cleaning and cow washing; reduce teat and udder injury to the minimum — house your milking herd in free stall housing. Each cow provided a stall for loafing. She won't be stepped on, the rear curb forces manure out into alley for mechanical cleaning or washing. A few minutes twice a day cleans the stalls and curbs, bedding lasts almost forever if your stalls fit the cows. Popular sizes are 6'6", 7' and 7'6" Size 'em by breed.

Our free stall partition may be mounted on wooden head boards or we make a steel divider. Set the legs in 8 to 10' concrete curbs to hold and retain bedding. Stall floor can be soil, sand or gravel. Bedding — straw, sawdust, peanut hulls, ground corn cobs, etc. Should be installed with paved alley surface 8 feet wide for mechanical cleaning or washing.

- 8 Models all steel welded farm & feedlot gates
- 2 Models all steel welded head catch gate

Livestock marketers name new president

KANSAS CITY, Mo. Lemmy Wilson, a marketing businessman with industry leadership experience at the local, state and national levels, will be installed as 1981 president of Livestock Marketing Association at LMA's January annual meetings.

Wilson, of Newport, Tenn., has served in several elected posts with the Kansas City-based trade group, and was 1980 first vice president. He will succeed Gail Sohler Yankton, S.D.

The owner-manager of Wilson Livestock Market in Newport since 1967, Wilson served for several years as president of his county cattlemen's association, and for two years was president of the Tennessee Livestock Association. He was president of the National Livestock Dealers Association prior to its merger with LMA in 1976, and is currently on the board of directors of the National

Cattlemen's Association.

In addition to his market, Wilson is also president of Lemmy Wilson Livestock, Inc., an order buying company. He also owns a feed yard, backgrounds feeder cattle and finishes several hundred head of hogs every year.

A 1959 graduate of the University of Tennessee, Wilson spent two years while in college as a radio and TV farm director. He is married and has two children.

Other officers to be installed during the Jan. 15-17 meetings are Frank D. Diercks, Gordon, Neb., first vice president; John E. Hawkins, Monticello, Fla., second vice president; Ralph Swords, Hopkinsville, Ky., treasurer, and Earl Britton, Butte, Mont., secretary.

LMA's 20-man board of directors will also be installed at the meetings, to be held on Hilton Head Island, S.C.

Other highlights of the meeting include a 1981 marketing outlook session, in which LMA directors from across the U.S. and Canada will comment on the factors having the most impact on livestock marketing in the coming year.

LMA provides representation and commercial services to over 1,600 subscribing businesses in the marketing sector throughout the U.S. and Canada.

Choose small appliances for function

PENN STATE — There are lots of reasons to buy small electric appliances, but energy savings isn't one of them. They do require very little energy to operate, but that's exactly why using them won't result in a noticeable drop in your monthly utility bill.

A recent study of five electric cooking appliances—a griddle, a fondue pot, deep fat fryer, a crepe maker and an egg cooker—showed that regular use of all five for a year would result in a net savings of \$4.60 in reduced energy costs. Marilyn M. Furry, Extension resource management specialist at The Pennsylvania State University, says that's fine if you have the appliances on hand and enjoy using them. But, she notes, most cost around \$20, so have some good reasons other than energy savings in mind before you buy.

Consider how you do a job such as grilling hamburgers now; whether the new appliance would do it faster, or more efficiently; and where you would store the appliance. Also consider the cost, the warranty and how often you expect to use the appliance. A deep fat fryer may well see lots of use in one home and little in another.

The larger electrical

Furry stresses that she thinks small appliances have a place in most homes. But they should be purchased for

the functions and convenience they offer, not for their potential energy savings.

ATTENTION ON THE FARM MIXERS

Improve your dairy, beef and sheep rations by incorporating Mol Mix/LPS Liquid Supplements in your grain or total mixed rations. It's the proven liquid supplement formulated to provide your herd with low cost, high quality balanced diets for top performance.

MOL-MIX/LPS

- Adds palatability for top feed intake
- Eliminates dry, dusty rations
- Adds low cost protein
- Eliminates ration separation
- Adds needed phosphorus, vitamins and trace minerals
- Does not add bulk
- Will not build up on equipment
- Flows evenly the year round
- Requires a minimum of equipment

Stop in or call today for Mol Mix/LPS and put palatability plus nutrition to work in your herd for top net dollar returns.

1980 News Highlights

Some 200 reporters and government officials converged on the Mason Dixon Farm in February to look at a methane digester designed to cut the farm's annual electricity bill in half — eventually eliminating the need for any power purchases. This black rubber bag traps methane gas escaping from fermenting manure.

The Egg Industryman of the Year was presented to Vernon Leininger, Denver, Lancaster County in June. Making the presentation, at right, is Walter Wheelock, Chambersburg, last year's winner. Leininger's wife, Allegra, beams her approval.

Robert Mullens of the National Farmers Union spoke out against the Beferendum last January here in Pennsylvania. The referendum to promote beef through a check-off system was later voted down by cattle producers throughout the U.S.

How many calves did you lose last year?

Fiberdome
CALFhutches
start them
out right

Raising calves is a tricky business. That's why modern calf raisers are going to individual hutches — to help save more calves by cutting down on pneumonia, scours and hoot problems. Properly made hutches help eliminate the dampness, crowding and poor ventilation that plague many calf barns.

You can be assured of this kind of healthier environment with Fiberdome CALFhutches. Their unique one-

piece construction of heavy gauge fiber glass makes them weatherproof so they will last indefinitely with normal care. No joints for moisture and bacteria to creep through. A white gel-coat finish keeps them cool in summer.

When not in use, stakes can be removed and strong U-bolts on top let you conveniently pick units up to clean or stack for compact storage.

Receive **FREE** feeding unit with the purchase of each Fiberdome calfhutch. Offer expires January 31, 1981.

The Farmer Automatic 4 Deck Cage System

A system well devised and constructed for an uncomplicated and economical operation, modern and advanced, it will help you to gain your well deserved maximum return on your investment.

More layers per square foot of building space, more than any other system on the market today, 10,000 layers per 285 cage row.

Lower maximum cage height, even lower than most 3 deck systems (6'8" max. height, 4'6" max. width).

No special and costly floor or pit construction.

The 4 deck system can be installed in an existing building, without costly conversion or remodeling problems.

Double or even triple your current building capacity.

Automatic manure removal, giving an odor free environment, healthier animals, more pleasant and healthier working conditions.

Higher bird concentration assures a comfortable, energy saving temperature during cold season.

Summer ventilation is easier to accomplish because of the absence of ammonia and other fumes.

Energy Saving Design

Only 3 fractional horsepower motors per row accomplish the automatic feeding, automatic egg conveying and automatic manure removal.

Farm Talk

Jerry Webb

A fairly disastrous cropping year here in the United States is putting a bit of pressure on available supplies of corn and soybean and it's causing some people to wonder about our export situation.

The word shortage is actually being used by some economists as they look ahead to 1981, and as they consider a 1980 corn crop off almost 20 percent and a soybean crop off more than 20 percent compared to last year.

Fact is, of the major crops grown in this country in 1980, wheat was the only one that had a larger yield than in 1979.

No question American farmers produced enough grain to feed American people, with a sizable amount left over, but our export potential keeps increasing, setting new records every year. That

market has been important to American farmers and it's been important to the American balance of trade. Economists are predicting a 30 billion dollar agriculture trade surplus during the current fiscal year, and that will offset a lot of other foreign trade deficits.

If you don't believe farm exports are important, consider this. Our 1980 exports of corn actually exceeded the nation's total corn production for 1947. And it just about equalled the average annual production of corn from 1944 through 1955.

So old-timers who want to reminisce a little bit should ponder that we've sent as much corn overseas this past season as we produced during what we considered some pretty big farming years in the post-war agricultural boom.

Economists think corn exports will increase during the current fiscal year and there will be increased domestic pressure on available corn. That means

some of it will have to come from our grain reserves and they think we may have no more than a month's supply of corn on hand by next fall.

Farmers welcome that news because it means strong prices. But it also means higher costs for livestock feeders and it raises a question about another disastrous crop year. What if the 1981 cropping season is even worse than this past one? It could happen.

There's nothing to say that a good year has to follow a bad one. There have been many years here in the East where bad years followed bad years, and nationally it wouldn't be at all difficult to have another year as dry as this past one.

That could mean real shortages.

Economists are saying that another grain crop equal to 1980 would use up all inventories and would actually require cutbacks in the use of grain here at home and in the export markets. The impact of that situation would be that situation would be tremendous for consumers and the price of food.

If you remember a few years back when we talked about dollar-a-loaf bread because of the Russian grain deal, you can just imagine what would occur when the government announced actual cutbacks in domestic and foreign supplies.

Consumers best hopes rest with a bountiful harvest and that depends on a number of

factors. If the weather and other elements of nature cooperate, and if prices look favorable at planting time, you can bet farmers will be doing their best to produce a big crop. Not just because it's needed, but also because it could be profitable.

But farmers' plans made during the next couple of months could go strangely awry, and that's what's difficult about farming.

Economic forecasts suggest to farmers that 1981 will be a year to push for maximum production. But their plans must be made at a time when they're unsure of our domestic political situation and not at all confident about our foreign policy. Even after they do their very best, they still must wait for rain. And that's the key to our agricultural productivity.

A good winter snow cover and plenty of spring rains combined with some timely showers next summer, and this talk about shortages and curtailed exports will quickly vanish and in its place will come discussions of strategic reserves and expanded export markets. But make no mistake, the huge grain surpluses of decades past are gone forever.

Switch fertilizer tanks to a Calumet liquid manure spreader with soil injector.

Livestock manure is valuable. So it makes sense to keep as much of that value in the ground as possible. A Calumet 2 or 4-shank soil injector does just that. Teamed with a Calumet liquid manure spreader, the injector puts manure as deep as 12 inches. This can help retain four times the nitrogen that's lost with

surface application, as well as reduce odors and runoff.

See the full line of Calumet spreaders from 1625 to 4500 gallons, and Calumet 2 and 4-shank soil injectors at—

Your cows need minerals

because a cow needs a total of 17 different minerals in the proper ratios and at the right levels to maintain peak milk production. The absence of just one of these 17 minerals will significantly affect milk production, digestion, performance and breeding efficiency.

Your cows need our minerals

because one of our 13 specially formulated mixes is likely to complement your feeding program. Because our mixes are the only ones which contain our exclusive blend of alkaline buffered mineral ingredients. If none of our Cattle Special mixes fits your specific feeding program, we can customize the mineral mix you need.

How? By offering a forage analysis service plus a complete feeding program recommendation. With ISF Alkaline-Buffered Cattle Specials you can put your herd on a proven and profitable mineral supplement program which can improve production, breeding efficiency, performance and digestion.

For further information on our products and services call on your nearest ISF representative.

"ATTENTION" ALL A.E. STALEY CO. WAXY-CORN CONTRACTS!

We still have plenty of waxy-seed available for the grain farmers and also Waxy Hybrids are great for cattle and hog feeders. In this area they should plant WAXY-MAIZ Hybrid seed-corn. College feeding trials show 10% better gains on 7% less corn with WAXY fed to cattle. We have several WAXY-MAIZ Hybrids for this area. They yield the same as yellow dent corn, but have higher energy starch. Hogs gain better and get to market faster on WAXY-MAIZ. We can show you how to boost cattle and hog feeding profits.

PUBLIC AUCTION

VALUABLE REAL ESTATE
THURSDAY, JANUARY 22

To be held on the premises at RD1 Annville, North Londonderry Twp., Lebanon County, Penna. Turn north onto Forge Road off Rt. 322 at traffic light at east end of Campbelltown and continue appx. 1 mile and turn right onto Airport Road and continue appx. 1 mile to property on right or turn onto first road left off route 422 past Bethlehem Steel office west of Annville and continue appx. 3 miles to sale site on left.

Real estate being a tract of land appx. 1 1/2 acres thereon located the following improvements. Lovely 4 bedroom brick and vinyl siding 2 story Colonial house of exceptionally fine construction and workmanship. Home has many, many outstanding features including wall to wall carpet and floor covering throughout, 14'x24' kitchen with oak cabinets, formal dining room with built in hutch, formal living room, family room off kitchen with fireplace with built in heat pipes, open staircase, large unique full bath on second floor and 1/2 bath off kitchen, wallpaper and plenty of closet space throughout.

Home is heated by oil hot water cast iron baseboard heat with a 1000 gal. underground storage tank. Full basement under house with cold cellar. Attached 2 car garage with overhead storage. Other particulars of note are water softener, central vacuum system, real patio, multi all vinyl windows and many, many other fine features and unmentioned items of quality.

This home was occupied and built in 1978. This is truly one of the finest homes in the area and certainly merits your attention if looking for a home of such quality. All inspections must be by private inspection by calling 717-838-4863.

Terms to be 10% down with the balance in 30 days. Real estate to be sold following the farm real estate being offered at 1:00 at the same location.

Checker Gilts™

The all important other half

Half your income potential comes from the gilts you farrow. That's why Checker™ Gilts are bred to lower your feed costs and at the same time increase your pork production. They're bred to farrow big litters of fast gaining market hogs.

Each Checker Gilt is raised under one of the industry's most comprehensive health programs.

Kleen Leen health measures include

- Raising all Checker Gilts in isolation to prevent outside contamination.
- Slaughter checking all production herds at least three times a year.
- Vaccinating every production herd for Leptospirosis and Erysipelas, and validating them Brucellosis free.
- Checker Gilts are delivered to you in a clean, sanitized truck.

Kleen Leen's unequalled health program

Every effort is made to insure the good health of the Kleen Leen breeding stock arriving on your farm. Here are some of the steps Kleen Leen takes:

- Artificial insemination is used to introduce new bloodlines into the Kleen Leen program.
- Production herds are kept as isolated as possible to prevent contamination from outside sources.
- Each production herd undergoes pre and post slaughter examination at least three times a year.
- The breeding stock you receive arrives on your farm in a clean, sanitized truck.

The Kleen Leen Health Warranty

"All Kleen Leen stock is delivered free of Lice, Swine Dysentery, Infectious Atrophic Rhinitis and Mycoplasma Pneumonia."

Inside
a
Kleen
Leen
hog

Lungs show no evidence of mycoplasma pneumonia or parasite damage

Turbinates in the nose filter air properly helping to prevent secondary lung infections

Liver and intestinal tract show no indication of excessive parasite damage

Some comments from hog producers who bought Checker Gilts

Richard Roeth and son Jeff
Troy, Ohio

Richard Roeth was running about 80 sows. He sold out cleaned up and repopulated with Kleen Leen. 2 groups of 25 and 1 group of 30 plus 4 Blackline Boars. Since then he has bought nothing but Kleen Leen boars and gilts. Richard says I feel that health genetic improvement and the availability of gilts and boars through the Purina Dealer are the best reasons to buy Kleen Leen.

Ron DeBruin
Leighton Iowa

I had good length in my hogs at home but wanted to increase my quality of meat type hogs faster. So I bought Kleen Leen boars and gilts for that reason. (Kleen Leen) animals showed good bone and muscle structure on delivery and have continued to develop well.

Glenn DeVries
Gowrie Iowa

when Landrace became available I bought 14 of them to breed with my Checker™ Boars. Talk about performance! We farrowed 145 live and healthy pigs from those 14 gilts. I'm one happy pork producer who is sold on Kleen Leen and the Purina feeding program. Let me say thank you for making such a breeding program available. I recommend Kleen Leen to everyone.
